Preface

The Public Accounts of Alberta are prepared in accordance with the *Financial Administration Act* and the *Sustainable Fiscal Planning and Reporting Act*. The Public Accounts consist of the annual report of the Government of Alberta and the annual reports of each ministry.

The 2024-25 Annual Report reflects the 2024-27 Ministry business plans, the Government of Alberta Strategic Plan, as well as the ministry's activities and accomplishments during the 2024-25 fiscal year, which ended on March 31, 2025.

The Annual Report of the Government of Alberta contains Budget 2024 Key Results, the audited Consolidated Financial Statements and Performance Results, which compare actual performance results to desired results set out in the government's strategic plan.

This annual report of the Ministry of Education contains the Minister's Accountability Statement, the ministry's Financial Information, and Results Analysis, a comparison of actual performance results to desired results set out in the Ministry Business Plan. This ministry annual report also includes:

- the financial statements of entities making up the ministry, including the Alberta School Foundation Fund, for which the minister is responsible;
- other financial information as required by the *Financial Administration Act* and *Sustainable Fiscal Planning and Reporting Act*, as separate reports, to the extent that the ministry has anything to report; and
- financial information relating to accountable organizations and trust funds, which includes the Alberta Teachers' Retirement Fund and school jurisdictions in the public education system (public, separate and francophone regional authorities and charter schools).

All Ministry Annual Reports should be considered along with the Government of Alberta Annual Report to provide a complete overview of government's commitment to openness, accountability, and fiscal transparency.

Minister's Accountability Statement

The ministry's annual report for the year ended March 31, 2025, was prepared under my direction in accordance with the *Sustainable Fiscal Planning and Reporting Act* and the government's accounting policies. All the government's policy decisions as at June 4, 2025 with material economic or fiscal implications of which I am aware have been considered in the preparation of this report.

Demetrios Nicolaides

Minister of Education and Childcare

Message from the Minister

Alberta Education and Childcare is committed to supporting the success of students and strengthening our education system. I am incredibly proud of the work we do in collaboration with our education partners to provide a world-class education for our children.

During the 2024–25 fiscal year, Alberta Education made significant investments to reduce classroom sizes and build more schools for Alberta students and families. We improved our education funding model so that school boards are better positioned to respond to rising student numbers. We also introduced several new policies and programs designed to support student success and ensure we continue to maintain a well-run, world-leading education system.

In September 2024, we announced the School Construction Accelerator Program and made a generational investment of \$8.6 billion to build up to 100 new and modernized schools. This commitment means smaller class sizes and schools closer to home—reducing commute times for students and families. Additionally, Alberta Education created a streamlined funding process that allows these schools to be built faster. Since beginning the program at the start of this school year, 33 school projects have already moved forward to the next stage of the construction process.

In our classrooms, we have taken steps to strengthen learning foundations for our students. At the start of the school year, we introduced a new policy removing cellphones and personal mobile devices from classrooms. This change has helped limit distractions, allowing students to focus more effectively. We also enhanced mandatory literacy and numeracy screening for students in Kindergarten to Grade 3, ensuring that children needing extra help are identified early and receive the support they need. Beginning in the 2026–27 school year, this screening will be expanded to include students in Grades 4 and 5.

This school year, we made significant progress in updating the provincial curriculum. The draft Kindergarten to Grade 6 Social Studies curriculum was piloted by more than 2,100 teachers from 62 school authorities, including a First Nations education authority. The curriculum is now ready to be implemented in Kindergarten to Grade 3 classrooms starting in the 2025–26 school year.

Our proud tradition of offering Albertans a range of educational choices continued in 2024–25. With funding for public, separate, francophone, charter, and independent schools, we provided more educational options than ever before. We also made further investments to expand and enhance dual credit programs and collegiate schools, giving students a head start on post-secondary studies and direct pathways to rewarding careers.

In partnership with First Nations, Métis, and Inuit communities, we strengthened connections through our Bridging Classrooms to Communities and Community Reconciliation grants. We also supported protocol agreements with both the Blackfoot Confederacy and the Stoney Nakoda–Tsuut’ina Tribal Council. Work has begun on a new Confederacy of Treaty 6 Education Work Plan, in collaboration with Advanced Education and Indigenous Relations.

Through the passage of the *Education Amendment Act, 2024*, we enhanced transparency and improved communication with parents on public health measures in schools and important topics such as gender identity, sexual orientation, and human sexuality. These changes will strengthen parental involvement in their children's education.

I am incredibly proud of all that we have accomplished and tremendously grateful to Alberta's dedicated teachers, school support staff, and our many education partners who help make it all possible. We look forward to continuing our close collaboration to provide a world-class education for Alberta's children.

Minister of Education and Childcare

Management's Responsibility for Reporting

The Ministry of Education includes:

- Department of Education;
- Alberta School Foundation Fund; and
- Alberta school authorities.

The executives of the individual entities within the ministry have the primary responsibility and accountability for the respective entities. Collectively, the executives ensure the ministry complies with all relevant legislation, regulations and policies.

Ministry business plans, annual reports, performance results and the supporting management information are integral to the government's fiscal and strategic plan, annual report, quarterly reports, and other financial and performance reporting.

Responsibility for the integrity and objectivity of the accompanying ministry financial information and performance results for the ministry rests with the Minister of Education and Childcare. Under the direction of the Minister, I oversee the preparation of the ministry's annual report, which includes the financial information, performance results on all objectives and initiatives identified in the Ministry Business Plan, and performance results for all ministry-supported commitments that were included in the 2024-27 Government of Alberta Strategic Plan. The financial information and performance results, out of necessity, include amounts that are based on estimates and judgments. The financial information is prepared using the government's stated accounting policies, which are based on Canadian public sector accounting standards. The performance measures are prepared in accordance with the following criteria:

- Reliable – information used in applying performance measure methodologies agrees with the underlying source data for the current and prior years' results.
- Understandable – the performance measure methodologies and results are presented clearly.
- Comparable – the methodologies for performance measure preparation are applied consistently for the current and prior years' results.
- Complete – outcomes, performance measures and related targets match those included in the ministry's Budget 2024.

As Deputy Minister, in addition to program responsibilities, I am responsible for the ministry's financial administration and reporting functions. The ministry maintains systems of financial management and internal control which give consideration to costs, benefits and risks that are designed to:

- provide reasonable assurance that transactions are properly authorized, executed in accordance with prescribed legislation and regulations, and properly recorded so as to maintain accountability of public money;
- provide information to manage and report on performance;
- safeguard the assets and properties of the province under ministry administration;
- provide Executive Council, the President of Treasury Board and Minister of Finance, and the Minister of Education and Childcare the information needed to fulfill their responsibilities; and

- facilitate preparation of Ministry business plans and annual reports required under the *Sustainable Fiscal Planning and Reporting Act*.

In fulfilling my responsibilities for the ministry, I have relied, as necessary, on the executives of the individual entities within the ministry.

Ministry Overview

The Ministry of Education provides leadership, direction and oversight in the delivery of a student-centred Early Childhood Services to Grade 12 education system that serves Alberta's children and students.

The ministry is focused on:

- **Student Success** – Ensuring that the provincial curriculum provides opportunities for students to form the foundations for successful and fulfilling lives and supporting student mental health and well-being through collaboration across ministries. This includes monitoring student progress through comprehensive provincial assessments, including early literacy and numeracy screening, to identify and address student learning needs early on.
- **Indigenous Education** – Incorporating First Nations, Métis and Inuit histories, cultures, languages and perspectives in the provincial curriculum and collaborating with education partners to improve education outcomes for First Nations, Métis and Inuit students and help them throughout their learning journeys.
- **Access to a Variety of Learning Opportunities** – Providing Alberta's students with a variety of career pathways to ensure access to post-secondary education or their chosen fields in the workforce and enhance their competitiveness in the modern economy. This includes enhancing career education programming, such as dual credit programs, and expanding access to collegiate school opportunities.
- **Well Governed Education System and Workforce** – Directing the education system and overseeing the administration of a variety of schooling options and education programs and services through legislation, provision of funds and planning suitable learning facilities. This also includes collaborating with school authorities to ensure teaching excellence.

Organizational Structure

The Ministry of Education consists of the Department of Education, the Alberta School Foundation Fund and Alberta's public, separate, francophone, charter and independent (private) school authorities. The ministry leads an Early Childhood Services to Grade 12 education system that provides the foundation for all learners to achieve provincial student learning outcomes, succeed in developing the knowledge, skills and competencies needed to pursue their career interests and make meaningful contributions to their communities and the world.

¹Includes supervision of home education programs

²Denotes a part of the public education system

Operational Overview

Department of Education

Alberta Education provides leadership, direction and oversight of the education system, and supports students, parents, teachers and administrators from Early Childhood Services through Grade 12. The department provides leadership and direction by developing and supporting the implementation of provincial curriculum for all subjects and grades, helping school authorities implement ministry programs and policies and enabling excellence among the education system's teachers and leaders. The department has a role in facilitating access to francophone education and supporting school authorities in serving students with diverse learning needs and improving outcomes for First Nations, Métis and Inuit students.

The department is responsible for funding the education system, and provides oversight by establishing guiding legislation and policy, setting standards and assessing outcomes, ensuring accountability for financial and performance outcomes and providing direction to school authorities to inform their planning and reporting.

Alberta School Foundation Fund

The Alberta School Foundation Fund receives tax revenues from municipalities based on the equalized assessment of real property in Alberta and education mill rates established by the lieutenant-governor in council. In 2024-25, the education system received \$2.5 billion in education property taxes (including opted out school boards) to support students, parents, teachers and administrators from Early Childhood Services to Grade 12.

School Authorities

School authorities include public and separate school boards, francophone regional authorities, charter school operators, independent (private) school operators and independent (private) Early Childhood Services operators. These school authorities provide programs for children and students in the province's Early Childhood Services to Grade 12 education system in accordance with the *Education Act*.

Key Highlights

The Ministry of Education focused on accomplishing four outcomes identified in the 2024-27 Ministry Business Plan:

- Alberta's students are successful.
- First Nations, Métis and Inuit students in Alberta are successful.
- Alberta's students have access to a variety of learning opportunities to enhance competitiveness in the modern economy.
- Alberta's Kindergarten to Grade 12 education system and workforce are well managed.

Key highlights and results achieved by the Ministry of Education in 2024-25 include:

- Increased the number of student spaces by providing \$2.8 billion for school construction as a three-year capital investment, funding 99 school projects in various stages across the province.
- Through the School Construction Accelerator Program, an additional \$8.6 billion for school construction is committed, which will deliver more than 100 new and updated schools over the next seven years.
- Provided \$9.3 billion in education system funding to ensure the Early Childhood Services to Grade 12 education system continues to support children and students to develop their knowledge and skills and achieve learning outcomes.
 - In the 2024-25 school year, more than 794,000 children and students were registered in Early Childhood Services to Grade 12 education across Alberta, an increase of 3.1 per cent from the previous school year.
 - Revised the funding framework from a three to two-year enrolment average to address enrolment growth while protecting school authorities with declining enrolment. The new framework will be implemented in the 2025-26 school year.
- Released an updated Ministerial Order on Student Learning, focusing on career education, knowledge and skills development, educational programming and preparing students to be active and engaged citizens. To ensure alignment of curriculum development with the updated Ministerial Order on Student Learning, the department also released an updated Guiding Framework for the Design and Development of Kindergarten to Grade 12 Curriculum in April 2024.
- Invested approximately \$31 million to support curriculum renewal to ensure Alberta students have the knowledge and skills to support their future success.
- Funded teacher professional learning and the development of learning and teaching resources to support the province-wide implementation of new Science, French Language and Literature and French Immersion Language Arts and Literature curricula for Grades 4 to 6;
 - Supported piloting of the new draft Kindergarten to Grade 6 Social Studies curriculum in 62 school authorities; and
 - Began engagement with teachers, school leaders and Albertans to inform the development of draft Grades 7 to 9 Mathematics and Social Studies curricula and Grades 7 to 10 Physical Education and Wellness and Career and Life Management curricula.

- Introduced enhanced Literacy and Numeracy Screening Assessments for students in Kindergarten to Grade 5 to ensure early identification of students who need additional supports.
 - Starting January 2025, Kindergarten children had their literacy and numeracy skills screened through a consistent, province-wide approach.
 - Students in Grades 1 to 3 identified as requiring additional support in January are screened a third time at the end of the school year to monitor their progress.
 - New screening requirements for Grades 4 to 5 students will begin in September 2026.
 - \$10 million was invested in Literacy and Numeracy Support Funding to support literacy and numeracy skill development for students identified as needing extra supports through the screening assessments.
 - An additional \$7.5 million was provided for Literacy and Numeracy Support Funding for 2024-25 to further support school authorities in providing interventions to students who require additional supports.
- Transitioned the General Education Development program to the Canadian Adult Education Credential to support adults who do not have a high school diploma to receive the credential and open new doors to education or employment opportunities.
- Addressed classroom complexity by providing \$42.5 million in learning support funding through the Classroom Complexity Grant for the 2024-25 school year.
 - Approximately \$480,000 from this funding will be used to increase the number of educational assistant graduates in the province through the Educational Assistant Internship program. To date, 281 participants have completed the program to become educational assistants or enhance their skills.
- Limited distractions in Alberta's classrooms and protected student mental health through the *Standards for the Use of Personal Mobile Devices and Social Media in Schools*.
 - The new standards on personal mobile devices established restrictions, enforcement procedures and exceptions for Alberta's Kindergarten to Grade 12 public, separate, francophone, charter and independent (private) schools and independent (private) Early Childhood Services operators.
- Supported school authorities in fostering positive student mental health by providing \$20 million to the Mental Health in Schools pilot program.
 - Education is also working with Mental Health and Addiction and CASA Mental Health to expand in-school support for students facing complex mental health challenges.
- Continued to collaborate with Indigenous communities, partners and education stakeholders to enhance educational outcomes for First Nations, Métis and Inuit students.
 - \$3.4 million was distributed to 12 grant recipients of the Bridging Classrooms to Communities Grant pilot program to help strengthen student connections and foster relationships with Indigenous communities and advance truth and reconciliation.
 - \$250,000 was provided to the Blackfoot Confederacy and \$250,000 was provided to the Stoney Nakoda-Tsuut'ina Tribal Council (G4) to support the implementation of protocol agreements.
 - \$250,000 was invested to develop the first ever Alberta Education and Confederacy of Treaty 6 Education Work Plan in collaboration with Advanced Education and Indigenous Relations.
- Expanded career education opportunities by investing almost \$4.4 million into dual credit grants. A total of 79 grants were awarded to 60 school authorities to support 57 start-up grants and enhance 22 enhancement grants.

- Supported school authorities in recruiting qualified individuals to teach Career and Technology Studies while working towards their Interim Professional Certification through the Bridge to Teacher Certification program. Approximately \$625,000 was provided to support 25 tradespeople to qualify for an interim teaching certificate while completing a university bridging program.
- Distributed the Home Education Grant of \$1,802 per student to support more than 21,500 students enrolled in home education programs across Alberta and allocated \$1.8 million in the 2024-25 school year to continue the Home Education Kindergarten pilot program.
- Expanded access to collegiate school opportunities to expand students' pathways into post-secondary education and the workforce by:
 - Investing \$23.7 million to support start-up and expansion costs for collegiate schools, supporting seven new collegiate school programs to begin operations for the 2024-25 school year. This increased the total number of collegiate schools in the province from five to 12, offering more than 30 unique pathways.
- Amended the *Education Act* through the *Education Amendment Act, 2024* to support families and students navigating complex conversations around gender identity, sexual orientation and human sexuality, while also supporting continuity in a student's learning during a public health emergency or state of emergency. New and amended sections of the *Education Act* relating to notification and consent for health measures, the right to education during emergencies and updated requirements for shifts to at-home learning came into force on March 1, 2025.
- Dealt with student transportation-system challenges by addressing ride times, transportation cost pressures and affordability, including reducing the distance criteria for student transportation eligibility.

The Ministry of Education remains committed to regulatory approaches and program delivery that reduces unnecessary government oversight and emphasizes outcomes to improve access to government services, attract investment, support innovation and competitiveness and grow Alberta businesses.

Discussion and Analysis of Results

Actions that support the priorities of the Government of Alberta Strategic Plan

Key Priority Two:

Investing in Albertans

Objective three:

Providing high quality education and opportunities for skill development

Actions:

- Allocating \$2 billion over three years towards maintaining and enhancing existing school infrastructure and building new schools, to address the needs of Alberta's growing communities. Detailed reporting found on page 65.
- Supporting students with complex learning needs through specialized learning supports, and improved access to educational assistants and qualified professionals. Detailed reporting found on pages 37 and 61-63.
- Supporting relationship-building between Indigenous communities and schools, including providing guidance to First Nations education authorities, and using tools such as framework agreements to boost education outcomes for Indigenous students. Detailed reporting found on pages 36-38.
- Enhancing career education programming and increasing collegiate school opportunities to ensure a variety of career pathways for students to enter post-secondary education or the workforce. Government is building a skilled, educated and engaged workforce for the future to prepare students for well-paying jobs following the successful completion of their programs, and address current and longer-term skilled labour market challenges. Detailed reporting found on page 49.

Objective six:

Forming lasting and meaningful partnerships with Indigenous communities

Action:

- Working with the federal government and First Nations, Métis and Inuit communities to improve access to key services such as education and healthcare for Indigenous peoples, no matter where they reside in the province. Detailed reporting found on page 36.

Outcome One: Alberta's students are successful

Alberta Education provides leadership, direction and oversight in the delivery of a student-centred Early Childhood Services to Grade 12 education system that serves Alberta's children and students. In 2024-25, the ministry continued to update and implement provincial curriculum to provide Alberta students with foundational knowledge and essential skills needed for future success. The ministry monitors student progress through administration of provincial assessments to ensure that Alberta's Kindergarten to Grade 12 education system remains accountable and responsive to students' needs. Alberta Education also collaborates with other ministry partners to expand mental health and well-being supports in schools and communities to empower students with the necessary resources to thrive in learning and life.

Student success was achieved by:

- continuing to offer curriculum that provides students with literacy, numeracy, citizenship and practical skills;
- collaborating with other ministries to expand mental health and well-being supports for students; and
- developing and maintaining comprehensive provincial assessments, including early literacy and numeracy screening, to assess progress, identify learning challenges and monitor student success.

Key Objectives

1.1 Continue to offer curriculum that provides students with literacy, numeracy, citizenship and practical skills.

Curriculum Renewal and Engagement

Alberta Education is committed to providing students with a curriculum that drives their passion for learning and prepares them for success in the classroom and beyond. In 2024-25, approximately \$31 million was invested in renewing Kindergarten to Grade 12 curriculum. This funding supported:

- implementation of new Grades 4 to 6 curriculum for Science, French First Language and Literature and French Immersion Language Arts and Literature;
- classroom piloting of new Kindergarten to Grade 6 Social Studies curriculum;
- development and procurement of learning and teaching resources aligned to the new curriculum;
- opportunities for teacher professional learning; and
- enhancements to the digital learning platform [new.LearnAlberta.ca \(curriculum.learnalberta.ca\)](https://new.LearnAlberta.ca/curriculum.learnalberta.ca).

In 2024-25, Alberta Education continued curriculum renewal through an open, transparent and collaborative process. As part of the curriculum engagement process, Alberta Education released an updated Ministerial Order on Student Learning and the *Guiding Framework for the Design and Development of Kindergarten to Grade 12 Curriculum*. The new ministerial order took effect on April 25, 2024, and focuses on career education, knowledge and skills development, educational programming and preparing students to be active and engaged citizens. The updated guiding framework sets clear direction for creating a developmentally appropriate curriculum that upholds high academic standards and promotes personal excellence.

A new draft Kindergarten to Grade 6 Social Studies curriculum was released on April 26, 2024, for optional classroom piloting in the 2024-25 school year. Alberta Education also began engagement with education partners, including system leaders, First Nations education directors, subject experts and teachers to inform the development of draft curriculum for Grades 7 to 9 Math, Grades 7 to 9 Social Studies, Grades 7 to 10

Physical Education and Wellness and Career and Life Management. Out of 440 teachers nominated by the Alberta Teachers' Association and school authorities, 107 were selected to participate in the Teacher Curriculum Consultation Group. They represent a diverse group of certificated teachers with a wide range of subject matter expertise, including teachers from Indigenous communities, francophone communities and all school authority types across geographic locations. This engagement approach helps ensure continuity and alignment of proposed draft curriculum across grades as it progresses from elementary to junior high school subjects. Feedback received from engagement will inform new draft curriculum in spring 2025, with classroom piloting to begin in the 2025-26 school year.

Curriculum Implementation

In 2024-25, Alberta Education provided more than \$14.3 million to school authorities to support province-wide implementation of new Grades 4 to 6 Science, French First Language and Literature and French Immersion Language Arts and Literature curricula. This funding included more than \$6.7 million for professional learning and more than \$7.6 million to develop or acquire learning and teaching resources to ensure schools have access to resources that are aligned to new curriculum and meet their students' learning needs.

Alberta Education authorized more than 220 learning and teaching resources in French and English aligned with new Kindergarten to Grade 6 curriculum and facilitated 12 professional learning sessions for education partners to raise awareness of resources and supports available on [new.LearnAlberta.ca \(curriculum.learnalberta.ca\)](https://new.learnalberta.ca/curriculum.learnalberta.ca). The bilingual platform provides a variety of teacher planning and collaboration tools, including sample lesson plans and the *Provincial Resource Review Guide* to support the implementation of new curriculum.

Classroom Piloting

Curriculum renewal funding in 2024-25 included more than \$1.1 million to support classroom piloting of the new draft Kindergarten to Grade 6 Social Studies curriculum. More than 2,100 teachers from 62 public, separate, francophone, charter and independent (private) school authorities, as well as a First Nations education authority, piloted the new draft Kindergarten to Grade 6 Social Studies curriculum in the 2024-25 school year. Engagement sessions with classroom piloting teachers focused on professional learning to support understanding of the draft curriculum and on collecting teacher feedback. This feedback was used to refine draft curriculum before it was released for classroom piloting.

Piloting teachers were eligible to claim up to \$1,000 (\$200 per day for a maximum of five days) to participate in professional learning and/or teacher collaboration meetings. School authorities were also reimbursed for release time associated with substitute teachers. Department staff provided three virtual sessions in fall 2024 for piloting teachers to gather feedback, share experiences, support professional learning and identify areas requiring further assistance.

Classroom piloting investments in 2024-25 included \$350,000 in grant funding to The Edmonton Catholic Separate School Division to support piloting activities and resource development and \$220,000 in contracts with The Edmonton School Division and The Christ the Redeemer Catholic Separate School Division for the development of learning and teaching resources to support new draft Social Studies curriculum implementation.

More than 500 learning and teaching resources were published on [new.LearnAlberta.ca \(curriculum.learnalberta.ca\)](https://new.learnalberta.ca/curriculum.learnalberta.ca) to support piloting of draft Kindergarten to Grade 6 Social Studies curriculum in English and French.

Financial Literacy

In 2024-25, Alberta Education continued to develop new curriculum to enhance financial literacy education with the goal of providing students with opportunities for developing an understanding of economic development, economic decision making and financial well-being.

Alberta Education continued to partner with Enriched Academy to provide financial literacy programming for school authorities. In 2024-25, Enriched Academy received a \$900,000 grant to provide Alberta students with enhanced learning opportunities related to financial literacy, including money management, budgeting, tax-free savings accounts and registered retirement savings plans, credit, student loans and saving across their lifespan. As of June 2024, more than 360,000 Kindergarten to Grade 12 students have participated in these learning opportunities. Student participation information for 2024-25 will be available in fall 2025.

French Language Education

Alberta Education recognizes the importance of preserving and promoting the French language and francophone culture by ensuring francophone students have access to a quality education in French. The department also supports French-language education through various programs, including French Immersion and French as a Second Language courses.

Alberta Education supported the Official Languages in Education Programs by leading negotiations with the federal government on the Canada-Alberta Agreement on Minority-Language Education and Second-Language Instruction. In 2024-25, Alberta Education distributed \$19.8 million in funding for francophone education, French immersion programming and French as a Second Language courses.

The department also led the working group for the development of provincial standards and credentialing for French immersion programming. The working group met twice in 2024 and will meet again in April 2025 to advance recommendations that help promote the programs and incentivize more students to remain in French immersion programs at the high school level.

Pan-Canadian Programs

Alberta Education worked with school authorities and the Council of Ministers of Education, Canada Secretariat to administer the Odyssey pan-Canadian program. Odyssey participants, also called language assistants, work directly in classrooms with French language teachers to provide students the opportunity to interact with a native speaker, employ the language in daily life, and gain a deeper understanding of francophone culture. In 2024-25, 78 French language assistants worked in 54 schools across four francophone regional authorities and 20 public and separate school authorities.

Alberta Education also worked with the Council of Ministers of Education, Canada Secretariat to support opportunities for Alberta students to participate in spring and summer pan-Canadian programs. These programs promote francophone culture and expose Alberta's students to francophone regions across Canada while enhancing their French-speaking skills. During the 2024-25 school year:

- 34 students were enrolled in the Destination Clic program;
- 388 students from Alberta participated in the Explore program that occurred outside of the province; and
- 221 students are registered to participate in the Alberta Explore sessions that will be held in collaboration with the University of Alberta, University of Calgary and Medicine Hat College.

International Education

Alberta Education continued to embrace the diversity of the province's population and support initiatives that promote an understanding and respect of connections and differences between the world's people. The ministry contributes to building a globally skilled workforce by providing Alberta students with opportunities to develop global competencies and intercultural skills.

In 2024-25, Alberta Education continued to administer student exchange programs (virtual and/or in-person) with Germany, Italy, Japan, Mexico, Quebec, Spain and Ukraine. Through in-person programs, Alberta students are paired with students from a region that speaks the language they are learning and alternate sharing their homes, schools and communities with their partner for two to three months at a time. In virtual programs, student partners participate in weekly online meetings over six weeks. Students take turns hosting meetings and discussing various topics. Both in-person and virtual exchanges provide valuable personal and academic experiences and provide valuable opportunities for developing intercultural awareness and appreciation.

Alberta Education signed a memorandum of understanding (MOU) with the state of Hesse, Germany on June 10, 2024. The MOU reaffirms the long-standing relationship for the education exchange program for students, teachers and school administrators, and promotes partnerships between schools in both jurisdictions based on mutual interests and shared goals in language learning, career and technology studies and other areas of common interest. The agreement will be used to formalize regular connections, strengthen existing partnerships and promote collaboration that will improve the education system of both jurisdictions. The MOU will be effective for five years, with an option for renewal. By collaborating with international jurisdictions to exchange knowledge about educational programming, Alberta's government is better positioning students to achieve academic success while increasing their competitiveness to pursue post-secondary studies and high-demand careers in Alberta's job market.

1.2 Collaborate with other ministries to expand mental health and well-being supports for students.

Alberta Education continued to support school authorities in providing mental health supports and services that focus on prevention, promotion and early short-term intervention within the education system. Additionally, the ministry collaborated with other ministries, such as Health and Mental Health and Addiction, and partners, including Alberta Health Services and school authorities, to build an integrated pathway to support access to appropriate health-related services and supports at school and in the community. For example, a new specialized education program was established in 2024-25 in partnership with The Red Deer School Division to support Recovery Alberta's Step Up Step Down program. This program supports youth aged 13 to 17 who have significant addiction and mental health concerns and ensures that they have access to an education program while they receive treatment.

Mental Health Supports

Alberta Education continued to implement programs and services to support student mental health. In 2024-25, the ministry collaborated with Mental Health and Addiction to enhance the integration of child and youth recovery-oriented addiction and mental health supports in schools and communities.

Mental Health in Schools Pilot

Alberta Education continued the Mental Health in Schools pilot project to improve the delivery of mental health supports and services for students and provision of tools, training and resources for the school community. In 2024-25, the ministry provided \$20 million to support 79 two-year pilot projects in school authorities across the province. This included funding to extend 59 of those Mental Health in Schools pilots that were initially set to end in December 2024, to continue until June 2025.

CASA Mental Health Classrooms

CASA Mental Health Classrooms is a joint initiative between Mental Health and Addiction and Alberta Education. In these highly specialized classrooms, students receive individual therapy, group therapy and psychiatric care to support their recovery. The program is funded by Mental Health and Addiction and delivered by CASA Mental Health, with each classroom supporting up to 12 students. As of March 31, 2025, there were 20 mental health classrooms in operation.

Integrated School Support Program

Alberta Education continued to collaborate with school authorities to assist Mental Health and Addiction and the Calgary Police Youth Foundation to expand the Integrated School Support Program. The program provides school-based prevention and early intervention wraparound supports in elementary schools, consisting of meal programs, after school care, structured physical education, a positive police presence and access to mental health professionals. The program is funded by Mental Health and Addiction. As of March 31, 2025, there are 31 schools in 22 communities across the province offering this program.

Standards for the Use of Personal Mobile Devices and Social Media

Alberta Education took a measured approach to protect students by establishing *Standards for the Use of Personal Mobile Devices and Social Media in Schools*, which came into effect on September 1, 2024. While personal mobile devices can be useful tools to support learning, access to personal mobile devices and social media can also negatively impact student achievement and mental well-being.

The standards were informed by feedback from more than 68,000 students, parents and education stakeholders who responded to an online survey that was available from April 16 to May 3, 2024. Almost 90 per cent of respondents shared concerns over student cellphone use at school. Education partners, represented by eight stakeholder associations also participated in virtual discussions with Alberta Education on April 22 and 23, 2024.

The new standards on personal mobile devices established restrictions, enforcement procedures and exceptions for Alberta's Kindergarten to Grade 12 public, separate, francophone, charter and independent (private) schools and independent (private) Early Childhood Services operators. Exceptions have been made for students using mobile devices for health and medical needs, to support specialized learning needs and for educational purposes. Individual school authorities were also required to develop and implement policies that outline how exceptions will be managed and what the consequences will be for non-compliance at their respective schools. The standards not only serve to reduce distractions in the classroom but also reduce online bullying, maximize learning time and support student mental health.

Supporting the Safety and Well-being of Students

In 2024-25, Alberta Education continued to promote the safety and well-being of students by providing resources and sharing best practices with school authorities and educators. Resources include educational material to support teachers to recognize, prevent and respond to bullying in school; principles and procedures to help schools ensure Grades 1 to 9 students are physically active for at least 30 minutes each day; and information about peer support networks to help create a welcoming, caring, respectful, safe and inclusive space for students.

Alberta Education continued to support the school nutrition program with an annual funding of \$20 million, providing more than 58,000 students across Alberta with a daily meal and snacks. In March 2025, the Government of Alberta and the Government of Canada ratified the Canada-Alberta National School Food Program Agreement. This agreement secured approximately \$42.2 million in federal funding over three years

to support the expansion of Alberta's school nutrition program in the 2025-26 and 2026-27 school years and ensure more students from participating schools are provided with a daily nutritious meal or snacks.

Alberta Education supported Ukrainian newcomers and their families by hosting information sessions on Alberta's education system in Edmonton and in Calgary on April 2 and May 6, 2024. More than 100 guests attended the sessions and there have been more than 5,000 views on the Ukrainian Canadian Congress Alberta Chapter Facebook page recording and live stream of the events. The department also worked with the Ukrainian government to provide an opportunity for students from Ukraine to write the Ukrainian National Multi-Subject Test in June 2024 – an entrance exam for Ukrainian students entering post-secondary institutions in Ukraine.

Minister's Youth Council

Alberta Education continued to encourage student voices and support student engagement through the Minister's Youth Council. For its 2024-25 term, 40 students from across the province came together in October 2024 and January 2025 to discuss various topics with each other, the Minister and department staff.

1.3 Develop and maintain comprehensive provincial assessments, including early years literacy and numeracy screening, to assess progress, identify learning challenges and monitor student success.

Literacy and Numeracy Screening Assessments

Reading and math skills are important for lifelong success in and out of the classroom. Assessing student progress during the critical early years can help teachers identify student strengths and areas where support in literacy and numeracy may be needed to ensure the best possible learning outcomes for each child.

In July 2024, Alberta Education introduced an enhanced screening requirement following engagement sessions with school authorities, education stakeholders and academic experts. Feedback on the existing approach for early years assessments as well as perspectives on improvements helped in developing the enhanced literacy and numeracy screening requirement. The twice-yearly screening for students in Grades 1 to 3 began in fall 2024. Students in Grades 1 to 3 identified as needing additional support in January are screened a third time at the end of the school year to monitor their progress. Assessment data submitted to the department indicated high usage of government-provided literacy and numeracy screeners, with preliminary trends demonstrating that an additional January screening was helpful in identifying students requiring supports.

- In numeracy, of those students identified as not requiring additional supports in September 2024, approximately 10 per cent were identified as requiring additional supports through the additional January screening requirement.
- In literacy, of those students identified as not requiring additional supports in September 2024, approximately 9 per cent were identified as requiring additional supports through the additional January screening requirement.

In addition, province-wide literacy and numeracy assessments started in January 2025 for children in Kindergarten. New screening requirements for Grades 4 and 5 students will begin in September 2026. By consistently screening the literacy and numeracy skills of students from Kindergarten through Grade 5, teachers and educational professionals will be better able to identify gaps and provide targeted support to ensure student success.

To support teachers in administering literacy screening assessments to students, Alberta Education added video resources to [new.LearnAlberta.ca \(curriculum.learnalberta.ca\)](https://new.LearnAlberta.ca/curriculum.learnalberta.ca), providing step by step instructions, examples and visuals. A variety of other resources were made available for teachers and school authorities, including an updated list of government-approved screening assessments, support guides, intervention lesson plans and more.

In 2024, the Learning Disruption Funding was renamed the Literacy and Numeracy Support Funding and expanded to include Kindergarten children. Through the grant, \$10 million was made available to school authorities for 2024-25 to support the literacy and numeracy skill development for students identified as requiring extra support through the screening assessments.

In March 2025, Alberta Education announced an additional \$7.5 million of support funding for 2024-25 to ensure that schools have the necessary resources and staff to provide interventions for students in Kindergarten to Grade 3, helping to prevent any student from falling behind in reading and math.

Student Evaluation and Assessments

Student evaluation and assessment is an integral part of the teaching and learning process. Assessment information is used to improve student learning, enhance instruction to students and ensure that student learning needs are met. While no individual assessment can provide a complete picture of a student's knowledge and skills, standardized assessments such as diploma examinations and provincial achievement tests provide consistent measures of student achievement.

In 2024-25, Alberta Education continued to develop, administer and mark provincial achievement tests and diploma examinations to report student achievement, ensure standards are maintained and assist schools, school authorities and the province in monitoring and improving student learning.

Although the implementation of new curriculum in English Language Arts and Literature and Math for Grade 6 students became mandatory in the 2023-24 school year, Grade 6 provincial achievement tests in English Language Arts and Literature and Math were not administered. This gave teachers and students an additional year to become familiar with the new curriculum. Instead, more than 59,000 field tests in these subjects were administered between April and June 2024. The results demonstrated that students achieved reasonable proficiency in the tested concepts. Alberta Education will administer Grade 6 provincial achievement tests in English Language Arts and Literature and Math in 2024-25.

Similarly, Grade 6 provincial achievement tests for the first year of implementation of the new curricula in French First Language and Literature, French Immersion Language Arts and Literature and Science will not be administered in 2024-25; field testing of updated assessments occurred instead.

Alberta Education continued transitioning to a new digital platform for provincial assessments. The transition to digital assessments is being implemented through an incremental process to allow teachers and students time to learn and adjust. The 2024-25 school year was the second year of optional implementation of Humanities Part A: Written Response diploma examinations and provincial achievement tests on the digital assessment platform. Nearly all school authorities are now administering either provincial assessments or field tests using the platform.

Canadian Adult Education Credential

Earning a high school diploma or equivalency credential is a key education milestone that provides the foundation for future education, career opportunities and personal success. In May 2024, Alberta successfully transitioned to the Canadian Adult Education Credential (CAEC) from the General Educational Development (GED) program. The CAEC project began in 2019 under the Council of Ministers of Education, Canada. Alberta Education led the development of the CAEC high school equivalency credential, working with other jurisdictions to develop a fair, reliable and credible assessment that accurately reflects the skills and competencies that employers and post-secondary institutions would expect from a Canadian senior high school equivalency credential. Like the GED, the CAEC is for adults who do not have a high school diploma but need a credential to open new doors to education or employment opportunities. The CAEC comprises five subject-area tests in French or English: reading, writing, math, science and social studies. Eight provinces and territories have signed agreements with Alberta to deliver the assessments. In 2024-25, approximately 3,500 CAEC exams were administered in Alberta.

Outcome One Performance Measures

Performance Measure 1.a: High School Completion

Rationale

- High school completion is important for entry to the labour force and post-secondary programs. While most students complete high school within three years of entering Grade 10, the five-year rate recognizes that it may take more time for some students to finish high school.
- Alberta's high school completion rate includes students who earn a high school diploma or certificate of high school achievement and students who enter an Alberta post-secondary institution or an apprenticeship program within five years of entering Grade 10. Another group comprises those who have earned credits in a minimum of five Grade 12 courses, including one Language Arts diploma examination course and three other diploma examination courses.

Target

- The target was not met.

Discussion

- In 2023-24, 87.1 per cent of students completed high school within five years of entering Grade 10.
- The high school completion rate has increased over time by 0.9 per cent, from 86.2 per cent in 2019-20 to 87.1 per cent in 2023-24 (Chart 1.a).
- Participation in diploma examinations was impacted by the COVID-19 pandemic. Diploma examinations were cancelled in April and June of 2020, and participation was optional during the 2020-21 school year. During this period, students who did not write diploma examinations received an exemption and their official mark was based solely on their school-awarded mark. In 2021-22, the January administration of diploma examinations was cancelled to support students affected by learning disruptions and the weighting of diploma examinations was temporarily lowered from 30 per cent to 10 per cent. The changes to the administration and weighting of diploma examinations may have affected the high school completion rates and caution should be exercised when interpreting the trend over time.
- The three-year high school completion rate is highly correlated with the five-year rate as most students included in the five-year rate complete high school in three years. For the cohort that entered Grade 10 in 2019-20, 80.7 per cent of students completed high school within three years while 87.1 per cent completed high school within five years (Table 1.a). This makes the three-year rate a reliable predictor of the five-year rate in subsequent years. Projections indicate the five-year rate is likely to fluctuate over the next few years.
- Additionally, some students who do not complete high school in the Kindergarten to Grade 12 education system do so as young adults in the adult learning system. In 2024, 94.9 per cent of Albertans aged 25 to 34 reported they had completed high school. This result has remained stable over time.

Chart 1.a: High School Completion Rate of Students Within Five Years of Entering Grade 10

Source: Alberta Education

Notes:

- Results for this measure lag a year, as the school year concludes after the government fiscal year ends.
- The target for 2023-24 was set in February 2024 based on 2021-22 data.
- Included in the calculation of high school completion rates is an estimated adjustment for attrition (i.e., students moving out of province) using Statistics Canada estimates of out-migration.
- See Endnote B, page 84, for information on assessing results relative to targets.
- See Endnote C, High School Completion Rates, page 87.

Table 1.a: Percentages of Students Who Completed High School Within Three and Five Years of Entering Grade 10

Grade 10 Year	3-Year Rate and Year		5-Year Rate and Year	
2015-16			86.2%	2019-20
2016-17			87.1%	2020-21
2017-18	83.4%	2019-20	88.6%	2021-22
2018-19	83.2%	2020-21	88.1%	2022-23
2019-20	80.7%	2021-22	87.1%	2023-24
2020-21	80.4%	2022-23		
2021-22	81.4%	2023-24		

Source: Alberta Education

Supplementary Information
Annual Dropout Rate – All Students

Rationale

- The student dropout rate is an indicator of how well the needs of students at risk of not completing high school are being addressed by the Kindergarten to Grade 12 education system.

Discussion

- The dropout rate is considered a leading indicator for the high school completion rate.
- Enrolment data indicates that 2.4 per cent of students aged 14–18 dropped out of school in 2023-24.
- The dropout rate has improved over time.
- The ministry continues to implement strategies focused on improving student, parent and community engagement in order to reduce drop out rates and encourage students to complete high schools.
- Dropping out of school may be a temporary interruption of a student’s education. Of the students who dropped out in 2022-23, about 19 per cent resumed their education in 2023-24.
- Some students who do not complete high school in the Kindergarten to Grade 12 education system do so as young adults in the adult learning system.

Annual Dropout Rates of Students Aged 14-18

Source: Alberta Education

Notes:

- Students aged 14-18 who, in the following year, did not complete high school and are not enrolled in school (a Kindergarten to Grade 12 school, an Alberta post-secondary institution or apprenticeship program) are included in the annual dropout rate. For example, students aged 14-18 in 2022-23 were tracked for one year. Those who were not enrolled and had not completed are included in the 2023-24 dropout rate.
- See Endnote C, page 86, for more information on the calculation of the Annual Dropout Rate.

Performance Measure 1.b: High School to Post-Secondary Transition Rate

Rationale

- Post-secondary education equips students with valuable skills and knowledge to increase their opportunities for success and full participation in society. Entering post-secondary and/or apprenticeship programs indicates that high school students are prepared for further education and training.

Target

- The target was met, as the current result is not significantly different from the target value.

Discussion

- In 2023-24, 59.9 per cent of Alberta's high school students made the transition to an Alberta post-secondary institution within six years of entering Grade 10.
- The six-year high school to post-secondary transition rate has remained stable over time (Chart 1.b).
- The four-year and the six-year high school to post-secondary transition rates are highly correlated for the same Grade 10 cohort. The difference between the four-year and six-year high school to post-secondary transition rates indicates that a substantial proportion of Alberta's students delay their entry to post-secondary programs after high school. (Table 1.b)
- The four-year high school to post-secondary transition rate is also a reliable predictor of the six-year high school to post-secondary transition rate in subsequent years. Projections using the four-year and six-year high school to post-secondary transition rates indicate that the six-year high school to post-secondary transition rate will remain between 59 and 60 per cent over the next few years.
- Education continues to collaborate with Advanced Education, post-secondary institutions and industry associations to facilitate student learning opportunities in apprenticeship, skilled trades and vocational education.

**Chart 1.b: High School to Post-Secondary Transition Rate
Within Six Years of Entering Grade 10**

Source: Alberta Education

Table 1.b: Percentages of Students Who Enrol in Post-Secondary Programs Within Four and Six Years of Entering Grade 10

Grade 10 Year	4-Year Rate and Year		6-Year Rate and Year	
2014-15			60.0%	2019-20
2015-16			60.3%	2020-21
2016-17	40.5%	2019-20	59.7%	2021-22
2017-18	41.2%	2020-21	60.1%	2022-23
2018-19	40.2%	2021-22	59.9%	2023-24
2019-20	41.1%	2022-23		
2020-21	42.5%	2023-24		

Source: Alberta Education

Notes:

- Student enrolment in an Alberta post-secondary program includes attending a publicly funded post-secondary institution or registering in an Alberta apprenticeship program.
- The most recent results are for 2023-24 as the data for this measure lag a year (the school year concludes after the government fiscal year ends).
- The high school to post-secondary transition rates include adjustments for attrition using estimates from Statistics Canada and for students who attend post-secondary outside the province using estimates from the Ministry of Advanced Education.
- See Endnote B, page 84, for information on assessing results relative to targets.
- See Endnote C, High School to Post-Secondary Transition Rates, page 87.

Performance Measure 1.c:**Overall Achievement Test Results in Grade 9 Language Arts and Mathematics*****Rationale***

- Overall student achievement of standards on provincial achievement tests is a sound indicator of whether elementary and junior high students are achieving high standards in Language Arts and in Mathematics, an important outcome for Alberta's Kindergarten to Grade 12 education system.

Target

- The targets for the overall Grade 9 Language Arts and the overall Mathematics results could not be assessed as current year data is not available.

Discussion

- 2024-25 provincial achievement test results will be available in October 2025 and published in the Annual Report Update.
- In 2023-24, 69.6 per cent of students achieved the acceptable standard in overall Grade 9 Language Arts, while 52.7 per cent of students achieved the acceptable standard in overall Grade 9 Mathematics (Chart 1.c).
- Overall results in Grade 9 Language Arts are calculated as an average of the results in the following four subjects weighted by the number of individuals that were enrolled:
 - English Language Arts 9
 - French Language Arts 9
 - Français 9
 - English Language Arts 9 (Knowledge and Employability)
- Overall results in Grade 9 Mathematics are calculated as an average of the results in the following two subjects weighted by the number of individuals that were enrolled:
 - Mathematics 9
 - Mathematics 9 (Knowledge and Employability)

Chart 1.c: Overall Percentages of Students Who Achieved Standards on Grade 9 Provincial Achievement Tests in Language Arts and Mathematics

Source: Alberta Education

Notes:

- 2024-25 provincial achievement test results will be available in October 2025 and published in the Annual Report Update.
- Results for the 2019-20 and 2020-21 school years are not available as participation in the provincial achievement tests was impacted by COVID-19 related learning disruptions. Caution should be exercised when interpreting the results over time.
- Participation in provincial achievement tests was impacted by the COVID-19 pandemic in 2019-20, 2020-21 and 2021-22.
- Student data most likely affected by the provincial achievement tests security breach in 2021-22 has been excluded from the 2021-22 overall results. Caution should be exercised when interpreting the results over time.
- Until the Grade 6 curriculum renewals are complete and provincial achievement tests resume for students, the ministry will publish Grade 9 Language Arts and Mathematics results as an indicator of student achievement related to the programs of study.
- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall Grade 9 Language Arts results are a weighted average based on total enrolment in Grade 9 Language Arts courses.
- Overall Grade 9 Mathematics results are a weighted average based on total enrolment in Grade 9 Mathematics courses.
- See Endnote B, page 84, for information on assessing results relative to targets, and results over time.
- See Endnote C, provincial achievement tests, pages 88-89.

Notes:

- 2024-25 provincial achievement test participation rates will be available in October 2025 and published in the Annual Report Update.
- Results for the 2019-20 and 2020-21 school years are not available as participation in the provincial achievement tests was affected by COVID-19 related learning disruptions. Caution should be exercised when interpreting the results over time.
- Participation in provincial achievement tests was impacted by the COVID-19 pandemic in 2019-20, 2020-21 and 2021-22.
- Student data most likely impacted by the provincial achievement test security breach in 2021-22 has been excluded from the 2021-22 overall results. Caution should be exercised when interpreting the results over time.
- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Knowledge and Employability courses are designed for students who meet enrolment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.

Performance Measure 1.c:**Language Arts and Mathematics Achievement Test Results by Individual Subject for Students in Grades 9*****Rationale***

- Student results on provincial achievement tests in each grade and subject provide detailed information on whether junior high students are achieving high standards in Language Arts and in Mathematics, an important outcome for Alberta's Kindergarten to Grade 12 education system.

Target

- Targets for individual Language Arts and Mathematics subject results were not set in the 2024-27 business plan.

Discussion

- 2024-25 provincial achievement test results will be available in October 2025 and published in the Annual Report Update.

Table 1.c.1: Percentages of Students in Grade 9 Who Achieved the Acceptable Standard in Provincial Achievement Tests in Language Arts (in percentages)

Supplementary Information**Overall Diploma Examination Results in Language Arts and Mathematics*****Rationale***

- Student results on diploma examinations are a solid indicator of whether high school students are achieving high standards in Language Arts and Mathematics.
- The Language Arts diploma examination measure is an aggregate of four Language Arts courses. This reflects a focus on fundamental reading and writing skills, an important outcome for Alberta's Kindergarten to Grade 12 education system.
- The Mathematics diploma examination measure is an aggregate of two courses. This measure reflects a focus on the development of mathematical reasoning and problem-solving skills, which are important outcomes for Alberta's Kindergarten to Grade 12 education system.

Discussion

- 2024-25 diploma examination results will be available in October 2025 and published in the Annual Report Update.
- The Language Arts measure is an average of the results in the following four subjects, weighted by the total number of individuals who wrote each of the exams:
 - English Language Arts 30-1
 - English Language Arts 30-2
 - French Language Arts 30-1
 - Français 30-1
- The Mathematics measure is an average of the results in the following two subjects, weighted by the total number of individuals that wrote each of the exams:
 - Mathematics 30-1
 - Mathematics 30-2

Source: Alberta Education

Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall results for Mathematics are a weighted average of results for the two Mathematics subjects.
- Participation in diploma examinations was impacted by the COVID-19 pandemic in 2019-20, 2020-21 and 2021-22. Caution should be exercised when interpreting the results over time.
- See Endnote B, page 84, for information on assessing results over time.
- See Endnote C, Diploma Examinations, pages 89-90.

Outcome Two: First Nations, Métis and Inuit students in Alberta are successful

Alberta Education collaborates with education partners to improve education outcomes for First Nations, Métis and Inuit students by incorporating Indigenous histories, cultures, languages and perspectives in curriculum, promoting foundational knowledge for teachers and school leaders and fostering knowledge and understanding of First Nations, Métis and Inuit cultures among Alberta's Kindergarten to Grade 12 students.

First Nations, Métis and Inuit student success was achieved by:

- strengthening education programs, policies and initiatives for First Nations, Métis and Inuit students;
- supporting partners to gather, analyze and share Indigenous education data to monitor student success; and
- enhancing relationship-building between Indigenous communities and schools through community-based supports.

Key Objectives

2.1 Strengthen education programs, policies and initiatives for First Nations, Métis and Inuit students.

In the 2024-25 school year, Alberta Education allocated \$88.3 million through the First Nation, Métis and Inuit Grant to assist school authorities in delivering system, program and instructional supports that improve education outcomes for First Nations, Métis and Inuit students and in supporting the implementation of the Truth and Reconciliation Commission's recommendations.

Collaboration with Education and Ministry Partners

Alberta Education continues to collaborate with education partners to help improve their ability to deliver programming and broaden their understanding of the overall education system to support Indigenous learners.

Alberta Education continued to support the Maskwacis Education Schools Commission (MESC) and Kee Tas Kee Now Tribal Council Education Authority (KTCEA) through existing framework agreements that outline a shared desire to develop strategies to strengthen the delivery of educational services with the express interest of improving the educational outcomes of students living and attending school on reserve. In 2024-25, almost \$3.9 million in Enhancement Funding was provided to MESC and \$1.8 million in Enhancement Funding was provided to KTCEA.

Protocol agreements establish a framework between the Government of Alberta and First Nation partners to ensure a productive working relationship based on areas of mutual interest and cooperation. The agreements are community driven and reflect the unique needs of individual First Nations. Education sub-tables under these agreements have included work on culturally appropriate learning and teaching resources, land-based learning and language revitalization and retention. To support the implementation of protocol agreements, \$250,000 in funding was provided to the Blackfoot Confederacy and \$250,000 was provided to the Stoney Nakoda Tsuut'ina Tribal Council (G4). Alberta Education also worked closely with Advanced Education and Indigenous Relations to provide \$250,000 in funding in 2024-25 to develop the first ever Alberta Education and Confederacy of Treaty 6 Education Work Plan.

In 2024-25, Alberta Education established an internal ministry working group to identify pragmatic approaches to address the five educational recommendations of the *113 Pathways to Justice* report. The working group is guided by the Alberta Missing and Murdered Indigenous Women and Girls Roadmap and seeks to identify and develop evidence-based deliverables to support the government's response to addressing violence and increasing the safety and economic security of Indigenous women, girls and two-spirit plus (2S+) people.

Specialized Learning Supports for First Nations Students

Alberta Education continues to address the needs of First Nations students through the Specialized Learning Supports for First Nations Grant program. The grant facilitates the provision of customized learning supports while building the capacity of First Nations schools to deliver those supports in a culturally competent and safe way.

In 2024-25, \$3.4 million in grant funding was provided to 29 First Nations and First Nations education authorities to enable students registered with First Nations schools to receive support for social-emotional learning and mental health services.

2.2 Support partners to gather, analyze and share Indigenous education data to monitor student success.

Alberta Education works with education partners, including Indigenous communities and school authorities, to collect student data to measure student progress and success in the education system. The department provides annual analytics and reports to provincial school authorities to measure how schools and school authorities are performing, and to provide consistent, reliable data for planning and policy decisions. The department develops data-sharing agreements between Indigenous communities, organizations and the Government of Alberta to document how data will be collected, analyzed and used.

In 2024-25, Alberta Education received the research report for the Advancing Educational Equity in Alberta Classrooms, Schools and Structures research project. This project, supported by the department through funding contribution and in-kind support, investigated the systemic factors that contribute to the academic streaming of Indigenous students into academic pathways that may limit post-secondary opportunities. Recommendations will be reviewed and considered by the department for further action and implementation.

2.3 Enhance relationship-building between Indigenous communities and schools through community-based supports.

Alberta Education collaborates with Indigenous communities, partners and education stakeholders to enhance education outcomes for First Nations, Métis and Inuit students by implementing initiatives that support reconciliation, recognizing that Indigenous-led solutions result in meaningful change. Establishing strong relationships with Alberta's Indigenous communities can help schools provide Indigenous students with the supports needed to be successful in school and beyond.

Bridging Classrooms to Communities Grant

The Bridging Classrooms to Communities Grant pilot program helps Indigenous communities and school authorities build stronger relationships to support student success and reconciliation by creating welcoming environments, demonstrating cultural awareness and providing system supports to encourage Indigenous students' success in and out of the classroom. In 2024-25, \$3.4 million was distributed to 12 grant recipients to help strengthen student connections and foster relationships with Indigenous communities. Grant funding can be used for out-of-school programming, such as homework clubs, student drop-in programs, social clubs, nutrition programs, sports programs and culture and language programs to help students develop healthy relationships in their communities and provide a network of social and academic supports for students out-of-school. Education continued to conduct bi-annual check-in meetings with grant recipients throughout 2024-25; the majority reported positive results from initial activities. The final report is expected by March 31, 2027.

Community Reconciliation Grant

The Community Reconciliation Grant pilot program was launched in October 2023 to promote community healing and reconciliation by fostering engagement between Indigenous organizations and schools to support students through a holistic approach. Through an investment of \$700,000, the program supports Indigenous organizations to provide services and supports to children and youth from ages 3 to 19. The services and supports include providing family support and community development, social and leadership opportunities and cultural learning. Eight Indigenous organizations were awarded a conditional grant of up to \$100,000 each to support their respective reconciliation-related project or initiative. The department remains steadfast in its commitment to truth and reconciliation and results from this pilot will be used to inform future initiatives and programming.

Strengthening Relationships Pilot Grant

The Strengthening Relationships Pilot Grant was a one-time initiative launched in March 2023 to foster meaningful relationships between provincial schools and Indigenous communities. The program aimed to create welcoming, respectful and culturally responsive learning environments that enhance Indigenous student success. It focused on four key areas: Relational Supports and Community Development, Restorative Practices, Social and Recreational Activities and Culture and Language.

Six First Nations and one Métis Settlement each received \$140,000, totaling \$980,000 in funding. The pilot concluded on August 31, 2024. Reported outcomes included:

- Increased engagement of teachers and school leaders with Indigenous communities;
- Enhanced cultural awareness and integration in educational practices;
- Improved student attendance and learning engagement;
- Greater involvement of parents, Elders and community members in schools; and
- Learning environments more reflective of Indigenous histories, languages and worldviews.

Results and learnings from the Strengthening Relationships Pilot Grant program are being used to inform current and future ministry initiatives that support truth and reconciliation and improve Indigenous student outcomes.

United for Literacy

In 2024-25, Alberta Education provided \$800,000 to United for Literacy to plan, coordinate and deliver seven literacy programs for First Nations, Métis and Inuit students in Alberta, including summer literacy programs, rural literacy programs and urban literacy programs. Up to 21 summer literacy camps and 13 after school programs were held in 2024. United For Literacy is working on building relationships with new communities and looking for opportunities for summer camp locations to convert to full-year programming.

Rupertsland Institute Grant

The Rupertsland Institute is an affiliate of the Métis Nation of Alberta. A grant of \$500,000 per year supports the Education and Training Strategy under the Métis Nation of Alberta – Government of Alberta Framework Agreement until March 31, 2028. The grant enables the development of Métis-specific Kindergarten to Grade 12 lesson plans, the creation of classroom resources and professional development to support Métis foundational knowledge, and support for the implementation of the Teaching Quality Standard and raises awareness among educators and system leaders across Alberta about the impact of academic streaming on Indigenous learners.

This grant has resulted in:

- more than 34,500 educator accessing Rupertsland Institute's online educational supports;
- almost 650 educators completing the Métis Foundational Knowledge Themes course;
- over 20 school divisions participating in the Niya Michif (traditional Métis language) course;
- a robust online platform featuring more than 55 lesson plans and more than 15 virtual field trips in both English and French; and
- educators reporting increased confidence and competence in integrating Métis content into classroom instruction.

Outcome Two Performance Measures

Performance Measure 2.a:

High School Completion of Self-Identified First Nations, Métis and Inuit Students

Rationale

- High school completion of self-identified First Nations, Métis and Inuit students is important for entry to the labour force and post-secondary programs. While most self-identified First Nations, Métis and Inuit students complete high school within three years of entering Grade 10, the five-year rate recognizes that it may take more time for some self-identified First Nations, Métis and Inuit students to finish high school.
- Alberta's high school completion rate of self-identified First Nations, Métis and Inuit students includes students who earn a high school diploma or certificate of high school achievement and self-identified First Nations, Métis and Inuit students who enter an Alberta post-secondary institution or an apprenticeship program within five years of entering Grade 10. Another group comprises those who have earned credits in a minimum of five Grade 12 courses, including one Language Arts diploma examination course and three other diploma examination courses.

Target

- The target was not met.

Discussion

- In 2023-24, 69.7 per cent of self-identified First Nations, Métis and Inuit students completed high school within five years of entering Grade 10.
- The high school completion rate of self-identified First Nations, Métis and Inuit students has remained relatively stable over time, from 68.1 per cent in 2019-20 to 69.7 per cent in 2023-24 (Chart 2.a).
- Participation in diploma examinations was impacted by the COVID-19 pandemic. Diploma examinations were cancelled in April and June 2020 and participation was optional during the 2020-21 school year. During this period, students who did not write diploma examinations received an exemption and their official mark was based solely on their school-awarded mark. In 2021-22, the January administration of diploma examinations was cancelled to support students affected by learning disruptions and the weighting of diploma examinations was temporarily lowered from 30 per cent to 10 per cent. These changes to the administration and weighting of diploma examinations may have affected the high school completion rates and thus caution should be exercised when interpreting the trend over time.
- The three-year high school completion rate is highly correlated with the five-year rate, as most students in the five-year rate complete high school in three years. For the cohort that entered Grade 10 in 2019-20, 57.0 per cent of students completed high school within three years while 69.7 per cent completed high school within five years (Table 2.a). This makes the three-year rate a reliable predictor of the five-year rate in subsequent years. Projections indicate the five-year rate is likely to fluctuate over the next few years.
- Additionally, some students who do not complete high school in the Kindergarten to Grade 12 education system do so as young adults in the adult learning system. In 2024, 88.6 per cent of Indigenous Albertans aged 25 to 34 reported they had completed high school.

Chart 2.a: High School Completion Rate of Self-identified First Nations, Métis and Inuit Students Within Five Years of Entering Grade 10

Source: Alberta Education

Notes:

- Results for this measure lag a year, as the school year concludes after the government fiscal year ends.
- The target for 2023-24 was set in February 2024 based on 2021-22 data.
- Included in the calculation of high school completion rates is an estimated adjustment for attrition (i.e., students moving out of province) using Statistics Canada estimates of out-migration.
- See Endnote B, page 84, for information on assessing results relative to targets.
- See Endnote C, High School Completion Rates, page 87.

Table 2.a: Percentages of First Nations, Métis and Inuit Students Who Completed High School Within Three and Five Years of Entering Grade 10

Grade 10 Year	3-Year Rate and Year		5-Year Rate and Year	
2015-16			68.1%	2019-20
2016-17			68.0%	2020-21
2017-18	62.0%	2019-20	71.3%	2021-22
2018-19	59.5%	2020-21	69.4%	2022-23
2019-20	57.0%	2021-22	69.7%	2023-24
2020-21	58.6%	2022-23		
2021-22	59.8%	2023-24		

Source: Alberta Education

Supplementary Information**Annual Dropout Rate of Self-Identified First Nations, Métis and Inuit Students*****Rationale***

- The student dropout rate is an indicator of how well the needs of self-identified First Nations, Métis and Inuit students at risk of not completing high school are being addressed by the Kindergarten to Grade 12 education system.

Discussion

- The student dropout rate is considered a leading indicator for the high school completion rate.
- Enrolment data indicates that 5.2 per cent of self-identified First Nations, Métis and Inuit students aged 14–18 dropped out of school in 2023-24.
- The dropout rate for self-identified First Nations, Métis and Inuit students has remained stable over time.
- The dropout rate for self-identified First Nations, Métis and Inuit students is approximately twice the rate for students overall, which is 2.4 per cent for the same period.
- The ministry continues to implement strategies focused on improving First Nations, Métis and Inuit student, parent and community engagement in order to reduce drop out rates and encourage First Nations, Métis and Inuit students to complete high school.
- Dropping out of school may be a temporary interruption of a student's education. Of the self-identified First Nations, Métis and Inuit students who dropped out in 2022-23, about 17 per cent resumed their education in 2023-24.
- Some self-identified First Nations, Métis and Inuit students who do not complete high school in the Kindergarten to Grade 12 education system do so as young adults in the adult learning system.

Annual Dropout Rates of Self-Identified First Nations, Métis and Inuit Students Aged 14-18

Source: Alberta Education

Notes:

- Self-identified First Nations, Métis and Inuit students aged 14-18 who in the following year, are not enrolled in school (a Kindergarten to Grade 12 school, an Alberta post-secondary institution or apprenticeship program) and have not completed high school are included in the annual dropout rate. For example, self-identified First Nations, Métis and Inuit students aged 14-18 in 2022-23 were tracked for one year. Those who were not enrolled and had not completed are included in the 2023-24 dropout rate.
- See Endnote C, page 86, for more information on the calculation of self-identified First Nations, Métis, and Inuit Annual Dropout Rate.

Performance Measure 2.b:**High School to Post-Secondary Transition Rate of Self-Identified First Nations, Métis and Inuit Students*****Rationale***

- Post-secondary education equips self-identified First Nations, Métis and Inuit students with valuable skills and knowledge to increase their opportunities for success and full participation in society. Entering post-secondary and/or apprenticeship programs indicates that self-identified First Nations, Métis and Inuit high school students are prepared for further education and training.

Target

- The target was met.

Discussion

- In 2023-24, 37.1 per cent of Alberta's self-identified First Nations, Métis and Inuit high school students made the transition to an Alberta post-secondary institution within six years of entering Grade 10.
- The six-year high school to post-secondary transition rate has remained stable over time (Chart 2.b).
- The difference between the four-year and six-year high school to post-secondary transition rates indicates that a substantial proportion of self-identified First Nations, Métis and Inuit students delay their entry to post-secondary programs after completing high school (Table 2.b).
- The six-year high school to post-secondary transition rate for self-identified First Nations, Métis and Inuit students is slightly more than half the six-year high school to post-secondary transition rate for all Alberta students (59.9 per cent).
- The four-year and six-year high school to post-secondary transition rates for self-identified First Nations, Métis and Inuit students are highly correlated for the same Grade 10 cohort and the four-year high school to post-secondary transition rate is thus a reliable predictor of the six-year high school to post-secondary transition rate in subsequent years. Projections indicate that the six-year high school to post-secondary transition rate will remain between 35 and 38 per cent over the next few years.
- Education continues to collaborate with Advanced Education, post-secondary institutions and industry associations to facilitate student learning opportunities in apprenticeship, skilled trades and vocational education.

Chart 2.b: Self-Identified First Nations, Métis and Inuit High School to Post-Secondary Transition Rate Within Six Years of Entering Grade 10

Source: Alberta Education

Table 2.b: Percentages of Self-Identified First Nations, Métis and Inuit Students Who Enrol in Post-Secondary Programs Within Four and Six Years of Entering Grade 10

Grade 10 Year	4-Year Rate and Year		6-Year Rate and Year	
2014-15			35.7%	2019-20
2015-16			37.7%	2020-21
2016-17	20.6%	2019-20	35.5%	2021-22
2017-18	22.7%	2020-21	36.8%	2022-23
2018-19	21.2%	2021-22	37.1%	2023-24
2019-20	22.8%	2022-23		
2020-21	24.4%	2023-24		

Source: Alberta Education

Notes:

- Self-identified First Nations, Métis and Inuit student enrolment in an Alberta post-secondary program includes attending a publicly funded post-secondary institution or registering in an Alberta apprenticeship program.
- The most recent results are for 2023-24, as the data for this measure lag a year (the school year concludes after the government fiscal year ends).
- The high school to post-secondary transition rates include adjustments for attrition using estimates from Statistics Canada and for students who attend post-secondary outside the province using estimates from the Ministry of Advanced Education.
- See Endnote B, page 84, for information on assessing results relative to targets.
- See Endnote C, High School to Post-Secondary Transition Rates, page 87.

Outcome Three: Alberta's students have access to a variety of learning opportunities to enhance competitiveness in the modern economy

Alberta's government is working to ensure that students have access to practical, foundational learning opportunities while helping to build a qualified, educated and engaged workforce to support Alberta's economic prosperity. Alberta Education provides students with innovative learning opportunities such as enhanced career education programming, dual credit programs and collegiate schools to ensure diverse pathways for students to access post-secondary education or enter their chosen field of work, enabling them to lead successful and fulfilling lives.

Ensuring Alberta's students have access to a variety of learning opportunities was achieved by:

- providing career education programming that enables students to explore and experience various occupations;
- exploring strategies to enhance awareness of career learning pathways that include the apprenticeship system for students interested in pursuing training in the skilled trades, in partnership with other ministries; and
- continuing to support collegiate school opportunities to create more pathways for students to post-secondary education and the workforce.

Key Objectives

3.1 Provide career education programming that enables students to explore and experience various occupations.

Career education programming enables students to have hands-on, experiential learning experiences that can lead to rewarding careers. To ensure students are prepared to participate in Alberta's economy, Alberta Education supports students to explore educational pathways to post-secondary education, trade designation and meaningful careers through career education programming.

Career Education Engagement

Alberta Education engaged education partners and teachers on the development of draft curriculum for future Grades 7 to 10 courses in January and February 2025, including content on physical education and wellness, career education, financial literacy and additional basic life skills and home maintenance. These partners also provided input on the organization of content into courses to best support student success. Partners confirmed that career education and financial literacy are important in junior and senior high school and noted that additional time to consider the high school context is needed.

Based on this feedback, Alberta Education is moving forward with additional engagement on Grades 7 to 9 draft curriculum related to career education and financial literacy. Work is also underway to develop high school curriculum for Career and Life Management, including content in career education, financial literacy, basic life skills and home maintenance, to be released for engagement at a later date. Input from engagement activities will build on existing career education options in Alberta.

In collaboration with Advanced Education, Alberta Education also established a Dual Credit Review Advisory Group in June 2024 to review several components of Alberta's dual credit programming. The advisory group included representatives from school authorities across Alberta, Indigenous communities, industry, post-secondary institutions and career organizations.

The Dual Credit Review Advisory Group gathered input on Alberta's current and future dual credit programs, including:

- the dual credit funding model and programming;
- accessibility, transportation and equipment barriers;
- transferability between post-secondary institutions;
- the role of collegiate schools in dual credit delivery;
- course offerings and instructional models; and
- increasing access to off-campus education.

Engagement between June and August 2024 focused on funding, delivery of off-campus education, sustainability of career education programs, career exploration and transition supports to help students succeed after high school. The department received positive feedback on the benefits of dual credit programming and the need to plan for sustainability and growth of the program. Key themes include:

- improving clarity in policy documents;
- enhancing opportunities through sustainable funding;
- stronger connections between schools and the workplace; and
- improving awareness and participation from students, post-secondary institutions and businesses of existing career education opportunities.

Input gathered will inform upcoming changes to career education programming.

Dual Credit Programming

Dual credit programming is designed to help students in Grades 10, 11 or 12 gain practical skills and experiential, hands-on learning while earning credits toward their high school diploma or a post-secondary diploma, degree or certificate (including a journey person certificate). School authorities have the flexibility to develop and implement dual credit programming that offers meaningful learning experiences that are relevant to their students.

In 2024-25, Alberta Education invested almost \$4.4 million into dual credit funding. This funding supports up to \$50,000 for each Dual Credit Start-up Grant to support school authority start-up costs for new dual credit programs and up to \$100,000 for each Dual Credit Enhancement Grant to enhance existing dual credit programs. New or enhanced dual credit opportunities include carpentry and welding apprenticeships and training in agriculture, engineering and medical and health technologies. Enhancement grant funding can be used to purchase new equipment or upgrade facilities to meet industry standards and better connect students to today's workforce. Seniors, Community and Social Services also contributed an additional \$600,000 for health care aide dual credit grants. Across the province, 60 school authorities received 79 grants (57 start-up grants and 22 enhancement grants). As of August 2024, approximately 2,600 students participated in dual credit programs offered in 166 schools. Student participation numbers for 2024-25 will be available in fall 2025.

School Shared Resource Integration Program

To increase student participation in off-campus programs and internships, Alberta Education worked in collaboration with Advanced Education and Jobs, Economy and Trade to support CAREERS: The Next Generation, a not-for-profit foundation that brings together industry, schools, government and communities to support students by making the workplace an extension of the classroom. High school students enrolled in off-

campus education programming gain hands-on experience through work placement opportunities. In turn, teachers, school authorities and industry employers that work with students receive off-campus supports from the program. Under this program model, student career coordinators are employed by the school authority and supported by CAREERS.

Alberta Education continued to support CAREERS in delivering its School Shared Resource Integration Program, providing \$1.4 million in 2024-25. In July 2024, the project expanded to include francophone regional authorities and independent (private) schools. CAREERS highlighted that program participation increased from 33 school authorities in 2023-24 to 45 school authorities in 2024-25. Approximately 2,400 students participated in an internship from August 2023 to August 2024.

Promoting Career Education Teacher Training

Targeted professional learning opportunities for teachers and system leaders help promote and enhance career education programming for students and ensure they can experience a range of career pathways. In March 2025, Alberta Education provided an 18-month \$500,000 grant to the College of Alberta School Superintendents to provide leadership to the Alberta Professional Learning Consortium to develop and deliver career education professional learning to teachers and increase their capacity to teach career education programming. Professional learning opportunities and resources will be delivered in both English and French through in-person and online sessions and modules.

3.2 Explore strategies to enhance the apprenticeship system for students interested in pursuing training in the skilled trades, in partnership with other ministries.

As Alberta's economy continues to grow, the demand for skilled tradespeople is increasing and will continue to rise over the next decade. Meeting the needs of industry and maximizing opportunities for Alberta students means promoting and supporting trades education with all communities. Alberta Education continues to collaborate with Advanced Education, post-secondary institutions and industry associations to facilitate student learning opportunities in apprenticeship programs, skilled trades and vocational education.

Exploring Germany's Career Education Model

In June 2024, the Minister of Education led a mission to Germany to meet with political representatives and officials from the states of Hesse, Rhineland-Palatinate, Schleswig-Holstein and Berlin. The delegation visited schools, vocational centres and industry sites to see first-hand how Germany's approach to career education is helping students find rewarding careers. The mission focused on informing the Alberta government's efforts to expand career education for students. It also reinforced a long-standing relationship between governments to ensure students, teachers and administrators can benefit from continued cultural exchanges and ideas sharing. Education partners who joined the minister included representatives from CAREERS: The Next Generation Foundation as well as the chairs and a second representative from each of The Edmonton Catholic Separate School Division, The Edmonton School Division, The Calgary School Division and The Canadian Rockies School Division.

Apprenticeship Programs

The Registered Apprenticeship Program allows students to develop trade-specific skills while earning high school credits and on-the-job training hours toward an apprenticeship. Apprenticeship training combines technical training (i.e., formal instruction in a designated post-secondary institution or high school) and on-the-job training at a place of employment.

Alberta Education continued to partner with Alberta Agriculture and Irrigation in support of the Green Certificate Program through a five-year agreement, valid from 2022 to 2027, which allocates \$400,000 per year to help facilitate increased Green Certificate Program accessibility, equity and student participation. The program offers apprenticeship-style training to enable high school students to gain experience and certification in Alberta's agriculture industry while earning credit towards an Alberta High School Diploma or a Certificate of High School Achievement. As of June 2024, about 996 students have participated in the program, a 15 per cent increase over the previous school year. Student participation numbers for 2024-25 will be available in fall 2025.

3.3 Continue to support in-school opportunities to create more pathways for students to post-secondary education and the workforce.

Collegiate schools provide students with opportunities to develop in-demand skills, equipping students with technical experience, knowledge and critical-thinking skills. Increasing collegiate school opportunities ensures a variety of career pathways for students to enter post-secondary education or the workforce. Alberta Education's commitment to expand collegiate programming across the province will connect more students to rewarding career pathways while giving them the skills and abilities needed to be successful after high school graduation.

Collegiate schools are operated by school authorities in partnership with the province's post-secondary institutions and industry partners. Through these partnerships, students receive enhanced career education as they are connected to apprenticeship programming, allowing them to experience off-campus education opportunities at post-secondary institutions and gain post-secondary credits while in high school.

Alberta Education continued to expand access to collegiate programs through an investment of \$23.7 million in 2024-25 to support the start-up and expansion costs for collegiate schools. Through this funding, seven new collegiate school programs began operations during the 2024-25 school year, increasing the total number of collegiate schools operating in the province to 12. More than 30 unique collegiate pathways are now available to students, including programming in science, aviation, technology, engineering, agriculture, business, information communications and trades.

In November 2024, Education made several improvements to streamline the collegiate school application process, including updating policy to require a partnership between collegiate schools, post-secondary institutions and industry partners, establishing different collegiate structures, combining a multi-stage application process into a single application, establishing clear parameters for school funding allocation and introducing mandatory reporting requirements. Improvements will help reduce duplication of effort and increase flexibility in collegiate requirements to support diverse programming.

The updated application process was implemented for the 2024-25 collegiate intake period. Department staff continued to support collegiate school applicants and work with previously approved applicants to support programs as they commenced operations.

Outcome Three Performance Measures

Performance Measure 3.a:
Career Education Opportunities for Students

Rationale

- Giving students opportunities to explore different careers helps them make better choices for their future. With strong career planning, students are more ready to join the workforce or continue their education after high school.

Target

- The target was met, as the current result is not significantly different from the target value.

Discussion

- Overall survey results in 2024-25 indicate that 71.5 per cent of high school students, parents, teachers and school board trustees were satisfied with students’ opportunities to learn career education at school (Chart 3.a).
- Results overall have decreased over time but have remained stable compared to the previous year.
- Student and parent satisfaction have been stable over time for all four related survey questions.
- Teacher satisfaction has decreased over time for all four related survey questions. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- School board trustees’ satisfaction that students in their jurisdiction can access academic counselling services in a timely manner at school when needed has been stable over time.

Chart 3.a: Satisfaction of students, parents, teachers and school board trustees with career education opportunities for students

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Table 3.a: Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	83.9	83.3	85.4	85.4	86.0
Parents (Grades 7 -12)	63.6	67.2	62.1	58.8	63.7
Teachers	67.9	55.3	53.3	53.3	52.4
School Board Trustees	85.7	83.7	84.4	79.7	83.9
Overall Satisfaction	75.3	72.4	71.3	69.3	71.5

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For high school students, the percentage reported is the average of the following agreement levels:
 - agreement with opportunities to learn about careers at school,
 - agreement with experience at school contributing to their growth in developing clear career goals,
 - agreement that students get the help they need with planning for a career, and
 - agreement that students get the help they need with deciding what courses to take.
- For parents (Grades 7 to 12), the percentage reported is the average of the following satisfaction/agreement levels:
 - agreement that school is contributing to their child's ability to develop clear career goals,
 - satisfaction that their child can access career counselling services in a timely manner at school when needed,
 - satisfaction that their child can access academic counselling services in a timely manner at school when needed, and
 - satisfaction that school is contributing to their child's ability to transition effectively from school to work (e.g., adapting to a work place), or from school to post-secondary studies.
- For teachers, the percentage reported is the average of the following satisfaction levels:
 - satisfaction with the opportunities students at their school have to learn about careers,
 - satisfaction that students at their school can access career counselling services in a timely manner when needed,
 - satisfaction that students at their school can access academic counselling services in a timely manner when needed, and
 - satisfaction that their school is contributing to the development of students' ability to transition effectively from school to work (e.g., adapting to a work place), or from school to post-secondary studies.
- For school board trustees, the percentage reported is the average of the following satisfaction level:
 - satisfaction that children/students in their jurisdiction can access academic counselling services in a timely manner at school when needed.
- The target for 2024-25 was set in February 2024 based on 2022-23 data.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall satisfaction is the average of agreement/satisfaction levels for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Supplementary Information
Employer Satisfaction With the Skills and Knowledge of Recent High School Graduates

Rationale

- In assessing the effectiveness of the Alberta education system, business and industry employers of recent high school graduates are able to provide important information about the skills and abilities of high school graduates.

Discussion

- Overall survey results in 2023-24 indicate that 83.6 per cent of business and industry employers were satisfied with the skills and quality of work of recent high school graduates from Alberta’s Kindergarten to Grade 12 education system.
- Overall survey results in 2024-25 indicate that 84.2 per cent of business and industry employers were satisfied with the skills and quality of work of recent high school graduates from Alberta’s Kindergarten to Grade 12 education system.
- Based on survey results from 2015-16 to 2024-25, employer satisfaction has been stable over time.
- The survey of business and industry employers resumed in 2021-22 after several postponements of the administration of the survey.

Overall Satisfaction of Employers With the Skills and Knowledge of Recent High School Graduates

Source: Alberta Education: CCI Research Inc.: 2016; Advanis Inc.: 2022, 2023, 2024 and 2025

Survey Results *(in percentages)*

Respondent Group	2015-16	2021-22	2022-23	2023-24	2024-25
Business and Industry Employers	84.3	84.0	84.8	83.6	84.2
Overall Satisfaction	84.3	84.0	84.8	83.6	84.2

Source: Alberta Education: CCI Research Inc.: 2016; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- Percentages reported are the overall satisfaction levels from: “Thinking about the recent high school graduates from Alberta’s Early Childhood Services to Grade 12 education system you have working for your organization, please tell me how satisfied or dissatisfied you are overall with their skills and quality of work.”
- In the 2021-22, 2022-23, 2023-24 and 2024-25 surveys, recent high school graduates were defined as those who graduated from an Alberta high school within the last four years; prior to the 2021-22 survey, recent high school graduates were defined as those who graduated from an Alberta high school within the last two years.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Performance Measure 3.b:
Broad Program of Studies

Rationale

- Access to complementary subjects such as Fine Arts, Physical Education, additional languages, and Career and Technology Studies is an indicator that students have the opportunity to receive a broad education.

Target

- The target was not met.

Discussion

- Overall survey results in 2024-25 indicate that 78.7 per cent of high school students, parents, teachers and school board trustees were satisfied with students’ opportunities to receive a broad program of studies (Chart 3.b).
- Results overall have decreased over time but have remained stable compared to the previous year.
- Student satisfaction with opportunities to learn about another language has decreased over time. In contrast, satisfaction with opportunities to participate in physical education has increased over time.
- Parent satisfaction with their children’s opportunity to learn about music and art, as well as opportunity to participate in physical education at school, has increased over time. However, satisfaction with their children’s opportunity to learn about health has decreased over time.
- Teacher satisfaction has decreased over time for all related survey questions except satisfaction with their students’ opportunities to learn about music and to participate in physical education, both of which have remained stable. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- School board trustees’ satisfaction for all the related survey questions has been stable over time.

Chart 3.b: Overall Satisfaction of High School Students, Parents, Teachers and School Board Trustees With the Opportunity of Students to Receive a Broad Program of Studies

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Table 3.b: Survey Results *(in percentages)*

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	86.2	84.0	83.6	84.8	85.1
Parents (Early Childhood Services to Grade 12)	79.5	81.3	80.2	79.7	80.8
Teachers	79.3	76.7	75.3	72.8	70.9
School Board Trustees	80.5	80.9	79.8	78.3	78.1
Overall Satisfaction	81.4	80.7	79.7	78.9	78.7

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- Percentages reported are averages of satisfaction levels with the variety of subjects available and that “you/your child/your students/students in your jurisdiction have opportunities to learn about: Music, Drama, Art, Computers, Health, another language” and with “opportunities to participate in Physical Education.”
- In the parent survey, only parents of Grades 7 to 12 students were asked questions relating to “Drama” and “another language”.
- The target for 2024-25 was set in February 2024 based on 2022-23 data.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall satisfaction is the average of satisfaction levels for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Supplementary Information
Solid Grounding in Core Subjects

Rationale

- A grounding in the core subjects of Mathematics, Language Arts, Science and Social Studies is essential for a solid Kindergarten to Grade 12 education.

Discussion

- In 2024-25, 76.1 per cent of high school students, parents, teachers, school board trustees and the public were satisfied that students are receiving a solid grounding in core subjects.
- Results overall have decreased over time but have remained stable compared to the previous year.
- Students' agreement that they are getting better at reading has increased over time.
- Parent and teacher agreement that curriculum focuses on what their child/student needs to learn in reading, writing, Mathematics, Science and Social Studies has decreased over time. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- Public agreement that the curriculum focuses on what students need to learn in reading, writing, and Social Studies has decreased over time.

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For high school students, percentages reported are averages of agreement levels that “you are getting better at ... reading, writing, Mathematics, Science and Social Studies.”
- For parents, teachers, school board trustees and the public, percentages reported are averages of agreement levels that “the curriculum focuses on what children/students need to learn in reading, writing, Mathematics, Science and Social Studies.”
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results overtime.
- Overall satisfaction is the average of agreement/satisfaction levels for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Outcome Four: Alberta's K–12 education system and workforce are well-managed

Alberta Education oversees the administration of the Early Childhood Services to Grade 12 education system and directs the education system through legislation, policy and provision of funds. Maintaining a well-governed and well-managed Alberta education system was achieved by:

- working with school authorities on recruitment and retention strategies for teachers and other school staff in underserved areas;
- addressing classroom complexities through specialized learning supports and improved access to qualified professionals and educational assistants;
- promoting choice in education to enhance student learning;
- implementing school capital strategies to increase the number of classrooms in areas of greatest need; and
- continuing to create efficiencies within the education system by streamlining financial and governance practices.

Key Objectives

4.1 Work with school authorities on recruitment and retention strategies for teachers and other school staff in underserved areas.

Alberta Education continued to explore ways to support the recruitment and retention of teachers and other school staff by implementing strategies such as certificate and bursary programs that recruit to targeted subject areas and underserved regions, increasing professional development opportunities, improving supports for francophone and French language teachers, providing supports for school bus drivers and engaging in education partnerships.

Teacher Certificate and Bursary Programs

Alberta Education continued to support the growth and development of the teaching workforce through teacher certificate and bursary programs.

Northern Student Teacher Bursary

The Northern Student Teacher Bursary provides bursaries to Bachelor of Education students who agree to return to service as a teacher within a northern Alberta school authority. Program participants are also potential candidates for northern jurisdictions looking to fill positions. Through the program, which is also supported by a contribution from Jobs, Economy and Trade, students can receive up to \$18,000 to cover their post-secondary education expenses. In 2024-25, this bursary was awarded to 37 recipients.

Rural Practicum Bursary

The Rural Practicum Bursary helps rural school authorities recruit new teachers by helping education practicum students explore employment opportunities in rural school authorities. The program helps reduce costs for students who complete practicum studies in rural areas. The program provides \$2,000 bursaries for rural practicum placements and \$4,000 to students who complete a final field experience placement in Fort Chipewyan. In 2024-25, the Rural Practicum Bursary program awarded 83 bursaries for a total of \$166,000.

Bridge to Teacher Certification

The Career and Technology Studies (CTS) Bridge to Teacher Certification Program provides an opportunity for school authorities to recruit skilled individuals with qualifications aligned to the CTS Program of Study clusters, alongside journeypersons, health-care professionals and information technologists. The program authorizes certificated journeypersons, health-care professionals and information technologists to work as teachers while pursuing a Bachelor of Education degree. Under the CTS bridging program of study, participants who complete a full 36 credits in specified education courses are authorized to teach under a conditional Letter of Authority until they graduate from a full Bachelor of Education degree program. Individuals graduating from this four-year program will receive a Bachelor of Education, which permits them to teach with full scope within Alberta's schools.

In 2024-25, the department provided approximately \$625,000 in funding to support 25 tradespeople to qualify for a Letter of Authority while completing a university bridging program.

Professional Development Opportunities

Alberta Education continued to support the growth and development of the teaching workforce by providing professional development opportunities. In 2024-25, Alberta Education:

- allocated a total of \$90,000 to 90 individuals through the Math Bursary Program to support current and future teachers to enhance their knowledge, skills and confidence in teaching math;
- continued to support the growth of teacher capacity through Heritage Language Grants by providing \$92,000 in grant funding to the International and Heritage Language Association and \$174,000 in grant funding to the Southern Alberta Heritage Language Association; and
- approved five Alberta certificated teachers of international languages to take summer language courses at a recognized post-secondary institution outside of Canada, providing up to \$4,200 each in funding through the International Language Teacher Bursary.
 - The bursary supports Kindergarten to Grade 12 French and international language teachers, language consultants and school administrators in improving their language proficiency, teaching skills and knowledge through an accredited education experience and helps Alberta Kindergarten to Grade 12 school jurisdictions enhance their language teaching capacity.

Support for French Language Educators

Alberta Education remains committed to supporting the province's growing francophone community by delivering high-quality French-language education and other initiatives to help promote francophone cultures. The Individual Teacher Bursary Program provides eligible teachers in Alberta up to \$4,000 each year for post-secondary courses (including master's and doctoral programs), training and professional development in French or related to French-language learning, education or pedagogy. The program is financed with federal funding provided through the Canada-Alberta Agreement for Minority-Language Education and Second-Language Instruction. In 2024-25, Alberta Education provided approximately \$173,550 in Individual Teacher Bursaries to 112 teachers.

Alberta Education led negotiations with the federal government to ratify the Canada-Alberta Agreement for Minority-Language Education and Second-Language Instruction, securing over \$99 million in federal funding for Alberta over the next four years to support Early Childhood Services to Grade 12 and post-secondary French-language education. Under the new protocol, additional funding will be provided for minority-language and second-language teacher recruitment and retention and post-secondary minority-language education.

Strengthening Supports Through Working Groups

Alberta Education led two separate working groups aimed at addressing challenges and strengthening supports for French language educators. Both projects were undertaken through federal funding provided for teacher recruitment and retention initiatives under the Official Languages in Education Program.

A working group that focused on professional development for teaching in a minority-language context finished its work in April 2024. Strategies for the successful integration of new teachers teaching in a minority setting were shared with school authorities and continued collaboration was encouraged.

A working group on staff French-language proficiency assessment ended in May 2024. A focus group comprised of teachers, school administrators, human resources staff and consultants from school authorities across Alberta met in December 2024 to provide feedback on the draft Guide to Supporting the French Language Proficiency of Teachers: Engaging in Career-Long Learning. The feedback collected will be used to inform the final version of the guide, which will support school authorities in providing formative feedback and comprehensive language development recommendations to teachers and support their continuous growth.

Education Partnerships

Alberta Education continues to identify opportunities to enhance subject matter expertise in the teaching workforce by collaborating with other jurisdictions, relevant institutions and organizations.

Educator Exchange Programs

Educator exchange programs help build the capacity of teachers and school leaders by providing them with opportunities to work in new and different environments and hone a wider variety of skills. These educator exchanges are implemented in collaboration with the Alberta Teachers' Association through an annual grant of \$135,000. In 2024-25, the department continued to offer virtual educator exchange programs with Australia, Germany, Mexico and Spain; as well as in-person exchanges with Australia, Iceland, Germany and Spain, to enhance the knowledge and skills of Alberta teachers and school leaders. Alberta Education also continues to offer education exchange programs through Alberta's accredited international schools.

Special Language Advisors

Alberta Education collaborated with partner governments and agencies under agreements for the posting of special language advisors to Alberta, who work to support language teaching and learning in the education system. In 2024-25, agreements for special language advisors were in place with China, Germany, Japan, Spain and Ukraine. Special language advisors support professional development opportunities for Alberta educators in language and culture programs, and in bilingual programs. They also work to support educational exchanges and school partnership opportunities. Alberta Education allocated \$170,000 to support advisors in 2024-25.

Research Partnerships Program

The department continues to facilitate collaborative research between school authorities and post-secondary institutions through the Research Partnerships Program by providing funding for research projects with potential to impact Alberta's Early Childhood Services to Grade 12 education system and improve learning outcomes for students.

The 2024 call for proposals funded five research studies on various topics, including aligning generative AI, ethics and teachers' values; engaging diverse stakeholders to advance equity in education; student readiness for the future; social-emotional wellness in campus programs; and impacts of equitable assessments and

reporting practices on high school students' learning. Research teams provided quarterly research updates and submitted research reports to Alberta Education and Alberta Research Network members through the Research Partnerships Program Findings webinar series and an annual Alberta Research Network Symposium held in November 2024. The webinars and symposiums bring together school authorities, universities and educational partner organizations to network and share research and ideas.

In October 2024, the Research Partnerships Program amended its grant options for the 2025 call for proposals to include two grant streams for a total of \$250,000 to better meet the financial needs of research teams and to fund a variety of studies. The Strategic Opportunity Grant stream offers funding for small- to medium-scale studies with shorter timelines of up to two years while the Comprehensive Grant stream offers funding for large-scale studies with longer timelines of up to three years.

College of Alberta School Superintendents

Alberta Education continues to support the College of Alberta School Superintendents (CASS) as a key partner in Alberta's education system. In January 2025, \$591,040 in conditional grant funding was provided to CASS to support deliverables aligned with the department's priorities and mandate items through system leadership.

Alberta Education also provides annual funding to CASS to support teachers and school leaders' access to professional learning opportunities through the Alberta Professional Learning Consortium. In 2024-25, \$4.34 million was provided to deliver professional learning sessions. Between February 2024 and January 2025, more than 107,000 educators attended approximately 3,100 sessions to support planning, instruction and assessment practices for new curriculum implementation.

4.2 Address classroom complexities through specialized learning supports and improved access to qualified professionals and educational assistants.

Alberta Education supported school authorities in addressing classroom complexities during the 2024-25 school year by supporting diverse student demographics, providing low incidence supports and services, improving testing and providing specialized assessments, expanding capacity and learner supports and providing learning support funding.

Supporting Diverse Student Demographics

In 2024-25, Alberta Education provided \$1 million to Seniors, Community and Social Services to support the Wellness, Resiliency and Partnership 2.0: Fetal Alcohol Spectrum Disorder (FASD) Coaching Partnership Project to strengthen the capacity of school staff in supporting students with FASD. The program fosters collaboration between school authorities and FASD networks and offers tools and coaching support to help educators create inclusive learning environments that support and engage students with FASD.

Low Incidence Supports and Services Funding

In 2024-25, \$5 million of targeted funding was provided to 69 school authorities through Low Incidence Supports and Services funding to facilitate access to educational programming for students with low incidence disabilities, including students who are blind or visually impaired, deaf or hard of hearing, deaf-blind and those with complex communication needs. As part of low incidence supports and services, Alberta Education provided four Travelling Low Vision Clinics, three in Edmonton and one in Red Deer. A Travelling Low Vision Clinic was also held in Calgary for May 2025. Travelling Low Vision Clinics provide comprehensive low vision assessments to support educational programming to students.

Improving Testing and Providing Specialized Assessments

Alberta Education recognizes that children with complex needs face multiple, interconnected challenges that significantly affect their well-being and functioning across various settings, including schools, homes and communities.

The Enhancing Specialized Assessment Grant was provided to Mandel & Associates Ltd., a Calgary-based group of psychologists specialized in provision of expert assessments in the areas of clinical psychology, educational psychology, neuropsychology, rehabilitation psychology and vocational psychology to coordinate the administration of specialized assessments from October 2022 to April 2024. Mandel & Associates Ltd. worked with qualified professionals to schedule and complete specialized assessments requested by public, separate, francophone and charter school authorities. In April 2024, a final report was provided to Alberta Education indicating that the grant supported the assessments of 3,227 children across Alberta. Findings from the final report were shared with partner ministries and are being used to inform future work to support children with complex needs.

Expanding Capacity and Learner Support Grant

Alberta Education provided \$5.3 million in funding to the Association of Independent Schools and Colleges in Alberta to operate the Expanding Capacity and Learner Support Grant Program. This program strengthens the capacity of independent (private) schools and independent (private) Early Childhood Service operators to deliver targeted supports and services to students with specialized learning needs. This includes providing a variety of support such as resources, consultation, professional learning, and direct service and assessments when required, to inform the child or student's education program. The program now includes providing support for home education families. The association indicates that there has been a steady increase in service usage.

Program Supports and Services Grants

Alberta Education continues to promote inclusive education where diversity and learner differences are embraced, and equitable learning opportunities are available to all students. In the 2024-25 school year, learning support funding includes:

- \$596.2 million allocated to the Specialized Learning Supports Grant for school jurisdictions to provide a continuum of specialized supports and services to students in an inclusive learning environment;
- \$116 million allocated to the English as an Additional Language Grant and Francisation Grant to support school authorities or francophone regional authorities with 95,737 children or students who require additional support in the English or French language; and
- \$57.5 million allocated to the Refugee Student Grant to help school authorities provide additional language, social and educational supports to 11,137 refugee students.

Program Unit Funding

A total of \$219.9 million in learning support funding will be allocated to Program Unit Funding (PUF) in the 2024-25 school year, an increase of \$17.7 million from the previous year. Alberta Education provides educational supports through PUF to school authorities, including independent (private) Early Childhood Services operators, to support children aged two years, eight months to six years who have severe disabilities or delays requiring support beyond what is offered in regular Early Childhood Services programs. Providing early intervention services to eligible children across the province will help ensure they have a successful transition into their early elementary years.

Alberta Education reviewed the PUF Grant to ensure the program parameters and funding mechanism are addressing the educational needs of children with severe disabilities or delays and to strengthen alignment with the Special Education Coding Criteria and *Funding Manual for School Authorities*. As a result of the review, two enrolment count dates, December and February, were implemented during the 2024-25 school year to ensure all eligible children were enrolled and funded through the program.

Classroom Complexity Grant

The Classroom Complexity Grant allocated \$42.5 million in learning support funding for the 2024-25 school year. The grant is provided to school authorities to address classroom complexity by increasing staff hours, providing training and hiring more frontline support staff and specialists, such as counsellors, psychologists and interpreters.

Approximately \$480,000 of this grant will be available for the Educational Assistant Internship Program to support training for current and aspiring educational assistants. Created in 2023 in partnership with The Edmonton School Division, the program helps address the provincial shortage of educational assistants by providing flexible professional development and training programming to educational assistants. The program fosters an educational assistant community of practice and provides on-site coaching, oversight and research. Program participants can engage in on-the-job training and learn educational assistant theory and skills while being employed, enabling participants without post-secondary training to join the educational assistant workforce. 281 individuals have participated in the program to date, with 400 people participating in 2025-26.

4.3 Promote choice in education to enhance student learning.

Providing school choice contributes to the success of Alberta's education system and offers parents the opportunity to choose the educational path that best supports their child's unique needs. The department recognizes that public, separate, francophone, independent (private) and charter schools, as well as Early Childhood Services programs and home education programs are integral to providing a variety of options for students and parents.

Education system funding was increased to almost \$9.3 billion in 2024-25, ensuring that the Kindergarten to Grade 12 education system continued to support children and students to develop their knowledge and skills and achieve learning outcomes.

Charter Schools

Alberta Education continues to expand options to provide choice in education through charter schools. In the 2024-25 school year, the ministry allocated approximately \$162 million for operating funds. Charter schools are autonomous, non-profit, publicly funded schools that offer provincial curriculum in an innovative or enhanced way to improve student learning and contribute to educational choice.

In 2024-25, charter schools had the option to be funded through a new Specialized Learning Support Grant or remain on the Severe Disabilities Grant. Alberta Education engaged with stakeholders in fall 2024 to explore issuing charters on a continuing basis rather than operating on a term basis as presently described in legislation.

Independent (Private) Schools

School choice is also supported through independent (private) schools and independent (private) Early Childhood Services operators. Independent (private) schools receive 70 per cent of the base instruction funding provided to public schools and are not eligible for capital funding.

In 2024-25, Alberta Education provided \$428.8 million to accredited funded independent (private) schools, an increase of \$35.1 million from the prior year, reflective of growing enrolment in these schools.

Alberta Education also provided approximately \$340,000 to the Association of Independent Schools and Colleges in Alberta in 2024-25 to provide teacher evaluation and certification services to independent (private) schools, independent (private) Early Childhood Services operators and Alberta accredited international schools.

Home Education

Home education is a parent-directed approach to educating a student in Grades 1 to 12 at home or elsewhere in which parents are responsible for making all education decisions. Parents choose curriculum resources and methodology consistent with their family's beliefs and the Home Education Regulation. There are two types of home education programs in Alberta: supervised by a school authority, which is eligible for funding, and not supervised by a school authority, which is not eligible for funding.

The Home Education Grant is provided to public, separate, francophone and accredited funded independent (private) school authorities to support students in a home education program. Up to 50 per cent of the Home Education Grant is provided to the parent/guardian as reimbursement for instructional materials and services that support the instructional program at home. Parents in a supervised home education program can also use their portion of parent funding to access online/distance education courses.

In 2024-25, Alberta Education continued to provide \$1,802 per student through Home Education Grant funding. There are currently over 21,500 students enrolled in home education programs in Alberta.

Home Education Kindergarten Pilot Program

The Home Education Kindergarten pilot program was created in the 2023-24 school year to expand educational choices for parents and to assess the interest and feasibility of home education for Kindergarten-aged children.

In the 2024-25 school year, the pilot allocated \$1.8 million in funding to support up to 2,048 children, allowing parents providing home education to their Kindergarten children to access funding through the temporary grant program. A grant of \$901 per child was allocated to supervising school authorities, including public, separate, francophone and independent (private) school authorities. Up to \$450.50 was designated for parental reimbursement for instructional materials and resources.

Student Transportation

Student transportation is an integral part of Alberta's education system. Under the *Education Act* and School Transportation Regulation, school boards are required to provide transportation to their designated school for their resident students who meet the distance criteria. School authorities receive transportation funding to support the safe transportation of more than 335,000 Kindergarten to Grade 12 students across the province each school day.

In the 2024-25 fiscal year, Alberta Education provided \$439.7 million in transportation funding to school jurisdictions and \$25.9 million to accredited independent (private) schools and independent (private) Early Childhood Services operators.

Alberta Education also offered transportation support to school authorities through the Fuel Price Contingency Program, helping to offset the impact of fuel price increases for school authorities by keeping fuel prices at a base rate of \$1.25 per litre. In 2024-25, more than \$16 million was provided to school authorities to support high fuel costs.

School Bus Driver Grant

The School Bus Driver Grant compensates school authorities and new school bus drivers for the time it takes to complete their training to help address concerns about driver shortages, recruitment and retention. The grant has provided \$8.5 million to support the training of new Class 2 and Class 4 school bus drivers since it was introduced in April 2023. School authorities received \$4.7 million in funding for 1,315 drivers who completed training from April 2024 to March 2025.

4.4 Implement school capital strategies to increase the number of classrooms in areas of greatest need.

To keep pace with rising student enrolment, Alberta Education invested in new schools and delivered additional student spaces in the fastest-growing communities for students to learn, grow and reach their full potential. Through Budget 2024, Alberta Education provided \$2.8 billion for school construction as a three-year capital investment, funding 99 school projects in various stages across the province. Approximately \$140 million was also provided for the production and distribution of modular classrooms for the 2024-25 school year, resulting in the creation of an additional 4,550 student spaces and the relocation of more than 700 student spaces to schools with the greatest space needs.

In 2024-25, Alberta Education:

- advanced 31 priority school projects, including 23 new schools, three replacement schools and five modernizations;
- prioritized 15 school projects in the Calgary metro area and 11 school projects in the Edmonton metro area, creating over 23,000 new or updated student spaces;
- approved full construction funding for 18 priority school projects; and
- built 12 schools in 11 communities across the province, with the new schools operating in Blackfalds, Camrose, Coaldale, Edmonton, Fort Vermillion, Grande Prairie, Langdon, Leduc, Manning, Red Deer and Sherwood Park. These 12 capital projects added more than 11,000 new and updated student spaces.

School Construction Accelerator Program

The School Construction Accelerator Program was announced in September 2024. Through the program, Alberta Education committed an additional \$8.6 billion for school construction to create new and updated student spaces. This will deliver more than 100 new and updated schools over the next seven years. The program, together with previously approved school projects and an additional \$150 million over three years to supply modular classrooms, will deliver approximately 200,000 new and modernized spaces for students over the next seven years.

The School Construction Accelerator Program speeds up the construction of schools by approving school projects for their next stage in the construction process in-year, allowing projects to move through planning, design and construction stages without having to wait until the next budget cycle for approval, reducing project timelines by as much as six months. Through this change, and funded as part of the \$8.6 billion school capital investment, 22 previously announced priority school projects across the province were approved to move from one stage to the next in the construction funding process. Of the 22 projects, 17 were approved to move from the design stage to full construction funding. Eight of the new school projects will be in Edmonton, four in Calgary and one each in Airdrie, Chestermere, Okotoks, Barrhead, Breton, Mallaig, Spruce Grove, Taber, Wainwright and Redcliff, creating or updating more than 21,000 student spaces.

The funding will also accommodate increased demand for charter school programming and their space needs by allowing Alberta Education to add 12,500 new charter school student spaces over the next four years through a Charter School Accelerator pilot program.

4.5 Continue to create efficiencies within the education system by streamlining financial and governance practices.

Alberta Education continues to streamline governance and regulatory practices by reviewing legislation, policies, forms and other applicable documents to identify opportunities for reducing regulatory requirements. In 2024-25, Alberta Education provided guidance and clarity to school authorities and created efficiencies within the education system.

Education Amendment Act, 2024

The *Education Act* governs Alberta's education system and identifies the roles and responsibilities of the Minister, school boards, charter schools and independent (private) schools, teachers, parents and students.

The *Education Amendment Act, 2024* received Royal Assent on December 5, 2024. The resulting changes to the *Education Act* support families and students navigating complex conversations around gender identity, sexual orientation and human sexuality, while also supporting continuity in a student's learning during a public health emergency or state of emergency.

Changes that came into effect on March 1, 2025, reinforce the importance of students continuing to have access to education during emergencies. These changes also provide more transparency for parents about health measures in schools and more guidance and clarity for teachers and school administrators on matters such as shifts to at-home learning during public emergencies.

Changes coming into effect on September 1, 2025, will increase transparency and strengthen communication to parents. Changes relate to parental notification and consent when a student requests to use a new gender identity-related preferred name or pronouns; parental notification and opt-in consent for classroom content dealing primarily and explicitly with gender identity, sexual orientation or human sexuality; and Minister approval of learning and teaching resources dealing primarily and explicitly with these topics as well as external parties using or providing such resources in schools.

Superintendent of Schools Regulation

Superintendents play a fundamental role in enhancing school leadership and supporting quality teaching and optimum learning for all students in their respective school authorities. To support the recruitment of school leaders, the Superintendent of Schools Regulation was amended through a ministerial order in July 2024 to align superintendent compensation with the salary increase to public sector management.

School Transportation Amendment Regulation

Recognizing that school transportation is an integral part of the education system, the department announced changes to the School Transportation Regulation in February 2023, amending the distance criteria requirements for student transportation eligibility. Following feedback from stakeholders regarding capacity to meet new criteria, the distance eligibility criteria for Grades 1 to 6 students will be revised to 1.6 kilometres effective September 1, 2025, instead of the previously announced one kilometre distance. The criteria for Grades 7 to 12 students will be lowered to two kilometres, as initially announced. Transition funding will be provided for the 2025-26 school year for school authorities that continue to transport Kindergarten to Grade 6 students who reside between one and 1.6 kilometres from their attending school.

Revised Funding Framework

In February 2025, Alberta Education announced a revised funding model to be implemented in the 2025-26 school year. The new funding allocation method will be based on a two-year average enrolment instead of three, with 30 per cent of the funding based on the current school year's enrolment and 70 per cent based on the upcoming year's projections. The model will allow the department to be more responsive to growing school authorities and enable school authorities to access predictable and sustainable funding amid enrolment increases while shielding authorities from declining enrolment.

Fair Dealing Compliance Program

Alberta Education led the Fair Dealing Compliance Program initiative in partnership with the Council of Ministers of Education, Canada to provide guidance and reference materials to educators and administrators for the use of copy-written material and was the main contact for the refund litigation. In response to 2012 changes in law and the decision of the Supreme Court of Canada interpreting fair dealing in an education setting, the Council of Ministers of Education, Canada Copyright Consortium developed and published the *Fair Dealing Guidelines* to help teachers and school administrators understand how to use copyright-protected works appropriately. The *Fair Dealing Guidelines* apply to non-profit Kindergarten to Grade 12 schools and post-secondary education institutions and provide reasonable safeguards for the owners of copyright-protected works. Litigation matters concluded in spring 2024 with a victory for the participating provinces, territories and school boards.

Red Tape Reduction

Alberta Education continues to streamline governance and regulatory practices by reviewing legislation, policies, forms and other applicable documents to identify opportunities for reducing and streamlining regulatory requirements. In 2024-25, Alberta Education:

- Brought forward minor and technical amendments to the *Teaching Profession Act*, which received Royal Assent on December 5, 2024.
 - Amendments made include administrative and technical corrections to ensure terminology regarding certificates and the way they are issued as referenced in the *Teaching Profession Act* align with the *Education Amendment Act, 2024*.
- Provided updated and streamlined forms to school authorities to enable simpler reporting to meet the terms and conditions of the Canada-Alberta Agreement for Minority-Language Education and Second-Language instruction.
 - The revised form is available on the Official Languages in Education Programs webpage, and a webinar was held on June 7, 2024, to answer stakeholder questions.
- Continued to implement digital and other innovative solutions to improve the delivery of essential government services and reduce administrative burden by providing non-regulatory ministerial orders for signing via electronic signature.
 - In 2024-25, Alberta Education prepared and received 34 electronically signed ministerial orders.

Outcome Four Performance Measures

Performance Measure 4.a:
Schools are Able to Attract and Retain Teachers

Rationale

- Attracting and retaining qualified teachers in schools is necessary for the delivery of high-quality education. Skilled and dedicated educators foster engaging learning environments and provide consistent support to students for their long-term academic success.

Target

- The target was not met.

Discussion

- Overall survey results in 2024-25 indicate that 70.3 per cent of principals agreed that they are able to attract and retain teachers at school (Chart 4.a).
- Results overall have decreased over time but have remained stable compared to the previous year.
- Principals’ results have decreased for both related survey questions.
- Principal surveys were administered online.

Chart 4.a: Overall Agreement of Principals That They are Able to Attract and Retain Teachers

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Table 4.a: Survey Results *(in percentages)*

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
Principals	86.8	82.4	80.6	74.5	70.3
Overall Agreement	86.8	82.4	80.6	74.5	70.3

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.:2022, 2023, 2024 and 2025

Notes:

- The percentage reported is the average of agreement levels on the following two survey items:
 - you are able to attract teachers to your school, and
 - you are able to retain teachers in your school.
- The target for 2024-25 was set in February 2024 based on 2022-23 data.
- Overall agreement is the average of agreement levels for the respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Supplementary Information
Teacher Preparation

Rationale

- Teacher education training and professional development is important in maintaining the quality of the Kindergarten to Grade 12 education system.

Discussion

- Overall survey results in 2024-25 indicate that 68.3 per cent of teachers and school board trustees agreed that teachers are prepared for teaching.
- Results overall have decreased over time but have remained stable compared to the previous year.
- School board trustees’ results have been consistently higher than those of teachers.
- Teachers’ agreement has decreased over time for the following five survey questions:
 - teacher education program prepared them adequately to meet the Teaching Quality Standard for initial certification,
 - recent Bachelor of Education graduates are well prepared to meet their responsibilities as teachers,
 - professional development opportunities effectively addressed teacher’s professional development needs,
 - professional development opportunities contributed significantly to teacher’s ongoing professional development, and
 - professional development opportunities have been focused on the priorities of the jurisdiction.
- The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- School board trustees’ agreement that recent Bachelor of Education graduates are well prepared to meet their responsibilities as teachers has decreased over time.

Overall Agreement of Teachers and School Board Trustees that Teachers are Prepared for Teaching

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
Teachers	74.3	65.8	61.0	58.9	56.6
School Board Trustees	88.0	80.7	84.0	84.2	80.1
Overall Agreement	81.1	73.3	72.5	71.6	68.3

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For the teacher respondent group, the percentages reported are averages of teachers' agreement that:
 - teacher education programs prepared them adequately to meet the Teaching Quality Standard for initial certification,
 - recent Bachelor of Education graduates are well prepared to meet their responsibilities as teachers,
 - professional development opportunities effectively addressed their professional development needs,
 - professional development opportunities contributed significantly to their ongoing professional development, and
 - professional development opportunities have been focused on the priorities of the jurisdiction.
- For the school board trustee respondent group, the percentages reported are averages of school board trustees' agreement that:
 - recent Bachelor of Education graduates are well prepared to meet their responsibilities as teachers,
 - professional development opportunities effectively addressed teachers' professional development needs,
 - professional development opportunities contributed significantly to teachers' ongoing professional development, and
 - professional development opportunities have been focused on the priorities of the jurisdiction.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall agreement rates are the average of agreement rates for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Performance Measure 4.b:**Safe, Caring and Healthy Learning Environment*****Rationale***

- A safe, caring and healthy learning environment is fundamental to facilitating student learning.

Target

- The target was not met.

Discussion

- In 2024-25, 83.6 per cent of students, parents, teachers and school board trustees agreed that schools provide a safe, caring and healthy learning environment (Chart 4.b).
- Results overall have decreased over time but have remained stable compared to the previous year.
- Students' agreement that students treat each other well at school and that teachers care about students has decreased over time.
- Parent agreement that students feel safe at school or during remote learning; that students treat each other well at school; that students are treated fairly by adults at school; that students are learning how to stay healthy at school; and satisfaction that schools are contributing to students' development of social skills as well as emotional well-being has decreased over time. In contrast, parent agreement that schools promote physical activity as well as the gym, playground and other facilities such as sports fields and fitness areas at their school meet the daily physical activity needs of students has increased over time.
- Teacher agreement that school promotes physical activity; and students have healthy food choices in the school cafeteria, canteen, vending machines, and at classroom and school events has remained stable over time. Teacher agreement has decreased over time for all other related survey questions. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- Among the four respondent groups, parent and teacher agreement are lowest regarding students having healthy food choices in the school cafeteria, canteen, vending machines, and at classroom and school events.
- School board trustee agreement is lowest regarding school contributing to students' development of emotional well-being.

Chart 4.b: Overall Satisfaction of High School Students, Parents, Teachers and School Board Trustees that School Provides a Safe, Caring, and Healthy Learning Environment

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Table 4.b: Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	84.7	83.0	84.5	86.0	84.8
Parents (Early Childhood Services to Grade 12)	83.6	83.4	82.5	80.5	82.0
Teachers	88.8	84.6	82.7	81.3	79.3
School Board Trustees	89.1	86.6	88.1	88.6	88.1
Overall Satisfaction	86.5	84.4	84.5	84.1	83.6

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For all respondent groups and for all years, percentages reported are averages of agreement/satisfaction levels that:
 - students feel safe at school or during remote learning (In teacher and school board trustee surveys, this item was changed to “students feel safe at school”),
 - children/students feel safe on the way to and from school,
 - children/students treat each other well at school,
 - teachers care about their students,
 - children/students are treated fairly by adults at school,
 - schools promote physical activity,
 - children/students are learning about how to stay healthy,
 - children/students have healthy food choices in the school cafeteria, canteen, vending machines, and at classroom and school events,
 - gym, playground, and other facilities such as sports fields and fitness areas at school meet the daily physical activity needs of children/students,
 - schools are contributing to children’s/students’ development of social skills,
 - schools are contributing to children’s/students’ development of physical abilities,
 - schools are contributing to children’s/students’ development of emotional well-being, and
 - students reporting at least one day of physical activity (of at least 30 minutes) at school in the past five school days.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- The target for 2024-25 was set in February 2024 based on 2022-23 data.
- Overall satisfaction rates are the average of agreement/satisfaction rates for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Supplementary Information**Quality of Kindergarten to Grade 12 Education*****Rationale***

- High quality Kindergarten to Grade 12 education meets the needs of all students, society and the economy.

Discussion

- Overall survey results in 2024-25 indicate that 77.6 per cent of high school students, parents, teachers, school board trustees, and the public were satisfied with the overall quality of Kindergarten to Grade 12 education.
- Results overall have decreased over time but have remained stable compared to the previous year.
- Public satisfaction continues to be lower compared to the satisfaction of other respondent groups.
- Student agreement that school work is challenging has decreased over time.
- Parent satisfaction with the quality of teaching at their child's school has decreased over time. Similarly, parent agreement that the highest priority of Alberta's education system is the success of the students has decreased over time. However, parent agreement that their child clearly understands what students are expected to learn at school has increased over time.
- Teacher satisfaction with the quality of education and the quality of teaching at their school has decreased over time. Similarly, teacher agreement that the highest priority of Alberta's education system is the success of the student, that school work is interesting, and that students clearly understand what they are expected to learn at school has decreased over time. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- School board trustee satisfaction with the quality of education at schools in their jurisdiction has decreased over time. Similarly, school board trustee agreement that the highest priority of Alberta's education system is the success of the student, and that students in their jurisdiction clearly understand what they are expected to learn at school has decreased over time.
- Public satisfaction with the quality of education at school in their community has decreased over time.

Overall Satisfaction of High School Students, Parents, Teachers, School Board Trustees and the Public With the Quality of Kindergarten to Grade 12 Education

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	89.0	88.0	89.4	89.5	87.8
Parents (Early Childhood Services to Grade 12)	78.4	80.0	79.0	75.7	76.4
Teachers	88.9	80.5	73.6	74.4	68.3
School Board Trustees	92.5	87.6	90.5	90.4	87.8
Public	73.9	65.0	64.7	62.8	67.6
Overall Satisfaction	84.6	80.2	79.4	78.6	77.6

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For high school students, parents, teachers and school board trustees, percentages reported are averages of agreement/satisfaction levels with the following specific aspects of the school system:
 - overall satisfaction with education at schools,
 - the quality of teaching at schools,
 - the highest priority of the education system is the success of the children/students,
 - school work is interesting,
 - school work is challenging, and
 - learning expectations at school are clear.
- For the public, the percentage reported is the average of agreement/satisfaction levels with the following two aspects of the school system:
 - overall satisfaction with education at schools, and
 - the highest priority of the education system is the success of the children/students.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall satisfaction is the average of agreement/satisfaction levels for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

**Performance Measure 4.c:
Supports and Services**

Rationale

- Accessing supports and services in a timely manner has an influence on student achievement and is one of the important factors for effective learning.

Target

- The target was not met.

Discussion

- Overall survey results in 2024-25 indicate that 72.9 per cent of high school students, parents, teachers, and school board trustees agreed that supports and services for students can be accessed in a timely manner (Chart 4.c).
- Results overall have decreased over time but have remained stable compared to the previous year.
- Results for parents and teachers are consistently lower than those of other respondent groups.
- Parent agreement was lowest regarding school helping struggling students keep up with their studies.
- Teacher agreement has decreased over time for all related survey questions. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24, and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- Teacher agreement was lowest regarding timely access to:
 - services (beyond regular instruction) that help students read and write at school when needed; and
 - student assessment services for students with learning difficulties.
- School board trustee agreement has decreased over time for the following:
 - support services for students with disabilities can be accessed in a timely manner at school when needed; and
 - student assessment services for students with learning difficulties can be accessed in a timely manner at school when needed.

Chart 4.c: Overall Agreement of High School Students, Parents, Teachers, and School Board Trustees that Supports and Services for Students can be Accessed in a Timely Manner

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Table 4.c: Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	89.0	86.7	88.8	88.6	86.8
Parents (Early Childhood Services to Grade 12)	76.5	76.7	72.9	71.0	71.8
Teachers	78.5	65.0	62.8	58.0	56.7
School Board Trustees	84.4	80.6	78.9	77.8	76.3
Overall Agreement	82.1	77.3	75.8	73.9	72.9

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For high school students, the percentage reported is the average of the following agreement levels:
 - your school is helping struggling students keep up in their studies,
 - it is easy to get help with school work at your school if you need it,
 - you can get help at your school with problems that are not related to school work,
 - when you need it, teachers at your school are available to help you,
 - at school, students can get the help they need with reading and writing, and
 - your school provides the learning resources, such as text books, software, audio and video materials, that meet your needs.
- For parents, the percentage reported is the average of the following agreement/satisfaction levels:
 - your child's school is helping struggling students keep up in their studies,
 - your child can easily access programs and services to get help with school work,
 - your child can get help at school with problems that are not related to school work,
 - when your child needs it, teachers at your child's school are available to help him or her,
 - your child's school provides the learning resources, such as text books, software, audio and video materials, that meet the needs of your child,
 - your child can access services (beyond regular instruction) that help your child read and write in a timely manner at school when needed, and
 - your child can access academic counselling in a timely manner at school when needed.
- For teachers and school board trustees, the percentage reported is the average of the following agreement/satisfaction levels:
 - students can easily access programs and services at school to get help with school work,
 - students can get help at school with problems that are not related to school work,
 - when students need it, teachers are available to help them,
 - schools provide the learning resources, such as text books, software, audio and video materials, that meet the needs of students,
 - students can access services (beyond regular instruction) that help them to read and write in a timely manner at school when needed,
 - students can access academic counselling in a timely manner at school when needed,
 - students can access support for students with disabilities in a timely manner at school when needed, and
 - student assessment services for students with learning difficulties can be accessed in a timely manner at school when needed.
- The target for 2024-25 was set in February 2024 based on 2022-23 data.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall agreement rates are the average of agreement/satisfaction rates for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Supplementary Information
Learning Space at School

Rationale

- Learning space has an influence on student achievement and is an important contributing factor for effective teaching and learning at school.

Discussion

- Overall survey results in 2024-25 indicate that 74.2 per cent of high school students, parents, teachers and school board trustees were satisfied that the learning space in schools meets the needs of students.
- Results overall have decreased over time but remain stable compared to the previous year.
- Student and parent results have been consistently higher than those of teachers and school board trustees overtime.
- Student satisfaction has decreased over time for all related survey questions.
- Teacher satisfaction that the facilities, equipment and space meet the learning needs of students and that the school building is well-maintained has decreased over time. The survey of teachers was conducted online in 2021-22, 2022-23, 2023-24 and 2024-25, whereas previously it was administered by telephone. This change in methodology may have affected the results. Caution should be exercised when comparing results over time.
- School board trustee satisfaction that the facilities, equipment and space at schools in their jurisdiction meet the learning needs of students has decreased over time.

Overall Satisfaction of High School Students, Parents, Teachers and School Board Trustees That the Learning Space in Schools Meets the Needs of Students

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025.

Survey Results (in percentages)

Respondent Group	2020-21	2021-22	2022-23	2023-24	2024-25
High School Students	92.7	89.8	87.5	88.2	86.1
Parents (Early Childhood Services to Grade 12)	84.5	85.6	87.1	83.9	84.0
Teachers	76.0	68.5	63.2	57.2	53.4
School Board Trustees	84.0	78.8	72.6	72.6	73.2
Overall Satisfaction	84.3	80.7	77.6	75.5	74.2

Source: Alberta Education: CCI Research Inc.: 2021; Advanis Inc.: 2022, 2023, 2024 and 2025

Notes:

- For high school students, the percentage reported is the average of the following satisfaction levels:
 - satisfaction with the facilities at your school,
 - satisfaction with the equipment at your school,
 - satisfaction that your school has enough space in the buildings and grounds to meet the learning needs of students,
 - satisfaction that your school building meets your physical needs, and
 - satisfaction that your school building is well-maintained.
- For parents, the percentage reported is the average of the following satisfaction levels:
 - satisfaction with facilities at your child's school,
 - satisfaction with equipment at your child's school,
 - satisfaction that your child's school has enough space to meet your child's learning needs,
 - satisfaction that your child's school building meets your child's physical needs, and
 - satisfaction that your child's school building is well-maintained.
- For teachers, the percentage reported is the average of the following satisfaction levels:
 - satisfaction that facilities at your school meet the learning needs of children/students,
 - satisfaction that the equipment at your school meets the learning needs of children/students,
 - satisfaction that your school has enough space to meet the learning needs of children/students, and
 - satisfaction that your school building is well-maintained.
- For school board trustees, the percentage reported is the average of the following satisfaction levels:
 - satisfaction that facilities at schools in your jurisdiction meet the learning needs of children/students,
 - satisfaction that the equipment at schools in your jurisdiction meets the learning needs of children/students, and
 - satisfaction that schools in your jurisdiction have enough space to meet the learning needs of children/students.
- The survey of teachers was conducted online from 2021-22 onwards, whereas previously it was administered by telephone, and this may have affected results. Caution should be exercised when comparing results over time.
- Overall satisfaction is the average of satisfaction levels for each respondent group. See Endnote A, page 82, for information on calculating overall survey results.
- See Endnote A, pages 80-81, for information on surveys conducted for Alberta Education.

Performance Measure and Indicator Methodology

Endnote A: Notes on Surveys

Provincial Satisfaction Surveys

Alberta Education regularly commissions telephone and online surveys of random samples of the Alberta public and key education partners. The purpose of these surveys is to obtain perceptions of how the Early Childhood Services to Grade 12 education system is performing in meeting students’ and society’s needs and expectations. Professional survey research firms are contracted to administer the surveys, using trained interviewers and a Computer-Assisted Telephone Interviewing system for telephone surveys, or using a Computer-Assisted Web Interviewing system for online surveys.

Survey data is compiled by the survey research firm in SPSS format and provided to the ministry for analysis. Surveys are conducted annually with the public, parents of Early Childhood Services to Grade 12 students, high school students, teachers, principals, school board trustees, and business and industry employers.

Table 1 provides sampling information about the surveys of Albertans conducted in recent years that are reported in this annual report. The information includes the respondent groups surveyed, the sample sizes and the response rates. Also shown are the maximum width confidence intervals for results from each survey. Results are considered accurate within the confidence interval 19 times out of 20 (i.e., at a confidence level of 95 per cent). Survey fielding for 2024-25 began in mid-January and concluded in mid-May. The resultant sample sizes and confidence intervals are shown in the table on page 81. While the table is useful as a rough guide to the confidence intervals associated with survey results, a confidence interval for the difference is used to determine whether the difference between two specific survey results (either over time or among respondent groups) is statistically significant (i.e., likely a real difference, and not due to sampling variation).

The survey instruments for these surveys primarily use four-point response scales (Very Satisfied/ Satisfied/ Dissatisfied/Very Dissatisfied or Strongly Agree/Agree/Disagree/Strongly Disagree), depending on the question. A few questions use other response scales (e.g., A Lot/Some/Very Little/Not at All or Improved/ Same/Declined). Although not asked, Don’t Know responses and refusals are recorded as well. Results presented are the combined percentages of respondents who were Very Satisfied/Satisfied or who Strongly Agreed/Agreed. The survey results are available at [education provincial satisfaction surveys](#).

Table 1: Alberta Education Provincial Satisfaction Surveys: Sample Sizes and Confidence Intervals

Survey ¹	Year	2020-21	2021-22	2022-23	2023-24	2024-25
Public ²	Sample	600	600	600	600	600
	Confidence Interval	±4.0%	±4.0%	±4.0%	±4.0%	±4.0%
	Response Rate	5.8%	10.8%	9.9%	10.3%	1.5%
Parents (ECS-12) ^{2,3}	Sample	800	801	800	801	803
	Confidence Interval	±3.5%	±3.5%	±3.5%	±3.5%	±3.5%
	Response Rate	10.3%	13.4%	13.5%	13.5%	11.4%
High School Students (Grades 10-12) ²	Sample	600	602	600	601	601
	Confidence Interval	±4.0%	±4.0%	±4.0%	±4.0%	±4.0%
	Response Rate	8.1%	9.3%	9.3%	9.1%	6.7%
Teachers (online) ^{2,4}	Sample	600	635	614	602	609
	Confidence Interval	±4.0%	±3.9%	±3.9%	±4.0%	±3.9%
	Response Rate	15.2%	35.4%	35.4%	29.4%	29.7%
School Board Trustees ^{2,5}	Sample	223	233	243	207	168
	Confidence Interval	±4.9%	±4.6%	±4.6%	±5.2%	±6.1%
	Response Rate	44.9%	60.5%	65.3%	62.9%	55.6%
Principals (online) ²	Sample	357	387	389	386	359
	Confidence Interval	±4.6%	±4.4%	±4.4%	±4.5%	±4.7%
	Response Rate	15.6%	47.1%	49.2%	40.8%	35.5%
	Year	2015-16	2021-22	2022-23	2023-24	2024-25
Business and Industry Employers ^{2,6}	Sample	800	600	611	600	607
	Confidence Interval	±3.5%	±4.0%	±4.0%	±4.0%	±4.0%
	Response Rate	8.3%	5.0%	3.8%	3.7%	5.0%

Notes:

1. CCI Research Inc. in 2020-21; and Advanis Inc. in 2021-22, 2022-23, 2023-24 and 2024-25 administered surveys of the public, parents, students, teachers, principals, school board trustees, and business and industry employers identified in the table above.
2. Confidence intervals for smaller sample sizes of the respondent groups will be different from confidence intervals for the full sample size listed in the table. E.g., for the student respondent group, the confidence interval for n=300 sample size will be ± 5.7 per cent.
3. In the parent survey, some questions were asked only to parents of Grades 3-12 students, or only to parents of Grades 7-12 students. The sample size achieved for the restricted parent group did not have a significant impact on the confidence interval for the measures.
4. The teacher survey was administered by telephone in 2020-21; whereas it was administered online in 2021-22, 2022-23, 2023-24 and 2024-25.
5. Confidence intervals for these samples consider the small population from which the samples are selected, e.g., in 2024-25, 486 school board trustees.
6. The survey of business and industry employers resumed in 2021-22 after several postponements of the administration of the survey.

Calculating Overall Survey Results

When calculating overall results across all respondent groups for survey measures, a simple average (rather than a weighted average) is used to reflect each group's equal importance to the overall result.

Further, although survey results for each respondent group and for overall results are rounded to whole numbers, the overall average results are calculated from the unrounded result for each respondent group. This avoids possible double rounding error that might result if overall averages were calculated from rounded respondent group results.

Use of Confidence Intervals for Interpreting Survey and Survey Measure Results

When a result is obtained by surveying a random sample of the target population, such as the public, parents or teachers, there is a confidence interval associated with the result, which is expressed as a percentage above and below the obtained result. A confidence interval indicates how much variation one might expect from the obtained survey result, as a consequence of sampling and diversity among respondents.

Three key factors influencing the degree of sampling variability associated with survey results are the sample size of the surveys, the magnitude of the result, and the sample size relative to the size of the population:

- The larger the sample size, the smaller the associated confidence interval.
- Given a constant sample size, confidence intervals are smallest for survey percentages near one per cent and 99 per cent and largest for survey percentages near 50 per cent. This is because results near one per cent and 99 per cent represent maximum uniformity of the underlying population on the variable being measured by the survey (e.g., satisfaction/agreement on various educational issues), while results near 50 per cent represent maximum diversity of the underlying population on the variable being measured.
- If the sample size is more than 5% of a finite population, then the confidence interval is reduced according to a Finite Population Correction Factor.

Table 1 illustrates the interaction of these three factors in determining the margin of error for results from surveys. The surveys of parents, high school students, teachers and the public all used sample sizes between 600 and 803 in 2024-25 and survey results ranged from 91.2 per cent (for student satisfaction with the opportunity to receive a solid grounding in core subjects) to 52.4 per cent (for teacher satisfaction with career education opportunities for students). The margins of error range from 2.3 per cent to 3.9 per cent.

In addition, as survey measures generally combine survey results on multiple questions from multiple respondent groups, a customized statistical algorithm is used to construct the confidence interval for measure results.

Confidence intervals for specific results and specific measures are determined by the following procedures:

1. To determine the confidence interval for specific survey results for single respondent groups, an online statistical application (<https://americanresearchgroup.com/moe.html>) is used.
2. Differences in survey results between respondent groups are supported by specific tests using an online statistical application (<https://sapioresearch.com/significant-difference-calculator/>)
3. To determine the confidence interval for specific survey measures with multiple respondent groups, a customized statistical algorithm is used.

In the Ministry of Education's annual report, confidence intervals are used to determine:

- whether differences in survey results or in survey measure results over time are likely the result of sampling variation or represent actual change; and
- whether differences in survey results among respondent groups in the same year are likely the result of sampling variation or represent actual differences.

When comparing results of survey questions over time or among respondent groups, it is concluded that there is an actual difference between two survey results, 19 times out of 20, if the confidence interval for the difference does not include zero. When this is the case, it is acknowledged in the related text that there is an increase, change or significant difference in survey results over time or among groups. When the confidence interval for the difference does include zero, the observed difference may be due to sampling variation, and we cannot conclude that the difference is real or significant. In such cases, the related text indicates that results are similar or stable over time or among respondent groups.

Endnote B: Technical Notes

Assessing Results Relative to Targets

Performance targets set expectations for results within specific time frames and are the basis for planning improvements and assessing results that are within the sphere of influence of the Ministry and school authorities. They are an important way to gauge whether the education system is improving or falling behind in obtaining desired results in key areas. Targets clearly establish desired levels of performance better than recent performance, to be attained within a specific time frame. Targets are quantifiable and expressed in numerical terms, such as percentages or ratios. They are used as a key tool to drive, measure, improve and manage performance.

For survey measures, performance is considered to have met the target if the confidence interval for the result includes the target value. For example, if a measure result is 77 per cent with a confidence interval of 77 per cent $\pm$ 2.5 per cent and a target of 79 per cent, then the target has been met, since the target value lies within the interval [74.5 per cent, 79.5 per cent]. If the result on the same measure is 75 per cent, with a confidence interval of 75 per cent $\pm$ 2.5 per cent, then the target has not been met since the target value of 79 per cent does not lie within the interval [72.5 per cent, 77.5 per cent].

This method of assessing performance represents a high level of achievement in relation to the target and considers the sampling variability in the survey process.

For provincial assessments and student outcome measures (e.g., high school completion rate), a one sample Chi-square statistical test is used to determine whether the result is significantly different from the target. The target is met when results are not significantly different from the target. The magnitude of the difference required between the result and the target to establish significance depends on the sample size, for example, the number of students writing an exam.

Assessing Results Over Time

Changes in results over time are assessed in the discussion of each measure. For survey measures, which are based on probability sampling, confidence intervals are considered. See Use of Confidence Intervals for Interpreting Survey and Survey Measure Results in Endnote A on page 82, for an explanation of how confidence intervals are used to assess changes over time for survey measures.

Changes over time are assessed with a two sample Chi-square statistical test for measures based on tests of student learning or on administrative data, i.e., derived from tracking groups of students over time, such as dropout and high school completion rates. The test determines whether the difference between two proportions (e.g., base year and current year results) is significant. The calculation of Chi-square is based on the difference between what was observed and what would be expected assuming that the proportions were the same. Under a simple test of proportions, a Chi-square value of “1” represents a difference of one standard deviation, while a Chi-square value of 3.84 is significant at the five per cent level. Discussion of results over time for the non-survey measures is supported by this test of significant difference.

Trend Lines

Although not appearing in the annual report, trend lines are an aid for interpreting the results for measures reported in the annual report. Trend lines augment data interpretation techniques already in use, such as the calculation of confidence intervals, and are used to determine the significance of changes in measure results over time.

Trend lines are used to develop an expected value for a current result given historical results. The expected value can then be compared with the actual result. In this way, trend lines provide a useful method of understanding year-to-year fluctuations and shift the focus from smaller year-to-year changes by providing information about the direction of results over the longer term. It is of interest whether results are tracking towards the performance target for the measures that have not met targets.

Discussion of results over time for measures with at least three data points are supported by trend lines. The type of trend line used is selected based on an informed interpretation of the data series underlying the trend.

Logarithmic trend lines are appropriate for proportional data, i.e., data expressed as percentages of a whole and therefore ranging between zero per cent and 100 per cent, such as the performance measures in this report. A logarithmic trend line is a best-fit straight line that is most useful when the rate of change in the data increases or decreases quickly, then levels out. The leveling out can be seen in the results for some measures in the report, along with examples of year-to-year changes in other measures.

A logarithmic trend line is calculated using the following formula:

$Y = c \ln(x) + b$, where c and b are constants and $\ln()$ is the natural logarithm function and x is the year of the series.

Endnote C: Methodology for Performance Measures

Described below are the methodologies used to calculate the measures that are derived from provincial assessments of student learning and from other information about Alberta students in the Ministry of Education’s data systems.

Definition of Alberta Student

An Alberta student is an individual who is registered as of September 30 of the school year in a school located in Alberta, where “school” means a structured learning environment through which an education program is offered to a student by: a board (includes public, separate, francophone, Lloydminster); an operator of an independent (private) school; an Early Childhood Services program private operator; the operator of a charter school; a parent giving a home education program; the Minister. It also includes other Alberta-located educational institutions providing Early Childhood Services to Grade 12 curriculum instruction, specifically federal (First Nations’ schools and those operated by Corrections Canada); and provincial authorities (such as Bow Valley College and NorQuest College).

Results for First Nations, Métis and Inuit Students

Calculating results for First Nations, Métis and Inuit students is possible because school authorities are required to include a voluntary First Nations, Métis and Inuit self-identification question on school registration forms and to report the identifier to the ministry’s student data system. Self-identification of students has increased each year. Students’ First Nations, Métis and Inuit self-identification information associated with their most recent school registration is used to calculate results. This provides the most complete results and reflects the student’s intent to be identified each year.

Annual Dropout Rate of Students Aged 14-18

The annual dropout rate reports the percentages of Alberta students aged 14-18 in public, separate, francophone, charter, and accredited independent (private) schools who, in the following school year:

- are not enrolled in the Kindergarten to Grade 12 system;
- are not enrolled in a post-secondary institution in Alberta;
- are not registered in an apprenticeship program in Alberta; and
- have not completed high school.

The annual dropout rate is derived from student data in Alberta Education and Alberta Advanced Education systems. Adjustments for attrition are based on estimates from Alberta Demographic Estimates 48_CD_DR_AG_2002_2024.xlsx and DMTI_December2024_Education.xlsx.

Alberta students who are identified as having a moderate or severe cognitive disability or a severe multiple disability are not included in the annual dropout rate.

Annual dropout rate is calculated by dividing the number of students who have dropped out of school (adjusted for attrition) by the number of 14- to-18-year-old students who were registered in the Kindergarten to Grade 12 system in the previous school year (the age specific cohort), less attrition as shown in the formula below:

Count of Students who Drop Out (adjusted for attrition) / (Count of 14-18 Year Old Students in One Year (Age Specific Cohort) — Attrition) = Annual Dropout Rate

High School Completion Rates

The high school completion rate reports the percentage of Alberta students in public, separate, francophone, charter and accredited funded independent (private) schools who, within three, four and five years of entering Grade 10:

- received an Alberta High School Diploma, an Alberta High School Equivalency Diploma (General Education Development or Canadian Adult Education Credential), or the Certificate of High School Achievement (completion of Knowledge and Employability courses and the certificate requirements);
- entered an Alberta post-secondary program or an apprenticeship program; or
- passed a minimum of five Grade 12 courses, including a Language Arts diploma examination course and three other diploma examination courses.

Data for this measure are from Alberta Education and Alberta Advanced Education systems. The provincial rate is calculated by dividing the number of high school completers, as defined above, by the number of students in the Grade 10 cohort, adjusted for attrition, as shown in the formula below.

$$\left(\begin{array}{c} \text{High School} \\ \text{Completers} \end{array} \right) / \left(\begin{array}{c} \text{Grade 10} \\ \text{Cohort} \end{array} - \begin{array}{c} \text{Attrition} \\ \text{Factor} \end{array} \right) = \begin{array}{c} \text{High School} \\ \text{Completion} \\ \text{Rate} \end{array}$$

The tracking of Grade 10 students excludes some students, such as those identified as having a severe or moderate cognitive disability or a severe multiple disability.

The educational attainment of Albertans aged 25-34 is derived from Statistics Canada Labour Force Survey, special tabulation for Alberta Education.

High School to Post-Secondary Transition Rates

The high school to post-secondary transition rate reports the percentages of Alberta students in public, separate, francophone, charter and accredited independent (private) schools who, within four and six years of starting Grade 10:

- enrolled in a credit program, part-time or full-time, in an Alberta post-secondary institution; or
- registered in an apprenticeship program other than the Registered Apprenticeship Program for high school students.

Alberta students are tracked using data from the Alberta Education and the Alberta Advanced Education systems. The high school to post-secondary transition rates include adjustments for attrition and for attendance at post-secondary institutions out of province.

The High School to Post-Secondary Transition Rate is calculated by dividing the number of students who enter post-secondary programs by the number of students in the Grade 10 cohort, adjusted for attrition, as shown in the formula below.

$$\left(\begin{array}{c} \text{In-Province} \\ \text{Post-Secondary} \\ \text{Attendees} \end{array} + \begin{array}{c} \text{Estimate of} \\ \text{Out-of-Province} \\ \text{Post-Secondary} \\ \text{Attendees} \end{array} \right) / \left(\begin{array}{c} \text{Grade 10} \\ \text{Cohort} \end{array} - \begin{array}{c} \text{Attrition} \\ \text{Factor} \end{array} \right) = \begin{array}{c} \text{Transition} \\ \text{Rate} \end{array}$$

The tracking of Grade 10 students excludes some students, such as those identified as having a severe or moderate cognitive disability or a severe multiple disability.

Attrition Adjustment

Attrition estimates are applied to all the four student outcomes measures – the High School Completion Rate, the Post-Secondary Transition Rate, the Dropout Rate and the Diploma Examination Participation Rate.

Attrition is the estimate of the number of students from the Grade 10 cohort who leave the province or die in the years subsequent to the start of Grade 10. The attrition estimate is based on the following factors:

- a) mortality;
- b) emigration;
- c) interprovincial out migration;
- d) an estimate of the percentage of 16-, 17-, and 18-year-olds who are enrolled in school (school participation rate); and
- e) a downward adjustment to account for youth who are not in school.

The provincial attrition estimate aggregates census division level data from Alberta Demographic Estimates 48_CD_DR_AG_2002_2024.xlsx.

Out-of-Province Post-Secondary Student Adjustment

Alberta Education does not specifically track Alberta students who participate in post-secondary programs outside of Alberta. An estimate of the number of students who have left the province to pursue post-secondary education is therefore factored into the high school to post-secondary transition rate.

The out-of-province estimate uses aggregate counts of Alberta students receiving financial assistance for studies both in-province and out-of-province based on data from Advanced Education's Students Finance System (SFS) and the Data Collection and Reporting (DCAR) system. The premise is that in any given year, the percentage of students from the Grade 10 Cohort attending post-secondary programs out-of-province is similar to the percentage of students receiving financial assistance for study out-of-province.

Provincial Achievement Tests

2024-25 provincial achievement test results will be available in fall of 2025 and published in the Annual Report Update.

Students in grades 6 and 9 write provincial achievement tests annually in English Language Arts and Literature, Mathematics, Science and Social Studies. The achievement test results for grades 6 and 9 provide information on how well Alberta students are meeting provincial standards in the core academic subjects. Tests are developed and administered by teachers and educators and are based on the provincial curriculum. Results are reported in relation to the acceptable standard and standard of excellence.

A student achieving the acceptable standard in a specific grade shows an adequate understanding of the core knowledge and adequate basic skills essential to that course. A student achieving the standard of excellence consistently shows a deeper understanding of the concepts of the course by demonstrating an ability to integrate information and evaluate it from various points of view.

For each achievement test, the cut scores for the acceptable standard and the standard of excellence are set initially by a standard-setting committee of about 20 teachers selected from across the province using the Modified Angoff and Bookmark Standard Setting Procedures. These procedures use teachers' judgment to determine a minimum number of items a student must answer correctly – the cut score – to achieve each standard. In subsequent years, the cut scores for each test are adjusted through test equating. This ensures

the standards remain constant even if test difficulty varies slightly from year to year. Whenever curriculum is revised, the standard-setting process is done again.

Not all students write the provincial achievement tests. Achievement test results are not available for students who:

- were absent;
- were excused from writing by the superintendent because participation would be harmful to the student or the student could not respond to the test instrument; or
- wrote but whose results were withheld or invalidated.

It is possible that some of these students, under different circumstances, could have demonstrated achievement of standards on the test.

Participation rates in achievement tests are calculated by dividing the number of students in the grade who wrote the test by the sum of total enrolment in the grade plus the ungraded students who are in the corresponding year of schooling.

Provincial overall results in Language Arts, Mathematics, Social Studies and Science present weighted averages based on the number of students enrolled in each course. Results for Mathematics, Sciences and Social Studies include results for both English and French versions of the tests. Test results and participation are recorded and aggregated in ministry systems. Provincial, school authority and school results are available at [provincial achievement tests](#).

Diploma Examinations

2024-25 diploma examination results will be available in fall 2025 and published in the Annual Report Update.

Examinations are administered in all diploma examination courses in January, June and August each year. Examinations are administered in selected courses in November and April. Provincial assessments are meant to complement but not replace day-to-day classroom assessment. Results on diploma examinations show how well Alberta students in public, separate, francophone, charter and accredited independent (private) schools are meeting provincial expectations as outlined in the Programs of Study. Examination items are developed and standards are established by committees of teachers. The examination design is vetted through committees of stakeholders and by a standard-setting committee of teachers.

A test equating initiative has been phased in for the diploma examination program so that over time examinations are consistent and the results are comparable. The multiple-choice portion of the examinations contains a set of items common to administrations in subsequent years. By comparing the achievement of students writing in a baseline session with those writing in any subsequent administration on the common items and on the unique items, Alberta Education is able to determine whether or not the examinations are of equal difficulty. Student scores on the subsequent examinations can then be equated back to the baseline examinations to remove any influence that differences in examination difficulty may have on student scores.

Through equating, test results for a particular course are based on an identical standard and, consequently, can be directly compared over time. As a result of implementing the equating process, diploma examination results are comparable over time as follows:

- Biology 30, English Language Arts 30-1, and English Language Arts 30-2 since 2005-06;
- Science 30 and Chemistry 30 since 2010-11;
- Social Studies 30-2 since 2011-12;
- Social Studies 30-1 since 2012-13;
- Physics 30 since 2013-14; and
- Mathematics 30-1 and 30-2 since 2016-17.

Diploma examination results are reported in relation to the acceptable standard and the standard of excellence. Results for Mathematics, Sciences and Social Studies include results for both English and French versions of the tests. Provincial overall results present weighted averages based on the numbers of students achieving standards in all diploma examinations. Students achieving the acceptable standard demonstrate that they have met the basic requirements of the course. A mark of 50 per cent on the examination represents the acceptable standard in a diploma examination course. A mark of 80 per cent on the examination represents the standard of excellence and indicates the student has demonstrated performance significantly beyond the minimum requirements of the course. The weighting of diploma exams returned to 30% on September 1, 2023 and the school-awarded mark is worth 70%.

Diploma examination results are recorded and aggregated in ministry systems. Provincial, school authority and school results reports are available at [Diploma exams](#).

Reporting Entity and Method of Consolidation

The financial information is prepared in accordance with government's stated accounting policies, which are based on Canadian Public Sector Accounting Standards.

The reporting entity is the ministry for which the Minister is accountable. The accounts of the ministry, which includes the department and entities making up the ministry, are consolidated using the line-by-line method.

Under this method, accounting policies of the consolidated entities are adjusted to conform to those of the government and the results of each line item in their financial statements (revenues, expenses, assets, and liabilities) are included in government's results. Revenue and expense, capital, investing and financing transactions and related asset and liability balances between the consolidated entities have been eliminated.

A list of the individual entities making up the ministry are shown on the "Management's Responsibility for Reporting" statement included in this annual report.

Revenue and Expense Highlights

Revenues

- Revenues totaled \$3.9 billion in 2024-25 before inter-ministry consolidation adjustments, an increase of \$348.5 million from 2023-24. This is primarily due to higher property tax revenues, higher rates of return in investment income and revenues generated from fundraising, gifts and donations resulting from higher enrolment. Revenues were \$196.2 million higher than budget.
- Education property taxes totaled \$2.8 billion, an increase of \$270.8 million from 2023-24, primarily due to higher assessment values for 2024 tax year compared to 2023 tax year. The increase from budget is due to timing, because tax rates are assessed on calendar year by Municipal Affairs, however, they are reported on fiscal year by Treasury Board and Finance.
- Transfers from the Government of Canada of \$147.1 million which includes revenues recognized for \$125.8 million from school boards to support First Nations, Métis and Inuit students' tuition fees and \$21.3 million federal funding provided to support French Language programs.
- Total Premiums, Fees and Licences revenues were \$213.1 million, an increase of \$16.4 million over the prior year actual results due to increased enrolment. An increase in fees were collected for school activities, extracurricular fees, travel, field trips, transportation and lunch supervision.
- Investment income amounted to \$61.3 million, an increase from the prior year by \$7.9 million due to higher rates of return.
- Internal Government Transfers totaled \$364.9 million, an increase of \$49 million from the budget and \$43.3 million from prior year actuals. This is primarily due to an increase in revenues recognized with Alberta Infrastructure for the completion of school building projects and revenues recognized from Recovery Alberta for health programs in schools promoting mental health in children and youth.
- Fundraising, Gifts, and Donations were \$26.3 million higher than the budget and \$25.2 million higher than prior year results due to an increase in fundraising events held by schools and higher enrolment growth.
- Other Revenue was \$50.5 million higher than budget primarily due to higher than anticipated sundry revenues such as school rentals and other sales and services. Other Revenue was \$29.7 million lower compared to last year's actual results due to lower gains on sales of \$24.4 million, decrease in sales, rentals and services of \$3.6 million; decreased refunds of expenditures of \$4.2 million; offset by increases in inter-ministry revenues and other miscellaneous revenue of \$2.5 million.

Revenue and Expense Highlights (continued)

Expenses

- In 2024-25, the consolidated expenses for school boards and the Department of Education before inter-ministry consolidation adjustments were \$9.9 billion, an increase of \$436.1 million, or 4.6 per cent higher than the previous fiscal year.
- The increase was mainly due to:
 - An increase in ECS to Grade 12 Instruction costs of \$280.8 million resulting largely from increased enrolment that has led to increased costs for teachers and instruction support staff including educational assistant. Expenses have also increased due to increased services contract and supplies that support student learning;
 - An increase in student transportation costs of \$43.9 million is primarily due to enrolment growth. Increased spending is also attributed to higher insurance and contractor costs.
 - Accredited Private Schools increased by \$35.1 million due to an increase in approvals of new private schools and higher funding commitments under the funding model to address increases in enrolment for Accredited Private Schools;
 - An increase in operations and maintenance costs of \$27 million is primarily due to inflationary pressures that have led to increased utilities, natural gas, and insurance costs for schools;
 - School Facilities costs increased by \$26.6 million primarily due to the increase in amortization expenses due to more tangible capital assets and capital projects going into service for schools;
 - Governance and System Administration costs incurred by the school jurisdictions increased by \$16.1 million due to higher educational administration, board governance, and by-election costs than prior year;
 - Program Support Services increased by \$5.2 million primarily due to an increase in department spending on education system support;
 - Debt servicing costs increased by \$1.3 million and higher Ministry Support Services costs of \$0.1 million.

Revenue and Expense Highlights (continued)

Expenses (continued)

- Consolidated expenses were \$128.8 million more than budget. During the year, there was contingency funding of \$201.6 million provided to schools which is not included in the budget. The variance was mainly due to enrolment growth and increases in school activities:
 - Instruction expenses were \$83.8 million higher than expected due to increased enrolment. There have been increases in salaries, wages and benefits, services, contracts and supplies, substitute teaching costs, field trips and extracurricular activities;
 - Higher School Facilities costs of \$55.2 million primarily due to higher amortization expenses as more tangible capital assets and capital projects are going into service for schools;
 - A \$20.7 million increase in Accredited Private Schools and Early Childhood Service Operators funding due to an increase in approvals of private schools and higher funding commitments under the funding model to address increases in enrolment for Accredited Private Schools;
 - Operations and Maintenance were \$12.5 million higher than expected due to higher operating costs and maintenance of school buildings and increased utilities and insurance costs;
 - Debt Servicing costs are \$5.6 million higher due to the PS 3160 Public-private partnerships (P3) accounting policy restatement which is not reflected in the budget; and
 - Governance and Administration costs are higher by \$3.6 million.
- These were offset by lower expenditures than budget for:
 - Transportation costs which decreased by \$49.7 million in 2024-25. This is due to the optional implementation of the lower distance criteria and many school jurisdictions chose not to implement or were not able to build capacity and implement the changes in time, resulting in lower spending.
 - Program Support Services of \$2.5 million primarily due to department underspending in expenses related to Federal French Program and Education Services resulting from credit or recovery shortfalls and lower department amortization expense for systems development; and
 - Ministry Support Services costs that are lower by \$0.4 million.
- In the 2024-25 fiscal year, Alberta Education contributed \$363.5 million to the Alberta Teachers' Retirement Fund for the current service costs of teachers' pensions.

Breakdown of Revenues (unaudited)

The following information presents detailed revenues of the ministry. The objective of detailed revenues disclosure is to provide information that is useful in understanding and assessing the financial impact of government's revenue raising and for enhancing legislative control.

- Education property taxes remained the largest contribution to the ministry's revenue. In 2024-25, education property taxes totaled \$2.8 billion, or 71.4 per cent, of the ministry's revenue.
- Other revenue totaled \$241.0 million. The Other revenue category includes other supplies and services revenue, rental revenues, gain on disposal of capital assets, and other miscellaneous revenues.

Expenses – Directly Incurred Detailed by Object (unaudited)

The following information presents expenses of the ministry that were directly incurred by object. The objective of disclosure of expenses by object is to provide information that is useful in evaluating the economic impact of government acquiring or consuming various types of resources.

- The ministry's largest operating expense was salaries, wages and employee benefits of \$7.0 billion, which accounted for 70.8 per cent of the total operating expenses.
- Supplies and services of \$1.7 billion (17.4 per cent) included contracts and contract services and materials and supplies.
- Grant expenses totaled \$517.1 million (5.2 per cent) and represented primarily grants to Private School Authorities.
- The remainder of ministry expenses were amortization of tangible capital assets \$542.2 million (5.5 per cent) and debt servicing together with consumption of inventories of supplies and other expense of \$113.1 million (1.1 per cent).

Tangible Capital Assets (unaudited) (continued)

- Buildings and construction in progress remained the largest component of tangible capital assets net book value. As of March 31, 2025, net book value of buildings and construction in progress totaled \$9.4 billion, or 94.6 per cent, of the total tangible capital assets net book value. Included in net book value of buildings and construction in progress are capital leases of \$78.8 million and construction in progress of \$663.2 million. No amortization is recorded on construction in progress until the asset is completed and in use.
- The remainder of ministry net book value of tangible capital assets is equipment and vehicles \$342.3 million, computer hardware and software \$72.0 million and land \$128.8 million.
- Alberta Education provided \$110.4 million in Capital Maintenance and Renewal (CMR) program funding for life-cycle maintenance of schools to ensure healthy and safe learning environments.

Comparison of Cost to Fair Value as of March 31, 2025

(in thousands)

- The total portfolio investment for 2025 was \$178.8 million at cost and \$180.6 million at fair market value. Interest-bearing securities and equities are the two largest types of portfolio investments.
- Interest-bearing securities include deposits, short-term securities, bonds and mortgages. Equities include Canadian equities and global developed equities.
- In 2025, the fair market value of interest-bearing securities was lower than cost by \$1.9 million or 1.18 per cent while the fair market value of equities was greater than cost by \$3.6 million or 26.73 per cent.

Other Financial Information

Statement of Credit or Recovery (unaudited)

Department of Education

Year Ended March 31, 2025

(in thousands)

The following has been prepared pursuant to Section 24(3) of the *Financial Administration Act*.

	Authorized Spending	Actual Revenue Recognized	Unearned Revenue/ Deferred Contributions	Total Amount Received/ Receivable	(Shortfall) / Excess ⁽¹⁾
Expense Amounts					
1 French Language Program	\$ 21,000	\$ 19,841	\$ -	\$ 19,841	\$ (1,159)
2 Education Services	5,225	3,133	-	3,133	(2,092)
	<u>\$ 26,225</u>	<u>\$ 22,974</u>	<u>\$ -</u>	<u>\$ 22,974</u>	<u>\$ (3,251)</u>

(1) Shortfall is deducted from current year's corresponding funding authority.

1. French Language Program: Funding is received from the federal government to support french minority language and second language education programs.

2. Education Services: Revenue is generated from license agreements and administration fees for education services. This includes diploma exam re-writes, educational print services, high school transcriptions, teacher certifications and license agreements for achievement tests and diploma exams.

(1) As per "Expense Vote by Program", "Capital Investment Vote by Program" and "Financial Transactions Vote by Program" page 67 to 74 of the 2024-25 Government Estimates.

(2) Per the supplementary Supply Estimates approved on March 20, 2025.

(3) Adjustments include encumbrances, capital carry over amounts, transfers between votes, credit or recovery increases approved by Treasury Board, and credit or recovery shortfalls. An encumbrance is incurred when, on a vote-by-vote basis, the total of actual disbursements in the prior year exceed the total adjusted estimate. All calculated encumbrances from the prior year are reflected as an adjustment to reduce the corresponding voted estimate in the current year. Adjustments also include supply vote transfers for "Contingency" as approved by the Lieutenant Governor in Council under the direction of the Minister of Finance. The Contingency supply vote consists of a provisional funding authority transferable to any ministry. Upon approval by the Lieutenant Governor in Council, the President of Treasury Board and Minister of Finance may either spend or transfer all or a portion of this supply vote to another Minister for public emergencies, disasters or unanticipated costs. As per Order in Council (OC) 058/2025, contingency funding of \$201,646 was approved for the purposes of Operating Support for School Jurisdictions, Accredited Private Schools and Early Childhood Service Operators, and public service compensation related to collective bargaining.

(4) Actuals exclude non-voted amounts as no cash disbursement is required (non-cash amounts), or because the Legislative Assembly has already provided the funding authority pursuant to a statute other than an appropriation act. Non-cash amounts (such as amortization, valuation adjustments, and other provisions), are excluded as these amounts do not require any expenditure or payment of public money. Year-end expense accruals & payables which will immediately require a cash outlay (payment of public money) to settle or otherwise extinguish the liabilities are included in Actuals.

Ministry of Education

School Jurisdictions adjusted accumulated reserves from operations (ASO) and capital reserves (in thousands)

	2024	2023 Restated	Change
Operating Reserves	\$ 301,135	\$ 334,495	\$ (33,360)
Capital Reserves	\$ 301,855	\$ 290,086	\$ 11,769
	<u>\$ 602,990</u>	<u>\$ 624,581</u>	<u>\$ (21,591)</u>

- School jurisdictions' ASO, also referred to as operating reserves decreased by \$33.4 million, or 10.0 per cent, from \$334.5 million in the 2022-23 (restated) school year to \$301.1 million in the 2023-24 school year.
- School jurisdictions' capital reserves have increased by \$11.8 million, or 4.1 per cent, from \$290.1 million in 2022-23 (restated) to \$301.9 million in 2023-24.
- Section 143 of the Education Act requires accumulated capital reserves to be used for capital expenditures only. Transfers from capital reserves to cover operations are not permitted without prior ministerial approval.
- To ensure that students benefit from grant funding being spent in the classroom in the year it is received, there is a maximum operating reserve limit. Any operating reserve balance held over the maximum limit based on the August 31, 2025 audited financial information will have funding reduced by an equivalent amount in the following school year. The Minister may grant an exemption to the maximum limit if a request is made following the criteria outlined in the *Funding Manual for school authorities 2024/25 school year*.
- Operating reserves are a key financial health indicator of school jurisdictions. Reserves are reviewed and monitored by Alberta Education during the annual review processes of the Spring Budget Report and Audited Financial Statements. The Financial Reporting and Accountability branch examines, based on developed criteria, the reasonability of the school jurisdictions' operating reserve balances as a per cent of the annual operating expenditures.
- When operating reserves for a school jurisdiction are below zero, they are considered to be in an accumulated deficit from operations position and an approved Deficit Elimination Plan is required. For the year ending August 31, 2024, three school jurisdictions had an accumulated deficit from operations.

Report on the Financial Statements

Opinion

I have audited the financial statements of the Alberta School Foundation Fund (the Fund), which comprise the statement of financial position as at March 31, 2025, and the statements of operations, change in net financial assets, and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at March 31, 2025, and the results of its operations, its changes in net financial assets, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Basis for opinion

I conducted my audit in accordance with Canadian generally accepted auditing standards. My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of my report. I am independent of the Fund in accordance with the ethical requirements that are relevant to my audit of the financial statements in Canada, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Other information

Management is responsible for the other information. The financial statements of the Fund are included in the *Annual Report of the Ministry of Education*. The other information comprises the information included in the *Annual Report of the Ministry of Education* relating to the Fund, but does not include the financial statements of the Fund and my auditor's report thereon. The *Annual Report of the Ministry of Education* is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work I will perform on this other information, I conclude that there is a material misstatement of this other information, I am required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless an intention exists to liquidate or to cease operations, or there is no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

Alberta School Foundation Fund

Notes to the Financial Statements

March 31, 2025

Note 1 Authority

The Alberta School Foundation Fund (the Fund) operates under the authority of the *Education Act*, Statutes of Alberta 2012, Chapter E-0.3.

The Fund makes requisitions to municipalities based on the equalized assessment of real property in Alberta and mill rates established by the Lieutenant Governor in Council. The purpose of the Fund is to provide funding to school boards based on an equal amount per eligible student. The Fund is exempt from income taxes under the *Income Tax Act*.

Note 2 Summary of Significant Accounting Policies and Reporting Practices

These financial statements are prepared in accordance with Canadian Public Sector Accounting Standards.

(a) Reporting Entity

The reporting entity is the Fund, which is part of the Ministry of Education and for which the Minister of Education is accountable.

(b) Basis of Financial Reporting

Revenues

Revenue earned from Education property tax to be collected (or the requisition amount) is based on 29.54 per cent (2024: 28.30 per cent) of the total budgeted operating expense of the education system. All revenues are reported on the accrual basis of accounting. The amount for the property tax relief programs is deducted against education property tax revenue.

Revenues from transactions with performance obligations are recognized when the Fund provides the promised goods and/or services to the payor. Revenues from transactions with no performance obligations are recognized at their realizable value when the Fund has the authority to claim or retain an inflow of economic resources and identifies a past transaction or event that gives rise to an asset.

Investment income

Investment income includes the interest income earned on cash and cash equivalents and is recognized in the period in which income is earned.

Expenses

Expenses are reported on an accrual basis. Expenses are those costs for which the Fund has primary responsibility and accountability, as reflected in the Government's budget documents.

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 2 Summary of Significant Accounting Policies and Reporting Practices (continued)

(b) Basis of Financial Reporting (continued)

Expenses (continued)

(in thousands)

Opted out separate school boards which have passed a resolution pursuant to Section 164(2) of the *Education Act* have the authority to requisition and collect levies from municipalities on their declared residential and non-residential property at a rate not less than the provincial rate applied in that municipality. As a result, these boards participate partially in the Fund.

Payments to school boards include \$450,193 (2024: \$407,233) paid to opted out separate school boards to increase their funding to a level the boards would otherwise receive if participating partially in the Fund.

Bad Debt Expense

The Minister approved the non-payment of property tax in the amount of \$469 (2024: \$132) for the County of Minburn on December 2, 2024, pursuant to section 167(11) of the *Education Act*.

Valuation of Financial Assets and Liabilities

The organization's financial assets and liabilities are generally measured as follows:

<u>Financial Statement Component</u>	<u>Measurement</u>
Cash and cash equivalents	Cost
Accounts receivable	Lower of cost or net recoverable value
Accounts payable and other accrued liabilities	Cost

Financial Assets

Financial assets are assets that could be used to discharge existing liabilities or finance future operations and are not for consumption in the normal course of operations. Financial assets are the Fund's financial claims on external organizations and individuals as well as cash at year end.

Accounts receivable

Accounts receivable are recognized at the lower of cost or net recoverable value. A valuation allowance is recognized when recovery is uncertain.

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 2 Summary of Significant Accounting Policies and Reporting Practices (continued)

(b) Basis of Financial Reporting (continued)

Liabilities

Liabilities are present obligations of the Fund to external organizations and individuals arising from past transactions or events occurring before year end, the settlement of which is expected to result in the future sacrifice of economic benefits. They are recognized when there is an appropriate basis of measurement and management can reasonably estimate the amounts.

Net Assets

Net assets represents the difference between the carrying value of assets held by the Fund and its liabilities. Net assets are restricted by section 169(2) of the *Education Act* in that money in the Fund is payable only to school boards except when a payment to General Revenues is required to repay advances and make interest payments, or to refund municipalities for overpayments made to the Fund.

Financial Instruments

Financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and other accrued liabilities. All financial instruments are recorded at cost or carrying value. Interests attributable to financial instruments are reported in the statement of operations.

The Fund does not have any transactions involving financial instruments that are in the fair value category and has no foreign currency transactions and thus no remeasurement gains and losses, and therefore no statement of remeasurement gains or losses is included in these financial statements.

Measurement Uncertainty

Measurement uncertainty exists when there is a variance between the recognized or disclosed amount and another reasonably possible amount (see Note 5, 7 and 8).

Note 3 Future Changes in Accounting Standards

On April 1, 2026, the Fund will adopt the following new conceptual framework and accounting standard approved by the Public Sector Accounting Board:

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 3 Future Changes in Accounting Standards (continued)

- The Conceptual Framework for Financial Reporting in the Public Sector**
 The Conceptual Framework is the foundation for public sector financial reporting standard setting. It replaces the conceptual aspects of Section PS 1000 Financial Statement Concepts and Section PS 1100 Financial Statement Objectives. The conceptual framework highlights considerations fundamental for the consistent application of accounting issues in the absence of specific standards.
- PS 1202 Financial Statement Presentation**
 Section PS 1202 sets out general and specific requirements for the presentation of information in general purpose financial statements. The financial statement presentation principles are based on the concepts within the Conceptual Framework.

Management is currently assessing the impact of the conceptual framework and the standard on the financial statements.

Note 4 Cash and Cash Equivalents

Cash and cash equivalents are comprised of deposits in Consolidated Liquidity Solution (CLS). A CLS participant is paid interest on monthly basis on their cash balance at an interest rate based on 12 week rolling average of the Province's 3 month cost of borrowing.

Note 5 Accounts Receivable (in thousands)

Accounts receivable are unsecured and non-interest bearing.

	2025			2024	
	Gross amount	Allowance for doubtful accounts	Net recoverable value	Net recoverable value	
Requisitions from municipalities	\$ 4,394	\$ (4,376)	\$ 18	\$ 109	
Interest receivable	66	-	66	48	
	<u>\$ 4,460</u>	<u>\$ (4,376)</u>	<u>\$ 84</u>	<u>\$ 157</u>	

Note 6 Related Party Transactions (in thousands)

Operating costs incurred in the administration of the Fund borne by other ministries are not reflected in these financial statements. The Fund is prohibited from paying administration costs under section 169(3) of the *Education Act*.

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 6 Related Party Transactions (continued) (in thousands)

Under the provisions of the *Financial Administration Act*, the Fund receives monthly advances from General Revenues to make payments to school boards in accordance with section 169(2) of the *Education Act*. The Fund repays the advances quarterly throughout the year as monies are received from municipalities and opted out separate school boards. The Fund pays interest on the advances at an average rate of 3.97 per cent (2024: 5.26 per cent). Interest is calculated on a pro rata basis for the number of days the advances are out.

The Fund earns interest on the daily closing cash balance, and interest is paid monthly by Treasury Board and Finance through General Revenue Fund (GRF).

The Fund distributes monies to school boards based on an equal amount per eligible student.

The following describes the related party transactions of the Fund:

	2025	2024
Interest income	\$ 780	\$ 681
Expenses		
Payments to school boards ^(a)	2,472,579	2,263,422
Interest on advances from general revenue	12,330	14,448
	<u>\$ 2,484,909</u>	<u>\$ 2,277,870</u>
Receivables ^(b)	\$ 66	\$ 48

(a) These amounts do not include net payments to the two school boards in Lloydminster, Saskatchewan totaling \$6,156 (2024: \$5,975), as they are not related parties.

(b) This amount is an interest due from Treasury Board and Finance (Note 5).

Note 7 Accounts Payable and Other Accrued Liabilities (in thousands)

Accrued Liabilities

(a) In November 2017, the Provincial Education Requisition Credit (PERC) program was created to provide hardship relief for municipalities across Alberta who are unable to collect education property taxes owing on delinquent oil and gas properties.

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 7 Accounts Payable and Other Accrued Liabilities (continued)
(in thousands)

Accrued Liabilities (continued)

(a) (continued)

The property tax relief program is retroactive to the 2015 tax year and was to be in place until 2019 but has been extended to the 2025 tax year in accordance with Section 167 (11) of the *Education Act*. The Minister of Education approved the recommendation from Municipal Affairs to approve 44 (2024: 34) municipalities' PERC applications for a total PERC claim of \$4,289 (2024: \$1,799). The approved claim amount was adjusted to reflect \$0 (2024: \$234) certain municipalities repayment of past PERC claims. The total program maximum is \$3,000 (2024: \$15,000) per application year. The PERC claims for 2025 exceeded the maximum amount and the overage is funded through net assets. Tax relief payments were not provided during the fiscal year so were accrued to be applied in June 2025 invoices.

(b) If it is determined that a municipality has paid an amount into the Fund in excess of the sum that is required to be paid, the Minister of Education may order the repayment of the excess to the municipality. The amount required to be paid is equivalent to the sum of the applicable education property tax rates applied to the equalized assessment of the municipality for residential and farm land, non-residential property and machinery and equipment. At March 31, 2025 an amount of \$0 was owed to a municipality (2024: \$185).

The Fund has recorded an allowance for assessment adjustments and appeals of \$442 (2024: \$196). The allowance is based on a 5 year average of prior year refunds and adjustments at March 31, 2025.

Note 8 Contingent Liabilities

Contingent liabilities are possible obligations that may result in the future sacrifice of economic benefits arising from existing conditions or situations involving uncertainty.

The Fund is not involved in any legal matters where damages are being sought.

Note 9 Financial Risk Management

The Fund has the following instruments: cash and cash equivalents, accounts receivable, accounts payable and other accrued liabilities.

The Fund is not exposed to any significant risks (interest, liquidity and credit) associated with its use of financial instruments.

Alberta School Foundation Fund

Notes to the Financial Statements (continued)

March 31, 2025

Note 9 Financial Risk Management (continued)

(a) Interest Rate Risk

Interest rate risk is the risk that rate of return and future cash flows of the Fund's cash and cash equivalents held in the bank account will fluctuate because of changes in market interest rates. As the Fund holds bank deposits that are interest bearing and accrued liabilities which are non-interest bearing, the Fund is not exposed to significant interest rate risk relating to its financial assets and liabilities.

(b) Liquidity Risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities. Before collecting quarterly taxes, the Fund borrows money in order to make monthly payments to school boards. Once the taxes are collected, the borrowed money is repaid. Liquidity risk is measured by reviewing the Fund's future net cash flows for the possibility of negative net cash flow. The Fund manages the liquidity risk resulting from its accounts payable obligations by maintaining cash and cash equivalents resources in interest bearing bank deposits.

(c) Credit Risk

Counterparty credit risk is the risk of loss arising from the failure of a counterparty to fully honour its financial obligations with the Fund. The Fund is not exposed to any significant credit risk from potential non-payment of accounts receivable.

Note 10 Budget

The budget amounts in these financial statements are taken from the 2024/2025 Government Estimates approved on March 28, 2024.

Note 11 Approval of Financial Statements

The deputy minister and the senior financial officer approved these financial statements.

Ministry Funding Provided to School Jurisdictions - Unaudited (continued)

Year ended March 31, 2025

- (a) The Funding Framework includes grants outlined in Section C – “Funding for School Jurisdictions” of the *Funding Manual for School Authorities*. This includes Base Instruction grants, Program Supports and Services grants, School-based grants, Community-based grants and Jurisdiction-based grants. These amounts are reflected in funding profiles which are provided to school jurisdictions on an annual basis.
- (b) School Facilities Infrastructure consists of funding provided to school jurisdictions for school building capital projects. Operations and Maintenance funding for school facilities is included under the Funding Framework.
- (c) Provincial and Other Initiatives provide funding to school authorities for, but not limited to, Federal Language programs, curriculum resource funding, dual credit funding, literacy and numeracy support, low incidence supports and services and mental health in schools pilot grant.
- (d) Opted-out separate school boards, which have passed a resolution pursuant to section 164(2) of the *Education Act*, have the authority to requisition and collect from municipalities levies on their declared residential and non-residential property at a rate of not less than the provincial rate applied in that municipality. These amounts collected from municipalities are shown as a reduction to funding from the Ministry.
- (e) Pension Costs are the cost of Ministry contributions for teachers of school jurisdictions and employer contributions for current service employees during the fiscal year.
- (f) The Funding Framework is supported by education property tax directly requisitioned by opted-out separate school boards from their municipalities as shown in column d.

Statement of Remissions, Compromises, and Write-Offs - Unaudited

Year Ended March 31, 2025

The following statement has been prepared pursuant to Section 23 of the *Financial Administration Act*. This statement includes all remissions, compromises, and write-offs made or approved during the period.

	<u>(in thousands)</u>
Write-Offs	
Department Accounts Receivable	\$ -
Alberta School Foundation Fund Accounts Receivable	469
School Jurisdiction Accounts Receivable	361
Total remissions, compromises, and write-offs ⁽¹⁾	<u>\$ 830</u>

(1) No remission or compromise expenses were incurred.

Unaudited Summary of School Jurisdictions' Financial Information

(includes School Boards and Charter Schools)

Unaudited Summary of School Jurisdictions' Statements of Financial Position and Net Assets

Unaudited Summary of School Jurisdictions' Statements of Operations and Changes in Financial Position

Summary of Significant Accounting Policies

Disclosure of Salaries and Benefits for Superintendent Positions

For additional information:

The audited financial statements of school jurisdictions are available on the Government of Alberta's website at <https://www.alberta.ca/k-12-education-financial-statements.aspx/>.

The Unaudited Summary reports of School Jurisdictions' Statements of Financial Position and Net Assets and School Jurisdictions' Statements of Operations and Changes in Financial Position include draft reporting for The Northlands School Division. The Division's statements are in process and are not yet finalized.

Summary of Significant Accounting Policies

School jurisdictions prepare their financial statements in accordance with Canadian public sector accounting standards (PSAS). The following are significant accounting policies followed by these entities:

- Revenues and expenses are recognized on an accrual basis.
- Revenues for the provision of goods and services are recognized in the period in which the goods are provided or the services rendered.
- Unrestricted contributions are recognized as revenues when received or receivable.
- Capital grants that give rise to an obligation to third parties as to use and control are recorded as spent deferred capital contributions (SDCC). SDCC is a component of deferred contributions in the Statements of Financial Position of the school jurisdictions and is recognized as revenue in the period in which the related amortization expense of the funded asset is recorded.
- Contributions for capital assets that will not be amortized, such as land, are recorded as revenue, unless the asset must be held for restricted purposes. If donated land must be used for restricted purposes, revenue is deferred.
- Capital asset additions are recorded at cost and amortized based on amortization policies set by school jurisdictions.
- Donated assets are recorded at fair value where fair value can be reasonably determined.
- Inventories held for resale are valued at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis or weighted average cost.
- Investments are recorded at fair value.
- Asset retirement obligations (capitalized and liabilities) are recorded at cost or present value technique. Capitalized asset retirement obligations additions are then amortized based on amortization policies set by school jurisdictions.

Management's Responsibility for Financial Reporting

The financial statements of the Alberta Teachers' Retirement Fund Board and all information in the Annual Report are the responsibility of management and have been approved by the Board. The financial statements have been prepared in accordance with Canadian accounting standards for pension plans. Where necessary, management has made informed judgments and estimates of the outcome of events and transactions, with due consideration to materiality. Financial and operating data presented in the Annual Report, where applicable, is consistent with the financial statements.

For the integrity of financial information included in this Annual Report, management relies on the organization's system of internal controls and supporting procedures. This system has been established to ensure within reasonable limits that assets are safeguarded, transactions are executed in accordance with management's authorization, and accounting records are properly maintained. Controls include high-quality standards for hiring and training employees, an organizational structure that provides a well-defined division of responsibilities and accountability for performance, and the communication of policies and guidelines throughout the organization.

Ultimate responsibility for the financial statements rests with the Board, which is assisted in its responsibilities by the staff and the Audit and Finance Committee. The Alberta Teachers' Retirement Fund Board's external auditor, the Auditor General, has conducted an independent examination of the financial statements in accordance with Canadian generally accepted auditing standards, performing such tests and other procedures as he considers necessary to express the opinion in his report. The Auditor General has full, unrestricted access to discuss the audit and related findings regarding the integrity of financial reporting, and the adequacy of internal control systems.

Internal Controls Over Financial Reporting

ATRF business plans include action plans to enhance governance and management of internal control processes and systems. This is aimed at providing an appropriate level of due diligence and assurance in our internal controls, financial operations, reporting, and information systems.

ATRF is not required by law or regulation to perform this annual evaluation. We have chosen to perform this evaluation and meet these standards as a part of our commitment to strong corporate governance and accountability.

The Chief Executive Officer and the Vice President of Finance are responsible for the design and maintenance of Internal Control over Financial Reporting, to provide reasonable assurance that it is reliable and that the preparation of the financial statements conforms with Canadian Accounting Standards for pension plans. They are also responsible for the design and maintenance of disclosure controls and procedures to provide reasonable assurance that all material information is gathered and reported to management on a timely basis.

We have completed the 2023-24 fiscal year evaluation of the effectiveness of our internal control over financial reporting and disclosure controls and procedures. Based upon the results of the evaluation, the Chief Executive Officer and Vice President, Finance have concluded that internal control over financial reporting and disclosure controls and procedures are properly designed and operated effectively throughout the year.

There were no significant changes made in internal controls over financial reporting during the year ended August 31, 2024, that materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

Independent Auditor's Report

To the Alberta Teachers' Retirement Fund Board

Report on the Financial Statements

Opinion

I have audited the financial statements of Alberta Teachers' Retirement Fund Board, which comprise the statement of financial position as at August 31, 2024, and the statements of changes in net assets available for benefits, and changes in pension obligations for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Alberta Teachers' Retirement Fund Board as at August 31, 2024, and the changes in net assets available for benefits, and changes in its pension obligations for the year then ended in accordance with Canadian accounting standards for pension plans.

Basis for opinion

I conducted my audit in accordance with Canadian generally accepted auditing standards. My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of my report. I am independent of Alberta Teachers' Retirement Fund Board in accordance with the ethical requirements that are relevant to my audit of the financial statements in Canada, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Other information

Management is responsible for the other information. The other information comprises the information included in the *Annual Report*, but does not include the financial statements and my auditor's report thereon. The *Annual Report* is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work I will perform on this other information, I conclude that there is a material misstatement of this other information, I am required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian accounting standards for pension plans, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing Alberta Teachers' Retirement Fund Board's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless an intention exists to liquidate or to cease operations, or there is no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Alberta Teachers' Retirement Fund Board's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Alberta Teachers' Retirement Fund Board's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Alberta Teachers' Retirement Fund Board's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause Alberta Teachers' Retirement Fund Board to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

Actuaries' Opinion

Aon has been engaged by the Alberta Teachers' Retirement Fund Board ("ATRF") to prepare actuarial extrapolations for the *Teachers' Pension Plan* and the *Private School Teachers' Pension Plan* (the "Plans") as at August 31, 2024 based on the August 31, 2023 valuations. The purpose of these extrapolations is to determine the necessary actuarial information for financial statement reporting for the Plans in accordance with Section 4600 of the CPA Canada Handbook ("Section 4600").

Our valuations and extrapolations have been prepared based on:

- membership data provided by ATRF as at the most recent reported date by the respective employers, projected to August 31, 2023 and adjusted to reflect anticipated new hires as at September 1, 2023;
- asset data provided by ATRF as at August 31, 2024;
- assumptions that we understand have been adopted as ATRF management's best estimates; and
- actuarial cost methods and asset valuation methods that are in accordance Section 4600.

Based on the work we have performed, including conducting reasonability tests on the membership and asset data, we have concluded that, in our opinion:

- the data is sufficient and reliable for the purpose of the valuations and extrapolations;
- the assumptions adopted as best estimate by ATRF's management are appropriate for the purpose of the valuations and extrapolations;
- the actuarial cost methods and the asset valuation methods employed are appropriate for the purpose of the valuations and extrapolations; and
- the valuations and extrapolations conform with the requirements of Section 4600.

While the actuarial assumptions used to estimate the Plans' liabilities represent ATRF management's best estimate of future events and market conditions at August 31, 2024, the Plans' future experience will differ from the actuarial assumptions. Emerging experience differing from the assumptions will result in gains or losses that will be revealed in future valuations and will affect the financial position of the Plans.

Our opinions have been given, and our valuations and extrapolations have been performed, in accordance with accepted actuarial practice in Canada.

Notes to the Financial Statements

August 31, 2024

NOTE 1 DESCRIPTION OF ATRF AND THE PLANS

a) ATRF – nature of operations

The Alberta Teachers' Retirement Fund Board ("ATRF"), established in 1939, a corporation under the authority of the *Teachers' Pension Plans Act*, Chapter T-1, RSA 2000, is the trustee and administrator of the Teachers' Pension Plan and the Private School Teachers' Pension Plan (the "Plans").

ATRF is responsible for establishing the Plans' funding policy and setting contribution rates, establishing the Statement of Investment Policies & Goals ("SIP&G") for the Plans' assets, providing pension benefit administration services to the Plan members and other stakeholders. The SIP&G describes policies that govern how ATRF's assets are to be invested. It defines the strategic asset allocation including well-defined asset categories, their performance benchmarks and risk profiles, and the long-term target proportion of total assets to be invested in each. The SIP&G also defines ATRF's guidance for both total investment risk and for AIMCo's latitude in implementing these policies.

ATRF is governed by a Board. One-half of the board members are nominated by the Finance Minister of the Government of Alberta and one-half by the Alberta Teachers' Association. All board members are appointed by Order in Council.

An amendment to the *Teacher's Pension Plans Act* came into force on November 22, 2019, requiring ATRF to engage Alberta Investment Management Corporation ("AIMCo") as the exclusive provider of investment management services to ATRF in respect of the Plans' assets. Effective October 1, 2021, ATRF transitioned the responsibility for investment management of the Plans' remaining assets to AIMCo.

b) The Plans – general description

The Plans are contributory defined benefit pension plans for all Alberta teachers employed in school jurisdictions and charter schools, as well as teachers employed by participating private schools. The Plans are sponsored by the Government of Alberta and the Alberta Teachers' Association, as representatives of the plan members. These plan sponsors are responsible for plan design, benefits and funding arrangements, and share in plan gains and losses. Design of the Plans' benefits are established by *The Teachers' and Private School Teachers' Pension Plan Regulation 203/1995, as amended* (the "Regulation").

The following descriptions of the Plans and their key attributes is a summary only. Refer to the Regulation and the Plans' text documents for a complete description of the Plans' benefits and obligations. Unless otherwise stated, all terms not defined in the following have the meaning ascribed to them in the Plans' documents.

Notes to the Financial Statements

August 31, 2024

NOTE 1 DESCRIPTION OF ATRF AND THE PLANS (CONTINUED)

c) Obligations relating to the period before September 1992

The Teachers' Pension Plan's assets and obligations related to pensionable service after August 31, 1992 (the "post-1992 period") have been accounted for separately from the assets and obligations related to pensionable service prior to September 1, 1992 (the "pre-1992 period") and, accordingly, these financial statements and notes include only post-1992 period transactions of the Teachers' Pension Plan and transactions of the Private School Teachers' Pension Plan.

Effective September 1, 2009, the Province of Alberta (the "Province") assumed full responsibility for obligations related to the Teachers' Pension Plan pre-1992 period pensionable service and provides the required amounts to ATRF to pay the obligations on a monthly basis (Note 9).

d) Contributions

The determination of the value of the benefits and the required contributions for the Plans is made on the basis of periodic actuarial valuations.

All teachers under contract with school jurisdictions and charter schools in Alberta are required to contribute to the Teachers' Pension Plan. Current service costs and related deficiencies are funded by equal contributions from the Province and the teachers. A component of the post-1992 contributions includes a cost-of-living adjustment ("COLA"), equating to 70% of the increase to the Alberta Consumer Price Index ("ACPI"). Teachers and the Province equally contribute to fund the COLA of 60% of the ACPI, with the additional COLA of 10% of the ACPI fully funded by the teachers.

Certain other designated organizations in Alberta also participate in the Teachers' Pension Plan under the same funding arrangements, except these organizations make the employer contributions rather than the Province.

Certain private schools participate in the Private School Teachers' Pension Plan. The structure for plan costs and related deficiencies are funded in equal contributions from the employers and the teachers. Similar to the Teachers' Pension Plan above, the teachers and the Province equally contribute to fund the COLA of 60% of the ACPI, with the additional COLA of 10% of the ACPI fully funded by the teachers.

Notes to the Financial Statements

August 31, 2024

NOTE 1 DESCRIPTION OF ATRF AND THE PLANS (CONTINUED)

The contribution rates for fiscal years ended August 31 are as follows:

	Teachers' Pension Plan		Private School Teachers' Pension Plan	
	2024	2023	2024	2023
Up to YMPE ¹	9.00%	9.00%	8.50%	8.50%
Above YMPE	12.86%	12.86%	12.15%	12.15%
Total Teachers' Contribution	10.32%	10.32%	9.95%	9.95%
Total Government/Employer Contribution	9.89%	9.89%	9.51%	9.51%

¹ YMPE: Year's Maximum Pensionable Earnings used by the Canada Pension Plan (2024: \$68,500, 2023: \$66,600)

e) Retirement pensions

Retirement pensions are based on the number of years of pensionable service and the average salary of the highest five consecutive years. Pensions are payable to teachers who retire after completion of at least five years of pensionable service, with certain restrictions, and who have attained age 65. Unreduced pensions are also payable to teachers who have reached at least age 55 and the sum of their age and service equals at least 85. With certain restrictions, reduced pensions are payable to teachers who retire at or after age 55 with a minimum of five years of pensionable service.

f) Disability benefits

Teachers who are disabled after August 31, 1992 are credited with pensionable service while disabled. Teachers do not contribute to the Plans while disabled.

g) Termination benefits

Refunds or commuted value transfers are available when a teacher ceases employment, subject to certain restrictions. Inactive members with a minimum of five years of pensionable service, subject to certain restrictions, have the option to defer their entitlement in the Plans and receive a pension when they retire.

h) Death benefits

Death benefits are available upon the death of a teacher and may be available upon the death of a retired member, depending on the pension option selected by the retired member at the time of retirement. The benefit may take the form of a lump sum payment or a survivor pension.

i) Service purchases and transfers

Purchase of past service, such as substitute teaching service, employer-approved leaves, and reinstatement of refunded service is allowed on a basis that is cost neutral to the Plans.

Notes to the Financial Statements

August 31, 2024

NOTE 1 DESCRIPTION OF ATRF AND THE PLANS (CONTINUED)

The plans have Reciprocal Transfer Agreements with all other provincial teachers' pension plans, the Alberta public sector pension plans, and the Government of Canada Public Service Pension Plan. These agreements authorize the transfer of pensionable service and related obligations and assets in accordance with the terms of the reciprocal transfer agreement between the participating organizations.

j) COLA

Deferred pensions and pensions payable for the portion of pension earned after 1992 are increased each year by a COLA equal to 70% of the increase in the ACPI.

k) Income taxes

The Plans are registered pension plans as defined in the *Income Tax Act* (registration number 0359125) and are not subject to income taxes in Canada. The Plans may be subject to taxes in other jurisdictions where full tax exemptions are not available.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Basis of presentation

The statements present the aggregate financial position of the Plans. These financial statements are prepared in accordance with Canadian accounting standards for pension plans. Section 4600 – Pension Plans, of the CPA Canada Handbook, prescribes accounting policies specific to investments and pension obligations. For accounting policies which do not relate to either investments or pension obligations, International Financial Reporting Standards ("IFRS") are applied. To the extent that IFRS are inconsistent with Section 4600, Section 4600 takes precedence.

All of the entities that ATRF has an ownership interest in, regardless of whether ATRF can control or exercise significant influence, are considered to be investment assets and are presented on a non-consolidated basis.

b) Valuation of investments

Investments, investment-related receivables and investment-related liabilities are recognized on a trade date basis and are stated at fair value.

Fair value is the price at which an investment asset would be sold or investment liability transferred through an orderly transaction between market participants at the measurement date under current market conditions.

Notes to the Financial Statements

August 31, 2024

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The following methods are used by AIMCo to determine the fair values of investment, as presented in Note 3.

CATEGORY	BASIS OF VALUATION
Money-market securities	Cost plus accrued interest approximates fair value due to the short-term nature of these securities.
Bonds and debentures	Closing quoted market price. Where quoted prices are not available, estimated values are calculated using discounted cash flows based on current market yields for comparable securities.
Public equity and REITS	Closing quoted market price. Where a market price is not available, market value is determined using appropriate valuation methods.
Private equity/ Infrastructure	Managers or general partners estimate the fair value of private equity funds, pools and limited partnerships. Valuation techniques include a combination of the market approach using prices or earnings multiples of comparable investments or companies, the income approach considering discounted or capitalized future cash flows, and the cost approach.
Absolute return	Absolute return strategies include investments in hedge funds, and underlying securities in the funds can include equities, fixed income securities, derivatives, and alternative investments. The fair value of these funds is based on the net asset value reported by the external fund manager or the administrator.
Real estate	The estimated fair value of private real estate investments is reported at the most recent appraised value, net of any liabilities against the real property. Real estate properties are appraised at least annually by qualified external real estate appraisers. Appraisers use a combination of methods to determine a fair value, including replacement cost, direct comparison, direct capitalization of earnings and discounted cash flows.
Renewables	Managers or general partners estimate the fair value of the underlying timberland and agricultural investments. Valuation techniques include a combination of the market approach using public comparables or precedent transaction multiples of comparable investments or companies, the income approach considering discounted or capitalized future cash flows, and the cost approach. Underlying real estate, if any, is valued using the same methodologies described in the real estate category.
Bond repurchase agreement	Bonds sold under repurchase agreement are recorded at cost plus accrued interest, which approximates fair value.

Notes to the Financial Statements

August 31, 2024

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CATEGORY	BASIS OF VALUATION
Derivatives	The carrying value of derivative contracts in a favourable and unfavourable position is recorded at fair value and is included in the fair value of pooled investment funds (see Note 10). The estimated fair value of equity and bond index swaps is based on changes in the appropriate market-based index net of accrued floating rate interest. Interest rate swaps and crosscurrency interest rate swaps are valued based on discounted cash flows using current market yields and exchange rates. Credit default swaps are valued based on discounted cash flows using current market yields and calculated default probabilities. Forward foreign exchange contracts are valued based on the difference between contractual foreign exchange rates and foreign exchange forward rates. Future contracts are valued based on quoted market prices. Options to enter into interest rate swap contracts are valued based on discounted cash flows using current market yields and volatility parameters, which measure changes in the underlying swap. Warrants and rights are valued at the year-end closing sale price or the average of the latest bid and ask prices quoted by an independent securities valuation company.

As disclosed in Note 3, the Plans’ investments consist of direct ownership in both segregated and pooled investment funds (“the pools”). Participants in the pools are not a party to the contracts and have no control over the management of the pool and the selection of securities in the pool. The Plans’ investment manager controls the creation of the pools and the management and administration of the pools, including security selection. The Plans hold units in the pooled investment fund. Accordingly, the Plans do not report the financial instruments of the pools on its statement of financial position, but rather the value of the units.

The fair value of units held by the Plans is derived from the fair value of the underlying financial instruments held by the pools as determined by the investment manager. Investments in units are recorded in the Plans’ accounts. The underlying financial instruments are recorded in the accounts of the pools on a trade-date basis. The pools have a market-based unit value that is used to distribute income to the pool participants and to value purchases and sales of the pool units. The pools include various financial instruments such as bonds, equities, real estate, derivatives, investment receivables, and payables.

The Plans become exposed to the financial risks and rewards associated with the underlying financial instruments in a pool when the Plans purchase units issued and lose exposure to those financial risks and rewards when it sells its units. The Plans report its share of the investment risks in Note 10.

All purchases and sales of the pool units are in Canadian dollars.

Notes to the Financial Statements

August 31, 2024

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

FAIR VALUE HIERARCHY

All financial instruments measured at fair value are categorized into one of the following three hierarchy levels. Each level reflects the availability of observable inputs which are used to determine fair values, based on financial information significant to the valuation measurement.

- Level 1: Fair value is based on unadjusted quoted prices in active markets for identical assets or liabilities. For multi-client pools, securities held in pools with quoted price in active markets are classified as level 2 as the pool units themselves are not listed in an active market, and therefore, cannot be classified as level 1.
- Level 2: Fair value is based on market data other than quoted prices included in Level 1 that are observable either directly or indirectly. This level includes units of multi-client pools holding public equity, debt securities, and derivative contracts that would otherwise be classified as Level 1.
- Level 3: Fair value is based on inputs other than observable market data. This level includes units of multi-client pools holding investments that would not be classified as Level 1 and Level 2.

c) Investment income

Income is recognized as follows:

CATEGORY	BASIS OF RECOGNITION
Interest income	Accrual basis
Dividend income	Accrual basis on the ex-dividend date
Income from real estate, private equity, and infrastructure	Income includes distributions recognized as interest income, dividend income or other income, as appropriate
Realized gains and losses on investments	Difference between proceeds on disposal and the average cost
Unrealized gains and losses on investments	Change in the difference between estimated fair value and the average cost

Income distributions from pooled funds are based on the Plans' pro-rata share of total units issued by the pools. Changes in fair value of units, including realized gains and losses on disposal of units and unrealized gains and losses on units are determined on an average cost basis.

Notes to the Financial Statements

August 31, 2024

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

d) Investment expenses

Investment expenses, including those relating to portfolio transaction costs (incremental costs attributable to the acquisition and disposition of investment assets or liabilities), investment personnel and operations, oversight, and governance, are accrued and expensed in the fiscal period as incurred.

In addition, investment expenses are charged by AIMCo on a cost-recovery basis. Amounts charged to the Plan by AIMCo for investment costs include external management fees, external administration costs, employee salaries, and incentive benefits, and overhead costs. Please refer to the AIMCo financial statements for a more detailed breakdown of the types of expenses.

Investment performance fees are earned by AIMCo and other external investment managers for earning returns in excess of pre-determined thresholds. Fees earned by AIMCo and external managers in the fiscal period are expensed.

e) Foreign currency translation

Assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the exchange rates prevailing on the year-end date. Income and expenses are translated into Canadian dollars at the exchange rates prevailing on the dates of the transactions. Realized and unrealized gains and losses arising from these translations are included within the change in fair value of investments in investment earnings.

f) Contributions

Contributions from the teachers, the Province and the employers are recorded on an accrual basis. Cash received from teachers for credited service and cash transfers from other pension plans are recorded when received.

g) Benefits

Pension benefits, termination benefits and transfers to other plans are recorded in the period in which they are paid. Any benefit payment accruals not paid are reflected in accrued pension benefits.

h) Accrued pension obligations

The value of accrued pension obligations and changes therein during the year are based on an actuarial valuation prepared by an independent firm of actuaries annually as at August 31. The valuation uses the projected benefit method, pro-rated on service, and includes management's best estimate of various future events, as at the valuation date (Note 5).

The August 31, 2024 results were obtained by extrapolating the August 31, 2023 actuarial valuation.

i) Corporate cash

Corporate cash comprises of cash on hand and demand deposits. Cash is held for the purpose of meeting short-term commitments rather than for investment purposes.

Notes to the Financial Statements

August 31, 2024

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

j) Capital assets

Capital assets are recorded at cost and amortized over their estimated useful lives. Costs net of accumulated amortization are included with 'Other assets' on the Statement of Financial Position.

k) Use of estimates

The preparation of financial statements, in conformity with Canadian accounting standards for pension plans, requires management to make estimates and assumptions in circumstances where the actual values are unknown. Uncertainty in determination of the amount that is reported in the financial statements is known as measurement uncertainty.

Measurement uncertainty exists in the calculation of the Plans' actuarial value of accrued benefits. Uncertainty arises because the Plans' actual experience may differ significantly from assumptions used in the calculation of the Plans' accrued benefits.

The value of financial instruments can be impacted by global events, therefore measurement uncertainty exists in the values of the Plans' assets.

Significant estimates and assumptions are made in measuring the Plans' private investments. The values may differ significantly from the values that would have been used had a ready market existed for these investments.

l) Salaries and benefits

Details of executives' compensation are presented in the Compensation Discussion and Analysis section of the Annual Report.

ATRF participates in the Local Authorities Pension Plan, a defined benefit public sector pension plan, which meets the accounting requirements for treatment as a defined contribution plan. The employer contributions are recorded as an expense.

ATRF provides a Supplementary Employee Pension Plan (SEPP) to executives and certain eligible managers whose earnings exceed the pension benefit limit under the *Income Tax Act* regulations. Benefits are paid to these members as the benefits come due. No assets are earmarked, set aside or placed into trust by ATRF for SEPP benefit payments. The pension benefit is recorded as an expense and as a liability.

m) Accounting surplus

For financial statement reporting purposes, the Plans' surplus or deficiency is based on the difference between the fair value of the Plans' net assets available for benefits and the accrued pension obligation.

Notes to the Financial Statements

August 31, 2024

NOTE 3 INVESTMENTS

The following schedule summarizes the fair value of the Plans' investments before allocating the market exposure related to derivative financial instruments. Investments assets and liabilities are presented within the fair value hierarchy as defined in Note 2 b).

(\$ Thousands)	Fair Value			2024	2023
	Level 1	Level 2	Level 3	Total	Total

Contributions due to the Province	-	878
	\$ 22,457	\$ 22,258

NOTE 5 ACCRUED PENSION OBLIGATIONS

Pension obligations represent the value of accrued pension benefits payable in the future to members and are based on an actuarial valuation or extrapolation by an independent firm of actuaries.

Separate valuations or extrapolations are performed for accounting purposes and for funding purposes. The accrued pension obligation for funding purposes was determined using the valuation methodology described in Note 5 d).

For accounting purposes, an actuarial extrapolation of the Plans was performed as at August 31, 2024 and is based on the actuarial valuations as at August 31, 2023. The accrued pension obligation reflected in the Statement of Financial Position represents the present value of the accrued pension obligations of \$19,142 million (2023: \$18,244 million), which was determined using the projected accrued benefit actuarial cost method prorated on service.

Notes to the Financial Statements

August 31, 2024

NOTE 5 ACCRUED PENSION OBLIGATIONS (CONTINUED)

a) Best-estimate valuations and assumptions

The assumptions used in the valuations/extrapolations are based on past experience, as analyzed by the Plans' actuary, and management's best estimate of future events and involve rates of demographic change, such as rates of mortality, termination of membership and retirement, as well as economic parameters, such as rates of inflation, discount rates and salary escalation rates.

The discount rate is equivalent to the long-term expected rate of return on invested assets.

The major long-term economic assumptions used in determining the actuarial value of accrued pension benefits were:

	2024	2023
Rate of return on invested assets (discount rate)	6.50%	6.50%
Rate of inflation	2.00%	2.00%
Real wage increases	0.75%	0.75%

b) Sensitivity of changes in major assumptions on best-estimate valuations

For illustrative purposes, the table below shows the impact of changes in major assumptions, holding all other assumptions constant:

	Teachers' Pension Plan		Private School Teachers' Pension Plan	
	0.5% decrease in rate of return on invested assets	0.5% increase in rate of inflation	0.5% decrease in rate of return on invested assets	0.5% increase in rate of inflation
Increase in current service costs (% of total teacher salaries)	1.7%	1.3%	1.8%	1.4%
Increase in accrued pension obligations	\$1,452 million	\$1,075 million	\$8 million	\$6 million

For accounting purposes, and using best-estimate financial statement extrapolation assumptions, as at August 31, 2024, the current service cost (excluding 0.25% for administrative expenses) as a percent of total teacher salaries for the Teachers' Pension Plan is 14.3% and for the Private School Teachers' Pension Plan is 14.8%. The financial statement extrapolation's current service cost may differ from the current service cost calculated using the funding extrapolation assumptions for funding purposes.

Notes to the Financial Statements

August 31, 2024

NOTE 5 ACCRUED PENSION OBLIGATIONS (CONTINUED)

c) Results based on valuations/ extrapolations

For accounting purposes, the excess of net assets available for benefits against pension obligations results in the Plans having an accounting surplus of \$5,212 million for the post-1992 period of the Teachers' Pension Plan and an accounting surplus of \$36 million for the Private School Teachers' Pension Plan as at August 31, 2024.

(\$ Thousands)	2024			2023		
	Teachers' Pension Plan	Private Teachers' Plan	Total	Teachers' Pension Plan	Private Teachers' Plan	Total
Net assets at beginning of year	\$ 22,755,061	\$ 122,359	\$ 22,877,420	\$ 21,828,657	\$ 114,407	\$ 21,943,064
Contributions	772,233	6,481	778,714	738,318	6,145	744,463
Benefits	(824,346)	(4,022)	(828,368)	(754,555)	(3,135)	(757,690)
Investment earnings	1,807,813	9,721	1,817,534	1,136,511	5,958	1,142,469
Investment and member service expenses	(253,909)	(1,366)	(255,275)	(193,870)	(1,016)	(194,886)
Net assets at end of year	24,256,852	133,173	24,390,025	22,755,061	122,359	22,877,420
Accrued pension obligations at beginning of year	18,153,574	89,983	18,243,557	17,821,219	86,519	17,907,738
Interest on accrued benefits	1,171,124	5,878	1,177,002	1,107,551	5,462	1,113,013
Benefits accrued	551,788	4,923	556,711	553,755	4,866	558,621
Changes in actuarial assumptions	-	-	-	(685,852)	(3,625)	(689,477)
Experience (gains) losses	(7,265)	(31)	(7,296)	111,456	(104)	111,352
Benefits paid	(824,346)	(4,022)	(828,368)	(754,555)	(3,135)	(757,690)
Actuarial value of accrued pension obligations	19,044,875	96,731	19,141,606	18,153,574	89,983	18,243,557
Accounting surplus	\$ 5,211,977	\$ 36,442	\$ 5,248,419	\$ 4,601,487	\$ 32,376	\$ 4,633,863

The change in pension obligations is comprised of five components:

i) INTEREST ON ACCRUED BENEFITS

Pension obligations increase with interest as the present value of the valuation is evaluated one year later. The interest on accrued benefits is calculated using the rate of return on invested assets.

Notes to the Financial Statements

August 31, 2024

NOTE 5 ACCRUED PENSION OBLIGATIONS (CONTINUED)

ii) BENEFITS ACCRUED

Pension obligations increase with new service credited and additional benefits accumulated by plan members during the fiscal year.

iii) EXPERIENCE LOSSES (GAINS)

Experience gains of \$7 million (2023: Experience losses of \$111 million) on accrued benefits are the result of actual experience from one valuation/extrapolation to the next being different than implied by the assumptions from the previous valuation/extrapolation. As the experience is more favorable than anticipated in the assumptions, this results in an experience gain. Experience gains decrease the pension obligations.

The following table provides details on the net gain on accrued benefits.

(\$ Thousands)	TPP	PSTPP	Total
COLA	\$ (7,265)	\$ (31)	\$ (7,296)
Experience gains	\$ (7,265)	\$ (31)	\$ (7,296)

iv) CHANGES IN ACTUARIAL ASSUMPTIONS

Pension obligations can increase or decrease if there are changes in actuarial assumptions used to evaluate the present value of benefits.

There are no assumptions changes from August 31, 2023 to August 31, 2024.

v) BENEFITS PAID

The pension obligations decrease with benefits paid from the Plans during the fiscal year, as the funds are no longer required to be set aside to pay for those benefits.

d) Extrapolation/Valuation methodologies

ATRF engages an independent actuary to perform two different actuarial valuations of the Plans, one for accounting purposes which is performed in compliance with the prescribed accounting standards, and the second for funding purposes, which is performed in compliance with the prescribed professional and regulatory standards.

Notes to the Financial Statements

August 31, 2024

NOTE 5 ACCRUED PENSION OBLIGATIONS (CONTINUED)

The Plans' accounting surplus or deficiency includes the determination of assets on a fair value basis. However, for actuarial funding valuation purposes, asset values are adjusted for fluctuations in fair values to moderate the effect of market volatility on the Plans' funded status. The funding valuation is calculated in accordance with actuarial standards on a going concern basis and is used to determine changes to contribution rates for future service in order to manage the Plans' funding status. Both types of valuations have prescribed uses and are based on the same underlying plan member data, but the funding valuation differs by smoothing market returns over a five-year period and incorporating a margin for adverse deviation in the pension obligations and current service costs.

In accordance with the *Teachers' Pension Plans Act*, an actuarial funding valuation is required to be performed, at a minimum, every three years. The objective is to ensure that the Plans are fully funded over the long term through the management of investments and contribution rates. Investments are based on an asset mix that is designed to enable the Plans to meet their long-term funding requirement within an acceptable level of risk, consistent with the Plans' investment and funding policies, which are approved by the Board. In years when an actuarial valuation is not performed (such as the year ended August 31, 2024), the Plans' obligations are determined by extrapolating the Plans' obligations from the previous actuarial valuation as per the accepted extrapolation methodologies under the prescribed professional standards. For further information, refer to the funding section of the Annual Report.

Notes to the Financial Statements

August 31, 2024

NOTE 6 INVESTMENT EARNINGS

The following is a summary of investment earnings by asset class:

(\$ Thousands)	2024			2023		
	Investment Income	Change in Fair Value ¹	Total	Investment Income	Change in Fair Value ²	Total
Fixed income						
Investment Cash & money-market securities	\$ 23,268	\$ 2,324	\$ 25,592	\$ 15,454	\$ (52)	\$ 15,402

Pension benefits	\$ 721,486	\$ 663,988
Termination benefits	88,770	77,852
Transfers to other plans	18,112	15,850
	\$ 828,368	\$ 757,690

During the year \$503 million (2023: \$497 million) was received from the Province and was distributed as benefits paid relating to the pre-1992 period.

Notes to the Financial Statements

August 31, 2024

NOTE 10 INVESTMENT RISK MANAGEMENT

The Plans' actuarial liabilities are primarily affected by the long-term real rate of return expected to be earned on investments. To earn the best possible return at an acceptable level of risk, the SIP&G contains an asset mix with policy ranges designed to deliver the expected long-term rate of return. The Board reviews and approves the SIP&G at least once every fiscal year.

The Plans are exposed to financial risks associated with the underlying securities held in the pools created and managed by AIMCo. These financial risks include market risk, credit risk and liquidity risk. Market risk comprises currency risk, interest rate risk and price risk. Credit risk is a probable risk of loss resulting from the borrower failing to repay a loan or meet contractual obligations. Liquidity risk is the risk the Plan will not be able to meet its obligations as they fall due. Another type of liquidity risk affecting the Plans' fund is the risk that, for a certain period of time, a given financial asset cannot be traded quickly enough without impacting its market price.

a) Market risk

Market risk is the risk that the fair value or future cash flows of an investment asset or investment liability will fluctuate because of changes in market factors such as foreign exchange rates, interest rates, equity and commodity prices. Market risk is mitigated through diversification of investments across asset types, geography and time horizons. Market risk is comprised of the following:

i) CURRENCY RISK

Currency risk is the risk that the value of foreign investments will be affected by changes in foreign currency exchange rates for Canadian dollars. The Plans are exposed to currency risk through holdings of investment assets or liabilities in foreign currencies. The relative Canadian value or future cash flows of investments denominated in foreign currencies will change with a change in the price of the Canadian dollar against other currencies.

Foreign investments in absolute return, real estate and infrastructure are hedged with the aim of minimizing foreign currency exposure. ATRF permits AIMCo to hedge foreign currency holdings to limit the Plans' foreign currency exposure.

Notes to the Financial Statements

August 31, 2024

NOTE 10 INVESTMENT RISK MANAGEMENT (CONTINUED)

The Plans' foreign currency exposure is as follows:

(\$ Thousands)	2024				2023			
Currency	Foreign Currency Exposure	Currency Derivatives	Net Foreign Currency Exposure	% of Total	Foreign Currency Exposure	Currency Derivatives	Net Foreign Currency Exposure	% of Total
United States Dollar	\$ 11,204,264	\$ (5,535,009)	\$ 5,669,255	65 %	\$ 9,685,102	\$ (4,754,082)	\$ 4,931,020	60 %
Euro	2,553,149	(1,235,105)	1,318,044	15	2,086,100	(834,604)	1,251,496	15
Hong Kong Dollar	270,231	(1,688)	268,543	3	337,476	(115)	337,361	4
Japanese Yen	228,201	14,828	243,029	3	168,760	43,086	211,846	3
British Pound Sterling	526,034	(332,085)	193,949	2	570,013	(206,810)	363,203	4
Taiwan Dollar	174,781	-	174,781	2	193,018	-	193,018	2
Other	1,268,848	(404,308)	864,540	10	1,113,827	(155,060)	958,767	12
	\$ 16,225,508	\$ (7,493,367)	\$ 8,732,141	100 %	\$ 14,154,296	\$ (5,907,585)	\$ 8,246,711	100 %

The net foreign currency exposure of its underlying investments represents 36% (2023: 36%) of the Plans' net investments.

After considering the effect of currency hedges, a 5% increase/decrease in the value of the Canadian dollar against all currencies, with all other variables held constant, would result in an approximate decrease/increase in the value of net foreign investments of \$437 million as at August 31, 2024 (2023: \$412 million).

ii) INTEREST RATE RISK

Interest rate risk is the risk that the fair value or future cash flows of an investment will fluctuate as a result of changes in market interest rates. The Plans are exposed to interest rate risk through fixed-rate and floating-rate securities. There are also certain alternative investments which may have interest rate components exposing them to interest rate risk. Changes in interest rates affect fair values of fixed-rate securities and the cash flows of floating-rate securities. Increases in interest rates will generally decrease the fair value of fixed-rate securities and increase cash flow from floating-rate notes.

Interest rate risk sensitivity

The interest rate sensitive assets represent 20% (2023: 21%) of the Plans' net investments.

Notes to the Financial Statements

August 31, 2024

NOTE 10 INVESTMENT RISK MANAGEMENT (CONTINUED)

The following table presents the approximate increase/decrease in market value for the Plans' interest rate sensitive investments, assuming a parallel 1% decrease/increase in interest rates, with all other variables held constant:

(\$ Thousands)	2024			2023		
	Market Value	Change in Market Value	Market Value %	Market Value	Change in Market Value	Market Value %
Term to Maturity						
Less than 1 year	\$ 485,545	\$ 1,260	10 %	\$ 150,445	\$ 595	3 %
1-3 years	314,034	4,919	6	776,736	12,888	16
3-5 years	149,944	3,007	3	467,041	16,051	10
5-10 years	172,794	7,695	4	709,863	39,784	15
Greater than 10 years	3,840,447	511,309	77	2,667,579	360,305	56
	\$ 4,962,764	\$ 528,190	100 %	\$ 4,771,664	\$ 429,623	100 %

iii) EQUITY PRICE RISK

Equity price risk is the risk that the fair value of an investment will fluctuate as a result of changes in equity market prices (other than those arising from interest-rate risk or currency risk), whether those changes are caused by factors specific to the individual investment or factors affecting all securities traded in the market.

Equity price risk is mitigated through the use of geographic, sector and entity specific analyses, and strategies such as diversification and derivative instruments to mitigate the overall impact of price risk.

A 10% increase/decrease in the value of the overall public equity market, with all other variables held constant, would result in an approximate increase/decrease in the value of public-market exposure of \$673 million (2023: \$639 million).

b) Credit risk

Credit risk is the potential of loss should a counterparty fail to meet its contractual obligations, or a reduction in the value of assets due to deteriorated credit quality of the counterparty, guarantor or the collateral supporting the credit exposure. The Plans are exposed to credit risk through investment in fixed income investments, securities lending, and balances receivable from sponsors and counterparties.

To mitigate this risk, AIMCo has set investment restrictions to limit the credit exposure to security issuers. Short-term investments require a rating of "R-1" or equivalent. Credit exposure to any single counterparty is limited to maximum amounts and minimum ratings as specified in the relevant product descriptions.

Notes to the Financial Statement

August 31, 2024

NOTE 10 INVESTMENT RISK MANAGEMENT (CONTINUED)

As at August 31, 2024, fixed-income investments exposed to credit risk, by credit rating, are as follows:

(\$ Thousands)	2024		2023	
	Market Value	% of Total	Market Value	% of Total
Investment grade (AAA to BBB-)	\$ 4,297,364	87 %	\$ 4,676,357	98 %
Speculative grade (BB+ or lower)	98,807	2	25,002	1
Unrated ¹	566,593	11	70,305	1
	\$ 4,962,764	100 %	\$ 4,771,664	100 %

¹Includes private debt investments and holdings for which credit rating is not assigned.

As at August 31, 2024, the Plans have significant concentration of credit risk within fixed-income investments with the following issuers:

(\$ Thousands)	2024		2023	
	Market Value	% of Total	Market Value	% of Total
Province of Ontario	\$ 1,084,400	22 %	\$ 842,301	18 %
Province of Quebec	862,264	17	628,314	13
Government of Canada	731,535	15	807,018	17

The Plans are also exposed to risk through over-the-counter ("OTC") derivative transactions, arising from a default or insolvency of a counterparty.

The Plans have exposure to OTC derivatives as follows:

(\$ Thousands)	2024		2023	
Forwards	\$ 21,256	\$ 30,774		
Options	90	1,161		
	\$ 21,346	\$ 31,935		

c) Liquidity risk

Liquidity risk is the risk of the Plans being unable to generate sufficient cash in a timely and cost-effective manner to meet commitments and expenses as they become due. Consideration is given to the Plans' financial liabilities, which include investment-related liabilities (Note 3), accrued pension obligations (Note 5), and contracts that give rise to commitments for future payments (Note 11).

Liquidity requirements of the Plans are met through income generated from investments, employee and employer contributions, and by holding publicly traded liquid assets in active markets that are easily sold and converted to cash. ATRF also maintains cash holdings with major Canadian Financial Institutions to manage short-term corporate liquidity needs.

Notes to the Financial Statement

August 31, 2024

NOTE 10 INVESTMENT RISK MANAGEMENT (CONTINUED)

The investment-related liabilities are due within one year as follows:

(\$ Thousands)	2024	2023
Due to brokers	\$ 12,629	\$ 20,290
Derivative instruments	9,473	34,427
Bonds repurchase agreements	3,159	77,230
	\$ 25,261	\$ 131,947

The following table presents the liquid investment assets at the year ended August 31:

(\$ Thousands)	2024	2023
Investment cash	\$ 292,215	\$ 596,301
Money-market securities	8,746	35,443
Investment related assets	24,211	79,773
Bonds and debentures	4,012,592	4,200,782
Public equity & REITs	6,772,023	6,606,842
	\$ 11,109,787	\$ 11,519,141

ATRF aims to ensure sufficient liquidity to meet the Plans' obligations while maintaining the agility for suitable investment opportunities and/or rebalancing the investment portfolios to target levels.

NOTE 11 COMMITMENTS

The Plans have committed to fund certain private investments over the next several years. These commitments are generally payable on demand based on the funding needs of the investment subject to the terms and conditions of each commitment. As at August 31, 2024, the sum of these commitments equalled \$855 million (2023: \$1,090 million).

Notes to the Financial Statement

August 31, 2024

NOTE 12 NET INVESTMENT RETURNS, RELATED BENCHMARK RETURNS AND THE DISCOUNT RATE

Net investment returns, related benchmark returns and the discount rate for the Plans for the years ended August 31 are as follows:

	2024	2023
Net Investment Return	6.9%	4.4%
Benchmark Return	12.3%	8.5%
Discount Rate	6.5%	6.5%

Investment return has been calculated using a time-weighted rate of return methodology in accordance with industry standard methods. Net investment return is net of investment costs and excludes plan member service costs of \$13.6 million or 0.06% (2023: \$12.6 million or 0.06%).

The Plans' benchmark return is a composite benchmark produced by aggregating returns from each policy asset class benchmark, using the Plans' asset mix policy weights.

The discount rate is the long term expected rate of return on invested assets needed to achieve the Plans fully funded status.

NOTE 13 RECLASSIFICATION

Certain prior year figures have been reclassified for current year's presentation.

NOTE 14 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved by the ATRF Board on Thursday, December 12, 2024.

Annual Report Extracts and Other Statutory Reports

Public Interest Disclosure (Whistleblower Protection) Act

Section 32 of the *Public Interest Disclosure (Whistleblower Protection) Act* reads:

- 32 (1) Every chief officer must prepare a report annually on all disclosures that have been made to the designated officer of the department, public entity or office of the Legislature for which the chief officer is responsible.
- (2) The report under subsection (1) must include the following information:
- (a) the number of disclosures received by the designated officer, the number of disclosures acted on and the number of disclosures not acted on by the designated officer;
 - (b) the number of investigations commenced by the designated officer as a result of disclosures;
 - (c) in the case of an investigation that results in a finding of wrongdoing, a description of the wrongdoing and any recommendations made or corrective measures taken in relation to the wrongdoing or the reasons why no corrective measure was taken.
- (3) The report under subsection (1) must be included in the annual report of the department, public entity or office of the Legislature if the annual report is made publicly available.

There were no disclosures of wrongdoing filed with my office, for your department, between April 1, 2024 and March 31, 2025.
